

CAR-FCL

Civil Aviation Regulation

Flight Crew Licensing

Effective 1st of September 2026

Approved by: H.E. Eng. Naif Ali Hamed Al-Abri

President of CAA

Corrigendum of Amendments

Rev.	Date	Description
00	01 Jan 2023	First Issue. Replacing CAR-FCL1 and CAR-FCL2.
01	10 Oct 2023	- FCL.015 amended to add new para (f) related to Flight Crew License validity; - Appendix 12 points A. & B.(2)(g) deleted; - Appendix 12 new provisions added for “Conditions for validation of pilot licenses for specific tasks of limited duration”; - AMC/GM for this regulation published, effective from the effectivity date of the CAR-FCL Revision 01.
02	01 Sep 2024	- Updating new CAA logo; - FCL.055 Clarification on the validity of Language Proficiency endorsement; - FCL.1015 and FCL.1025 Alignment of the providers of “Examiners standardization course”; - Enhancement to the Validation/Conversion requirements (Appendix 12).
03	01 Sep 2026	Amending CAR-FCL for: - the requirements for flight crew competence and training methods, and the reporting, analysis and follow-up of occurrences in civil aviation; - the requirements for all-weather operations and for instrument and type rating training in helicopters: - The helicopter IR redesigned to cover instrument flight in both single-engine and multi-engine helicopters; - the use of single-engine helicopters under IFR; - new requirements for safe multi-pilot operation in single-pilot helicopters; - the requirements for the operation of manned aircraft with a VTOL capability; - amendment of requirements for: - Cruise Relief Co-pilots: update training and authority transfer for co-pilots, - Future Engine Designs: add electric and hybrid standards for single-engine planes, and improvement of the provisions for General aviation; - the introduction of a gyroplane pilot licence.

FOREWORD	11
Article 1 – Subject matter	13
Article 2 – Definitions	13
Article 3 – Pilot licensing and medical certification	14
Article 4 – Existing national pilots’ licences.....	15
Article 5 – Performance-based navigation instrument rating privileges	15
Article 6 – Upset prevention and recovery training.....	15
Article 7 – Credit for training commenced prior to the application of CAR-FCL.....	16
Article 8 – Conditions for the acceptance of licences from foreign countries (ICAO Member states)	16
Article 9 – Credit for pilot licences obtained during military service	16
Article 10 – Pilot training organisations.....	17
Article 11 – Repeals	17
Article 12 – Entry into Force.....	17
Article 13 – Transitional measures and periods.....	18
Article 14 – Type ratings for VCA.....	18
SUBPART A GENERAL REQUIREMENTS	22
FCL.001 Competent authority.....	22
FCL.005 Scope.....	22
FCL.010 Definitions	22
FCL.015 Application and issue, revalidation and renewal of licences,ratings and certificates.....	28
FCL.020 Student pilot	28
FCL.025 Theoretical knowledge examinations for the issue of licences and ratings	28
FCL.030 Practical skill test.....	30
FCL.035 Crediting of flight time and theoretical knowledge.....	30
FCL.040 Exercise of the privileges of licences	32
FCL.045 Obligation to carry and present documents	32
FCL.050 Recording of flight time	32
FCL.055 Language proficiency.....	32
FCL.060 Recent experience.....	33

FCL.065 Curtailment of privileges of licence holders aged 60 years or more in commercial air transport.....	34
FCL.070 Revocation, suspension and limitation of licences, ratings and certificates	34
SUBPART B <i>LIGHT AIRCRAFT PILOT LICENCE — LAPL</i>	35
SECTION 1 Common requirements.....	35
FCL.100 LAPL — Minimum age	35
FCL.105 LAPL — Privileges and conditions	35
FCL.110 LAPL — Crediting for the same aircraft category	35
FCL.115 LAPL — Training course.....	35
FCL.120 LAPL — Theoretical knowledge examination.....	36
FCL.125 LAPL — Skill test.....	36
SECTION 2 Specific requirements for the LAPL for aeroplanes — LAPL(A).....	37
FCL.105.A LAPL(A) — Privileges and conditions.....	37
FCL.110.A LAPL(A) — Experience requirements and crediting	37
FCL.135.A LAPL(A) — Extension of privileges to another class or variant of aeroplane	38
FCL.140.A LAPL(A) — Recency requirements	38
SECTION 3 Specific requirements for the LAPL for helicopters — LAPL(H)	40
FCL.105.H LAPL(H) — Privileges.....	40
FCL.110.H LAPL(H) — Experience requirements and crediting.....	40
FCL.135.H LAPL(H) — Extension of privileges to another type or variation of helicopter	40
FCL.140.H LAPL(H) — Recency requirements.....	41
SUBPART C <i>PRIVATE PILOT LICENCE (PPL) AND GYROPLANE PILOT LICENCE (GPL)</i>	42
SECTION 1 Common requirements	42
FCL.200 Minimum age.....	42
FCL.205 Conditions.....	42
FCL.210 Training course.....	42
FCL.215 Theoretical knowledge examination.....	42
FCL.235 Skill test.....	43
SECTION 2 Specific requirements for the PPL aeroplanes — PPL(A)	44
FCL.205.A PPL(A) — Privileges.....	44
FCL.210.A PPL(A) — Experience requirements and crediting.....	44
SECTION 3 Specific requirements for the PPL helicopters — PPL(H).....	46
FCL.205.H PPL(H) — Privileges.....	46
FCL.210.H PPL(H) — Experience requirements and crediting.....	46
SECTION 4 Specific requirements for the PPL airships — PPL(As).....	47
FCL.205.As PPL(As) — Privileges.....	47

FCL.210.As PPL(As) — Experience requirements and crediting	47
‘SECTION 5 Specific requirements for the GPL.....	48
FCL.205.G GPL – Privileges	48
FCL.210.G GPL – Experience requirements and crediting.....	48
FCL.235.G GPL – Privileges for classes, types and variants of gyroplanes	49
FCL.240.G GPL – Recency requirements	50
SUBPART D COMMERCIAL PILOT LICENCE — CPL	51
SECTION 1 Common requirements	51
FCL.300 CPL — Minimum age	51
FCL.305 CPL — Privileges and conditions.....	51
FCL.310 CPL — Theoretical knowledge examinations	51
FCL.315 CPL — Training course.....	52
FCL.320 CPL — Skill test.....	52
SECTION 2 Specific requirements for the aeroplane category — CPL(A).....	53
FCL.315.A CPL — Training course.....	53
FCL.325.A CPL(A) — Specific requirements for applicants who hold an MPL.....	53
SUBPART E MULTI-CREW PILOT LICENCE — MPL	54
FCL.400.A MPL — Minimum age	54
FCL.405.A MPL — Privileges	54
FCL.410.A MPL — Training course and theoretical knowledge examinations	54
FCL.415.A MPL — Practical skill.....	54
SUBPART F AIRLINE TRANSPORT PILOT LICENCE — ATPL.....	55
SECTION 1 Common requirements	55
FCL.500 ATPL — Minimum age	55
FCL.505 ATPL — Privileges.....	55
FCL.515 ATPL — Training course and theoretical knowledge examinations.....	55
SECTION 2 Specific requirements for the aeroplane category — ATPL(A)	56
FCL.505.A ATPL(A) — Restriction of privileges for pilots previously holding an MPL	56
FCL.510.A ATPL(A) — Prerequisites, experience and crediting	56
FCL.520.A ATPL(A) — Skill test.....	57
SECTION 3 Specific requirements for the helicopter category — ATPL(H).....	58
FCL.510.H ATPL(H) — Prerequisites, experience and crediting	58
FCL.520.H ATPL(H) — Skill test.....	58
SUBPART G INSTRUMENT RATING — IR	59
SECTION 1 Common requirements	59
FCL.600 IR — General	59

FCL.605 IR — Privileges and conditions	59
FCL.610 IR — Prerequisites and crediting	59
FCL.615 IR — Theoretical knowledge and flight instruction	60
FCL.620 IR — Skill test	60
FCL.625 IR — Validity, revalidation and renewal	60
SECTION 2 Specific requirements for the aeroplane category	62
FCL.620A IR(A) — Skill test	62
FCL.625.A IR(A) — Revalidation	62
SECTION 3 Specific requirements for the helicopter category	63
FCL.625.H IR(H) — Revalidation	63
FCL.630.H IR(H) — Extension of privileges of an IR(H) to further helicopter types	63
SECTION 4 Specific requirements for the airship category	64
FCL.620.As IR(As) — Skill test	64
FCL.625.As IR(As) — Revalidation	64
SUBPART H CLASS AND TYPE RATINGS	65
SECTION 1 Common requirements	65
FCL.700 Circumstances in which class or type ratings are required	65
FCL.705 Privileges of the holder of a class or type rating	65
FCL.710 Class and type ratings — variants	65
FCL.725 Requirements for the issue of class and type ratings	66
FCL.740 Validity and renewal of class and type ratings	68
SECTION 2 Specific requirements for the aeroplane category	70
FCL.720.A Experience requirements and prerequisites for the issue of class or type ratings — aeroplanes	70
FCL.725.A Theoretical knowledge and flight instruction for the issue of class and type ratings — aeroplanes	72
FCL.730.A Specific requirements for pilots undertaking a zero flight time type rating (ZFTT) course — aeroplanes	72
FCL.735.A Multi-crew cooperation training course — aeroplanes	73
FCL.740.A Revalidation of class and type ratings — aeroplanes	73
FCL.745.A Advanced UPRT course — aeroplanes	74
SECTION 3 Specific requirements for the helicopter category	76
FCL.720.H Experience requirements and prerequisites for the issue of type ratings — helicopters	76
FCL.735.H Multi-crew cooperation training course — helicopters	77
FCL.740.H Revalidation of type ratings — helicopters	77
SECTION 4 Specific requirements for the powered-lift aircraft category	80

FCL.720.PL Experience requirements and prerequisites for the issue of type ratings — powered-lift aircraft.....	80
FCL.725.PL Flight instruction for the issue of type ratings — powered-lift aircraft.....	80
FCL.740.PL Revalidation of type ratings — powered-lift aircraft.....	80
SECTION 5 Specific requirements for the airship category.....	82
FCL.720.As Prerequisites for the issue of type ratings — airships.....	82
FCL.735.As Multi-crew cooperation training course — airships.....	82
FCL.740.As Revalidation of type ratings — airships.....	82
SUBPART I ADDITIONAL RATINGS.....	83
FCL.800 Aerobatic rating.....	83
FCL.805 Sailplane towing and banner towing ratings.....	83
FCL.810 Night rating.....	84
FCL.815 Mountain rating.....	85
FCL.820 Flight test rating.....	85
FCL.835 Basic instrument rating (BIR).....	86
SUBPART J INSTRUCTORS.....	89
SECTION 1 Common requirements.....	89
FCL.900 Instructor certificates.....	89
FCL.915 General prerequisites and requirements for instructors.....	90
FCL.920 Instructor competencies and assessment.....	91
FCL.925 Additional requirements for instructors for the MPL.....	92
FCL.930 Training course.....	92
FCL.935 Assessment of competence.....	93
FCL.940 Validity of instructor certificates.....	93
FCL.945 Obligations for instructors.....	93
SECTION 2 Specific requirements for the flight instructor — FI.....	94
FCL.905.FI FI — Privileges and conditions.....	94
FCL.910.FI FI — Restricted privileges.....	95
FCL.915.FI FI — Prerequisites.....	96
FCL.930.FI FI — Training course.....	97
FCL.940.FI FI — Revalidation and renewal.....	98
SECTION 3 Specific requirements for the type rating instructor — TRI.....	99
FCL.905.TRI TRI – Privileges and conditions.....	99
FCL.910.TRI TRI — Restricted privileges.....	100
FCL.915.TRI TRI — Prerequisites.....	101
FCL.930.TRI TRI — Training course.....	102

FCL.935.TRI TRI — Assessment of competence	103
FCL.940.TRI TRI — Revalidation and renewal.....	103
SECTION 4 Specific requirements for the class rating instructor — CRI.....	106
FCL.905.CRI CRI — Privileges and conditions.....	106
FCL.915.CRI CRI — Prerequisites	106
FCL.930.CRI CRI — Training course	107
FCL.940.CRI CRI — Revalidation and renewal	107
SECTION 5 Specific requirements for the instrument rating instructor — IRI.....	108
FCL.905.IRI IRI — Privileges and conditions	108
FCL.915.IRI IRI — Prerequisites.....	108
FCL.930.IRI IRI — Training course.....	108
FCL.940.IRI IRI — Revalidation and renewal	109
SECTION 6 Specific requirements for the synthetic flight instructor — SFI.....	110
FCL.905.SFI SFI — Privileges and conditions	110
FCL.910.SFI SFI — Restricted privileges.....	111
FCL.915.SFI SFI — Prerequisites.....	111
FCL.930.SFI SFI — Training course.....	112
FCL.940.SFI SFI — Revalidation and renewal.....	112
SECTION 7 Specific requirements for the multi-crew cooperation instructor — MCCI.....	114
FCL.905.MCCI MCCI — Privileges and conditions.....	114
FCL.910.MCCI MCCI — Restricted privileges	114
FCL.915.MCCI MCCI — Prerequisites.....	114
FCL.930.MCCI MCCI — Training course	114
FCL.940.MCCI MCCI — Revalidation and renewal.....	115
SECTION 8 Specific requirements for the synthetic training instructor — STI.....	116
FCL.905.STI STI — Privileges and conditions.....	116
FCL.910.STI STI — Restricted privileges	116
FCL.915.STI STI — Prerequisites	116
FCL.930.STI STI — Training course	117
FCL.940.STI STI — Revalidation and renewal of the STI certificate.....	117
SUBPART K EXAMINERS	119
SECTION 1 Common requirements	119
FCL.1000 Examiner certificates.....	119
FCL.1005 Limitation of privileges in case of vested interests.....	120
FCL.1010 Prerequisites for examiners	120
FCL.1015 Examiner standardisation	120

FCL.1020 Examiners assessment of competence.....	121
FCL.1025 Validity, revalidation and renewal of examiner certificates	121
FCL.1030 Conduct of skill tests, proficiency checks and assessments of competence	122
SECTION 2 Specific requirements for flight examiners — FE	123
FCL.1005.FE FE — Privileges and conditions	123
FCL.1010.FE FE — Prerequisites	124
SECTION 3 Specific requirements for type rating examiners — TRE	125
FCL.1005.TRE TRE — Privileges and conditions.....	125
FCL.1010.TRE TRE — Prerequisites.....	125
SECTION 4 Specific requirements for Class Rating Examiner — CRE.....	127
FCL.1005.CRE CRE — Privileges	127
FCL.1010.CRE CRE — Prerequisites	127
SECTION 5 Specific requirements for Instrument Rating Examiner — IRE.....	128
FCL.1005.IRE IRE — Privileges.....	128
FCL.1010.IRE IRE — Prerequisites.....	128
SECTION 6 Specific requirements for Synthetic Flight Examiner — SFE	129
FCL.1005.SFE SFE — Privileges and conditions	129
FCL.1010.SFE SFE — Prerequisites.....	129
SECTION 7 Specific requirements for the flight instructor examiner — FIE	131
FCL.1005.FIE FIE — Privileges and conditions	131
FCL.1010.FIE FIE — Prerequisites	131
Appendix 1 Crediting of theoretical knowledge.....	132
Appendix 2 Language Proficiency Rating Scale — Expert, extended and operational level	135
Appendix 3 Training courses for the issue of a CPL and an ATPL.....	137
Appendix 4 Skill test for the issue of a CPL	157
Appendix 5 Integrated MPL training course.....	169
Appendix 6 Modular training courses for the IR.....	172
Appendix 7 BIR and IR skill test.....	182
Appendix 8 Cross-crediting of the IR part of a class or type rating proficiency check or EBT practical assessment.....	191
Appendix 9 Training, skill test and proficiency check for the MPL, and the ATPL, and for type and class ratings, and proficiency checks for the BIR and the IR.....	193
Appendix 10 Revalidation and renewal of type ratings, and revalidation and renewal of IRs when combined with the revalidation or renewal of type ratings – EBT practical assessment.....	241
Appendix 11 CONDITIONS FOR THE CONVERSION OF EXISTING NATIONAL LICENCES AND	

RATINGS FOR AEROPLANES AND HELICOPTERS.....	243
Appendix 12 CONDITIONS FOR THE ACCEPTANCE OF LICENCES ISSUED BY FOREIGN COUNTRIES (ICAO MEMBER STATES).....	247

FOREWORD

- (a) The Civil Aviation Regulation Flight Crew Licensing (CAR-FCL) has been issued by the Civil Aviation Authority of Oman (CAA) under the provisions of the Civil Aviation Law of the Sultanate of Oman.
- (b) The CAR-FCL contains requirements for “Flight Crew Licensing” in accordance with relevant standards and recommended practices (SARPs) of ICAO Annex 1 and its amendments. This Regulation has been modelled upon similar regulations implemented by other member states to ensure latest industry practices are considered.
- (c) CAA has established a designated Safety Regulations Department (SRD) to control the rulemaking process. Civil Aviation Industry of the Sultanate may contact this department in case of having any query on the CAA regulations or to submit their feedbacks, with the objective of improving CAA Regulations.

Note: Please find more information on rulemaking process as described within CAR-11.

- (d) The editing practices used in this document are as follows:
 - (1) **‘Shall’** is used to indicate a mandatory requirement within the contents of a Regulation.
 - (2) **‘Should’** is used to indicate a recommendation and normally is used in the contents of an AMC.
 - (3) **‘May’** is used to indicate discretion by the Authority, or the industry as appropriate.
 - (4) **‘Will’** indicates a mandatory requirement and is used to advise of action incumbent on the Authority.
 - (5) **‘Revision’** is an amendment to the text of Regulation, issued as a complete set of amended pages formed in a revised document and numbered starting from 01. The revised Regulation replaces previous one.

Note: The use of the male gender implies the female gender and vice versa.

Cover Regulation (Articles)

Article 1 – Subject matter

This Regulation lays down detailed rules for:

- (a) different ratings for pilot licences, the conditions for issuing, maintaining, amending, limiting, suspending or revoking pilot licences, the privileges and responsibilities of the holders of pilot licences, as well as the conditions for the conversion of existing national pilot licences and of national flight engineer licences into pilot licences;
- (b) the certification of persons who are responsible for providing flight training or flight simulation training and for assessing pilots' skills;

Article 2 – Definitions

For the purposes of this Regulation, the following definitions shall apply:

‘Aircrew’ means flight crew and cabin crew;

‘Acceptable means of compliance (AMC)’ means non-binding standards adopted by the CAA to illustrate means to establish compliance with this Regulation. AMC illustrate a means, but not the only means, by which the proposed requirement can be met. Organisations are required to comply with the AMC unless a differing Alternative Means of Compliance (AltMoC) has been proposed and accepted by the CAA; ‘Alternative means of compliance (AltMoC)’ means those means that propose an alternative to an existing AMC by an organisation;

‘Approved training organisation (ATO)’ means an organisation which is entitled to provide training to pilots on the basis of an approval issued in accordance with the CAR-ORA Article 4;

‘Basic instrument training device (BITD)’ means a ground-based training device for the training of pilots representing the student pilot's station of a class of aeroplanes, which may use screen-based instrument panels and spring-loaded flight controls, and providing a training platform for at least the procedural aspects of instrument flight;

‘CAR-FCL licence’ means a flight crew licence which complies with the requirements of CAR-FCL;

‘Certification specifications (CS)’ mean technical standards adopted by the CAA indicating means to be used by an organisation for the purpose of certification;

‘Complex aeroplane’ means an aeroplane that meets either of the following characteristics:

- (i) with a maximum certificated take-off mass exceeding 5 700 kg;
- (ii) certificated for a maximum passenger seating configuration of more than nineteen;
- (iii) certificated for operation with a minimum crew of two pilots;
- (iv) equipped with a turbojet engine or turbojet engines or more than one turboprop engine;

‘Complex helicopter’ means a helicopter that meets either of the following characteristics:

- (i) with a maximum certificated take-off mass exceeding 3 175 kg; 2/43
- (ii) certificated for a maximum passenger seating configuration of more than nine;
- (iii) certificated for operation with a minimum crew of two pilots;

‘Credit’ means the recognition of prior experience or qualifications;

‘Credit report’ means a report on the basis of which prior experience or qualifications may be recognised;

‘Flight instructor (FI)’ means an instructor with the privileges to provide training in an aircraft in accordance with Subpart J of CAR-FCL;

‘Flight simulation training device (FSTD)’ means a device for the training of pilots which is:

- (1) in the case of aeroplanes, a full flight simulator (FFS), a flight training device (FTD), a flight and navigation procedures trainer (FNPT) or a basic instrument training device (BITD);
- (2) in the case of helicopters, a full flight simulator (FFS), a flight training device (FTD) or a flight and navigation procedures trainer (FNPT);

‘SEP aeroplane’ means a single-engine, single-pilot aeroplane for which no type rating is required and whose single centric propulsion unit is operated by a single thrust control and driven by either of the following types of engine:

- (a) a piston engine;
- (b) an electric engine system which, if so specified following the certification process, may consist of more than one electric engine;
- (c) a hybrid engine system that consists of piston and electric engines, if so specified following the certification process;

‘SEP helicopter’ means a single-engine, single-pilot helicopter which is powered by a piston engine;

‘Rotorcraft’ means a power-driven, heavier-than-air aircraft that depends principally for its support in flight on the lift generated by up to two rotors;

‘Vertical take-off and landing (VTOL)-capable aircraft (VCA)’ means a power-driven, heavier-than-air aircraft, other than aeroplane or rotorcraft, capable of performing vertical take-off and landing by means of lift and thrust units used to provide lift during take-off and landing;

Article 3 – Pilot licensing and medical certification

Without prejudice to Article 7 of this Regulation, pilots involved in the operation of these aircrafts:

- (a) registered in the Sultanate of Oman, unless and to the extent that Sultanate of Oman has transferred its responsibilities pursuant to the Chicago Convention to a foreign country and the aircraft is operated by a foreign country aircraft operator;
- (b) registered in a foreign country and operated by an operator for which the CAA ensures oversight of operations;

shall comply with the technical requirements and administrative procedures laid down in CAR-FCL and CAR-FCL3.

Article 4 – Existing national pilots’ licences

- (a) Existing licences including any associated ratings, certificates, authorisations and/or qualifications issued before the applicability of CAR-FCL shall be deemed to have been issued in accordance with CAR-FCL.
- (b) Existing licences shall be converted into CAR-FCL licences and associated ratings or certificates by 01 January 2024 at the latest in accordance with the provisions of Appendix 11 to this regulation.

Article 5 – Performance-based navigation instrument rating privileges

- (a) From 01 January 2024, pilots may only fly in accordance with performance-based navigation (“PBN”) procedures after they have been granted PBN privileges as an endorsement to their instrument rating (“IR”).
- (b) A pilot shall be granted PBN privileges where he or she fulfils all of the following requirements:
 - (1) the pilot has successfully completed a course of theoretical knowledge including PBN, in accordance with FCL.615 of CAR-FCL;
 - (2) the pilot has successfully completed flying training including PBN, in accordance with FCL.615 of CAR-FCL;
 - (3) the pilot has successfully completed either a skill test in accordance with Appendix 7 to CAR-FCL or a skill test or a proficiency check in accordance with Appendix 9 of CAR-FCL.
- (c) The requirements of paragraph (b)(1) and (2) shall be deemed to have been fulfilled where the CAA considers that the competence acquired, either through training or from familiarity with PBN operations, is equivalent to the competence acquired through the courses referred to in paragraph (b)(1) and (2) and the pilot demonstrates such competence to the satisfaction of the examiner at the proficiency check or skill test referred to in paragraph (b)(3).
- (d) A record of the successful demonstration of competency in PBN shall, upon completion of the skill test or the proficiency check referred to in paragraph (b)(3), be entered in the pilot's logbook or equivalent record and signed by the examiner who conducted the test or check.
- (e) IR pilots without PBN privileges may only fly on routes and approaches that do not require PBN privileges and no PBN items shall be required for the renewal of their IR, until 01 January 2024; after that date, PBN privileges shall be required for every IR.

Article 6 – Upset prevention and recovery training

- (a) Upset prevention and recovery training shall become a mandatory part of a training course for a multi-crew pilot licence (MPL), an integrated training course for airline transport pilots for aeroplanes (ATP(A)), a training course for a commercial pilot licence for aeroplanes (CPL(A)) and training courses for a class or type rating for:
 - (1) single-pilot aeroplanes operated in multi-pilot operations;
 - (2) single-pilot non-high-performance complex aeroplanes;

- (3) single-pilot high-performance complex aeroplanes; or
 - (4) multi-pilot aeroplanes;
- in accordance with CAR-FCL.
- (b) For training courses referred to in paragraph (a) that commence before 01 January 2023 at an approved training organisation (ATO), upset prevention and recovery training shall not be mandatory provided that:
- (1) CPL(A), ATP(A) or MPL training course is otherwise completed in accordance with CAR-FCL and the skill test is completed in compliance with points FCL.320 (CPL), FCL.620 (IR) or FCL.415.A (MPL) of CAR-FCL by 01 January 2023 at the latest; or
 - (2) class or type rating training course for the aeroplanes is otherwise completed in accordance with CAR-FCL and the skill test is completed in compliance with the second subparagraph of paragraph (c) of point FCL.725 of CAR-FCL by 01 January 2023 at the latest.

For the purpose of paragraph (a), the CAA may on its own assessment and pursuant to a recommendation from an ATO give credit for any upset prevention and recovery training completed before 01 January 2023.

Article 7 – Credit for training commenced prior to the application of CAR-FCL

In respect of issuing CAR-FCL Licenses, training commenced prior to the application of this regulation, in accordance with previous regulation under the regulatory oversight of the CAA or Annex 1 to the Chicago Convention, shall be given full credit provided that the training and testing were completed by 01 January 2023 at the latest and a CAR-FCL licence is issued by 01 January 2024 at the latest.

Article 8 – Conditions for the acceptance of licences from foreign countries (ICAO Member states)

- (a) The CAA may accept foreign licences, ratings or certificates, issued by or on behalf of foreign countries, in accordance with the provisions of Appendix 12 to CAR-FCL.
- (b) Applicants for CAR-FCL licences already holding at least an equivalent licence, rating or certificate issued in accordance with Annex 1 to the Chicago Convention by a foreign country shall comply with all the requirements of CAR-FCL, except that the requirements of course duration, number of lessons and specific training hours may be reduced.

Article 9 – Credit for pilot licences obtained during military service

- (a) In order for holders of Omani military flight crew licenses to obtain CAR-FCL licenses, they shall apply to the CAA.
- (b) The knowledge, experience and skill gained in military service shall be given credit for the purposes of the relevant requirements of CAR-FCL in accordance with the elements of a credit report established by the CAA.

- (c) The credit report shall:
- (1) describe the national military requirements on the basis of which the military licenses, ratings, certificates, authorizations and/or qualifications were issued;
 - (2) describe the scope of the privileges that were given to the pilots;
 - (3) indicate for which requirements of CAR-FCL credit is to be given;
 - (4) indicate any limitations that need to be included on the CAR-FCL licenses and indicate any requirements pilots have to comply with to remove those limitations;
 - (5) include copies of all documents necessary to demonstrate the elements above, accompanied by copies of the relevant national military requirements and procedures

Article 10 – Pilot training organisations

Pilot training organisations shall ensure that the IR training course they offer include training for PBN privileges compliant with the requirements of CAR- FCL by 01 January 2024 at the latest.

Article 11 – Repeals

The below list of regulation(s) shall be repealed from the time this regulation enters into force:

- CAR-FCL 1
- CAR-FCL 2
- CAN 4-01
- CAN 4-04
- CAN 4-06
- Any other requirements in the current Regulations that are contrary to this regulation.

Article 12 – Entry into Force

- (a) This Regulation shall first enter into force on 01 January 2023.
- (b) This Regulation shall be binding in its entirety and directly applicable in all related parties.
- (c) Amendments to this Regulation shall enter into force in accordance with the following schedule of dates, unless otherwise specified in article 13 of this Regulation:
 - (1) New or amended requirements by the Revision 1 to this Regulation shall be applicable from 10 October 2023.
 - (2) New or amended requirements by the Revision 2 to this Regulation shall be applicable from 01 September 2024.
 - (3) new or amended requirements by the Revision 3 to this Regulation shall be applicable from 01 September 2026.

Article 13 – Transitional measures and periods

- (a) Transitional measures and period for the first issue (Revision 0) of this Regulation are those specified in articles (4), (5), (6) and (10) to this Regulation.
- (b) Transitional measures for the Revision 3 to this Regulation are specified in paragraphs (1) to (3) below:

- (1) Transitional measures for single-engine instrument rating privileges for helicopters:

Without prejudice to point FCL.630.H, all of the following shall apply:

- (i) instrument ratings for helicopters (IR(H)) issued in accordance with CAR-FCL before 01 September 2026 shall be deemed as IR(H) for both single-engine and multi-engine helicopters and shall be reissued as such IR(H), when reissuing a helicopter pilot licence for administrative reasons.
 - (ii) Applicants who before 01 September 2026 commenced training for an IR(H) for either single-engine or multi-engine helicopters shall be allowed to complete that training and, in such a case, be issued with an IR(H) for both single-engine and multi-engine helicopters.
 - (2) Transitional measures for training, testing and checking related to multi-pilot operations in single-pilot helicopters:
 - (i) CAA may decide to issue specific privileges for conducting training, skill tests and proficiency checks in multi-pilot operation in single-pilot helicopters to applicants who meet all of the following conditions:
 - (A) hold an instructor or examiner certificate, as applicable, issued in accordance with CAR-FCL, including the privileges to instruct or to examine, as applicable, in the relevant type of helicopter;
 - (B) have completed the training specified in point FCL.735.H;
 - (C) have experience in multi-pilot operation in helicopters at a level that is acceptable to the CAA.
 - (ii) The privileges issued in accordance with paragraph (i) shall be valid until 01 September 2029 in order to revalidate the privileges, applicants shall comply with the experience requirements for instructor and examiner privileges related to multi-pilot operation in single-pilot helicopters as set out in CAR-FCL.
 - (3) Pilot training organisations that provide training for the IR(H) shall adapt their training programme to be compliant with this Regulation by 01 September 2027.

Article 14 – Type ratings for VCA

- (a) Applicants that hold a commercial pilot licence for aeroplanes (CPL(A)) or helicopters (CPL(H)) in accordance with this Regulation shall be entitled to be issued with a type rating for a VCA and shall exercise the privileges of such a type rating, provided they comply with all the following:
 - (1) the prerequisites specified in the operational suitability data (OSD);

- (2) Section 1 of Subpart H of this Regulation;
- (3) the provisions of this Article.
- (b) The theoretical knowledge examination shall be written, and the number of multiple-choice questions shall depend on the complexity of the aircraft.
- (c) Type rating training, skill tests and proficiency checks for aircraft specified in paragraph (a) shall:
 - (1) comply with the following requirements of Appendix 9 to this Regulation;
 - (i) Section A;
 - (ii) Sections B, C or D, as determined and unless otherwise specified in the OSD; and
 - (2) under the conditions and to the extent specified in the OSD, include additional training and testing to allow applicants to obtain the competence to operate the relevant VCA.
- (d) By way of derogation from the paragraphs above, applicants that hold a CPL(A) or a CPL(H) and that were involved in test flights for a particular type of VCA shall be issued with a type rating for that aircraft, provided they comply with all the following:
 - (1) they comply with the flight conditions for acting as test pilot in the relevant VCA type;
 - (2) they have completed either 50 hours of total flight time or 10 hours of flight time as pilot-in-command on test flights in the relevant VCA type;
 - (3) they comply with the prerequisites referred to in OSD.
- (e) The validity period of type ratings issued in accordance with this Article shall be 1 year. Holders shall do all the following:
 - (1) in order to revalidate the type rating:
 - (i) within the validity period of the rating, complete at least 2 hours of flight time as pilot of the relevant VCA type;
 - (ii) within the 3 months immediately preceding the expiry date of the rating and in the relevant VCA type or an FSTD representing that aircraft, pass a proficiency check in accordance with paragraph (c), the duration of which may be counted towards the flight time specified in paragraph (1)(i). If applicants choose to pass the proficiency check earlier than within these 3 months, the new validity period shall commence from the date of the proficiency check;
 - (2) in order to renew the type rating, comply with point FCL.740(b).
- (f) Holders of a licence and a type rating as specified in paragraph (a) shall be entitled to operate the relevant VCA under instrument flight rules, provided they comply with all the following:
 - (1) they hold an IR(A) or an IR(H), as applicable;
 - (2) they have, in the relevant VCA type, completed the skill test or the proficiency check, as applicable, in accordance with paragraph (c) including the content relevant for instrument flight.
- (g) Notwithstanding point FCL.900(b), applicants that hold an instructor certificate in accordance with CAR-FCL with privileges to provide training for aeroplane or helicopter type ratings shall be

issued with privileges to provide training for type ratings specified in paragraph (a), provided they:

- (1) hold a type rating as per paragraph (a) for the relevant VCA type;
- (2) unless otherwise specified in the OSD, have, within the 12 months preceding the application, completed at least 30 route sectors, including take-offs and landings, as pilot-in-command in the relevant VCA type, of which 15 route sectors may be completed in an FSTD representing that VCA type;
- (3) have completed, at an ATO, theoretical and practical training for extending instructor privileges to that VCA type, including mandatory training elements as specified in the OSD;
- (4) pass the relevant sections of the assessment of competence in accordance with point FCL.935.

By way of derogation from paragraphs (2), (3) and (4), applicants that hold a TRI(A) certificate or a TRI(H) certificate and that were issued with a type rating for a VCA in accordance with paragraph (d), shall receive an extension of their TRI privileges to that VCA type.

- (h) Holders of instructor privileges referred to in paragraph (g) shall receive revalidation or renewal, as applicable, of these privileges when they comply with the relevant revalidation or renewal requirements of Subpart J of this Regulation, as applicable for the instructor certificate held, and additionally do either of the following:
 - (1) complete, at an ATO, instructor refresher training that focuses on the privileges as per paragraph (g);
 - (2) pass the relevant sections of the assessment of competence in accordance with point FCL.935 in the relevant VCA type specified in paragraph (a) or an FSTD representing that type.
- (i) Notwithstanding point FCL.1000(b), applicants that hold an examiner certificate in accordance with this Regulation with privileges to act as an examiner for aeroplane or helicopter type ratings shall be issued with privileges to conduct skill tests and proficiency checks for an VCA type specified in paragraph (a), provided they hold instructor privileges as per paragraph (g) for the relevant VCA type and comply with all the following in the relevant VCA type or an FSTD representing that type:
 - (1) complete examiner standardisation in accordance with point FCL.1015, including the conduct of at least one skill test or proficiency check;
 - (2) pass the relevant sections of the assessment of competence in accordance with point FCL.1020.
- (j) Holders of examiner privileges referred to in paragraph (i) shall receive revalidation or renewal, as applicable, of these privileges when they comply with the relevant parts of point FCL.1025 and additionally do either of the following:
 - (1) complete an examiner refresher course in accordance with point FCL.1025(b)(2) that focuses on the privileges as per paragraph (i);
 - (2) pass the relevant sections of the assessment of competence in accordance with point FCL.1020 in the relevant VCA type or an FSTD representing that type.’;

Flight Crew Licensing

SUBPART A

GENERAL REQUIREMENTS**FCL.001 Competent authority**

For the purpose of this Regulation, the competent authority shall be the Civil Aviation Authority of Oman to whom a person applies for the issue of pilot licences or associated ratings or certificates.

FCL.005 Scope

This regulation establishes the requirements for the issue of pilot licences and associated ratings and certificates and the conditions of their validity and use.

FCL.010 Definitions

For the purposes of this CAR-FCL, the following definitions shall apply:

‘Accessible’ means that a device can be used by:

- the approved training organisation (ATO) under whose approval a training course for a class or type rating is being conducted; or
- the examiner conducting the assessment of competence, skill test or proficiency check for the purpose of assessing, testing or checking.

‘Aerobatic flight’ means an intentional manoeuvre involving an abrupt change in an aircraft's attitude, an abnormal attitude, or abnormal acceleration, not necessary for normal flight or for instruction for licences, certificates, or ratings other than the aerobatic rating.

‘Aeroplane’ means an engine-driven fixed-wing aircraft heavier than air which is supported in-flight by the dynamic reaction of the air against its wings.

‘Aeroplane required to be operated with a co-pilot’ means a type of aeroplane which is required to be operated with a co-pilot as specified in the flight manual or by the air operator certificate.

‘Aeroplane upset prevention and recovery training’ (UPRT) means training consisting of:

- aeroplane upset prevention training: a combination of theoretical knowledge and flying training with the aim of providing flight crew with the required competencies to prevent aeroplane upsets; and
- aeroplane upset recovery training: a combination of theoretical knowledge and flying training with the aim of providing flight crew with the required competencies to recover from aeroplane upsets.

‘Aircraft’ means any machine which can derive support in the atmosphere from the reactions of the air other than the reactions of the air against the earth's surface.

‘Airmanship’ means the consistent use of good judgement and well-developed knowledge, skills and attitudes to accomplish flight objectives.

‘Airship’ means a power-driven lighter-than-air aircraft, with the exception of hot-air airships, which are considered to be balloons.

‘Available FSTD’ means any flight simulation training device (FSTD) that is vacant for use of the FSTD operator or of the customer irrespective of any time considerations.

‘Angular operation’ means an instrument approach operation in which the maximum tolerable error/deviation from the planned track is expressed in terms of deflection of the needles on the Course Deviation Indicator (CDI) or equivalent display in the cockpit.

‘Assessment of competence’ means the demonstration of skills, knowledge and attitude for the initial issue, revalidation or renewal of an instructor or examiner certificate.

‘Balloon’ means a lighter-than-air aircraft which is not engine-driven and sustains flight through the use of either gas or an airborne heater. For the purposes of this regulation, a hot-air airship, although engine-driven, is also considered a balloon.

‘Category of aircraft’ means a categorisation of aircraft according to specified basic characteristics, for example aeroplane, powered-lift, helicopter, airship, sailplane, free balloon.

‘Class of aeroplane’ means a categorisation of single-pilot aeroplanes not requiring a type rating.

‘Commercial air transport’ means the transport of passengers, cargo or mail for remuneration or hire.

‘Competency’ means a combination of skills, knowledge and attitude required to perform a task to the prescribed standard.

‘Competency element’ means an action which constitutes a task that has a triggering event and a terminating event that clearly defines its limits, and an observable outcome.

‘Competency unit’ means a discrete function consisting of a number of competency elements.

‘Co-pilot’ means a pilot operating other than as pilot-in-command, on an aircraft for which more than one pilot is required, but excluding a pilot who is on board the aircraft for the sole purpose of receiving flight instruction for a licence or rating.

‘Cross-country’ means a flight between a point of departure and a point of arrival following a pre-planned route, using standard navigation procedures.

‘Cruise relief co-pilot’ means a pilot who relieves the co-pilot of his/her duties at the controls during the cruise phase of a flight in multi-pilot operations above FL 200.

‘Dual instruction time’ means flight time or instrument ground time during which a person is receiving flight instruction from a properly authorised instructor.

‘EBT practical assessment’ means a method for assessing performance that serves to verify the integrated performance of competencies. It takes place in either a simulated or an operational environment.

‘EBT programme’ means a pilot assessment and training programme in accordance with CAR-OPS.

‘En-route IFR flight’ means the phase of an IFR flight that commences after the completion of an IFR departure procedure and finishes when commencing an IFR approach procedure.

‘Error’ means an action or inaction taken by the flight crew which leads to deviations from organisational or flight intentions or expectations.

‘Error management’ means the process of detecting and responding to errors with countermeasures which reduce or eliminate the consequences of errors, and mitigate the probability of errors or undesired aircraft states.

‘Evidence based training (EBT) operator’ means an organisation that is holding an air operator certificate (AOC) in accordance CAR-OPS and that has implemented an EBT programme approved by the CAA, in accordance with the provisions of that Regulation.

‘Full Flight Simulator’ (FFS) means a full-size replica of a specific type or make, model and series aircraft flight deck, including the assemblage of all equipment and computer programmes necessary to represent the aircraft in ground and flight operations, a visual system providing an out-of-the-flight deck view, and a force cueing motion system.

‘Flight time’

for aeroplanes, touring motor gliders and powered-lift aircraft, it means the total time from the moment an aircraft first moves for the purpose of taking off until the moment it finally comes to rest at the end of the flight;

for helicopters, it means the total time from the moment a helicopter’s rotor blades start turning until the moment the helicopter finally comes to rest at the end of the flight, and the rotor blades are stopped;

for airships, it means the total time from the moment an airship is released from the mast for the purpose of taking off until the moment the airship finally comes to rest at the end of the flight, and is secured on the mast;

for VTOL-capable aircraft (VCA), it means the total time between the moment the lift and thrust units are powered on for the purpose of taking off until the moment the aircraft finally comes to rest at the end of the flight and the lift and thrust units are powered off.

‘Flight time under Instrument Flight Rules’ (IFR) means all flight time during which the aircraft is being operated under the Instrument Flight Rules.

‘Flight Training Device’ (FTD) means a full-size replica of a specific aircraft type’s instruments, equipment, panels and controls in an open flight deck area or an enclosed aircraft flight deck, including the assemblage of equipment and computer software programmes necessary to represent the aircraft in ground and flight conditions to the extent of the systems installed in the device. It does not require a force cueing motion or visual system, except in the case of helicopter FTD levels 2 and 3, where visual systems are required.

‘Flight and Navigation Procedures Trainer’ (FNPT) means a training device which represents the flight deck or cockpit environment, including the assemblage of equipment and computer programmes necessary to represent an aircraft type or class in-flight operations to the extent that the systems appear to function as in an aircraft.

‘Flown solely by reference to instruments’ means that the pilots fly the aircraft without any external visual references, in simulated or actual instrument meteorological conditions (IMC).

‘Group of balloons’ means a categorisation of balloons, taking into account the size or capacity of the envelope.

‘Gyroplane’ means a type of rotorcraft supported in flight by the reactions of the air on up to two rotors, which rotate freely on substantially vertical axes.

‘Helicopter’ means a type of rotorcraft supported in-flight chiefly by the reactions of the air on up to two power-driven rotors on substantially vertical axes.

‘Instrument flight time’ means the time during which a pilot is controlling an aircraft in-flight solely by reference to instruments.

‘Instrument ground time’ means the time during which a pilot is receiving instruction in simulated instrument flight, in-flight simulation training devices (FSTD).

‘Instrument time’ means instrument flight time or instrument ground time.

‘Limited panel instrument flight’ means attitude interpretation by reference to standby instruments interpretation after the loss of main attitude and heading reference system.

‘Linear operation’ means an instrument approach operation in which the maximum tolerable error/deviation from the planned track is expressed in units of length, for instance nautical miles, for cross-track lateral deviation.

‘Line flying under supervision’ (LIFUS) means line flying after an approved zero flight time type rating training course or the line flying required by an operational suitability data (OSD) report.

‘LNAV’ means Lateral Navigation.

‘LPV’ means Localiser Performance with Vertical Guidance.

‘Mixed EBT programme’ means an operator’s recurrent training and checking programme as provided for relevant requirements of CAR-OPS, a portion of which is dedicated to the application of EBT but which does not replace proficiency checks provided for in Appendix 9 to this Regulation.

‘Multi-pilot operation’ means an operation requiring at least two (2) pilots using multi-crew cooperation in either a multi-pilot or a single-pilot aircraft.

‘Multi-crew cooperation’ (MCC) means the functioning of the flight crew as a team of cooperating members led by the pilot-in-command.

‘Multi-pilot aircraft’:

for aeroplanes, it means aeroplanes certificated for operation with a minimum crew of at least two pilots;

for helicopters, airships and powered-lift aircraft, it means an aircraft which is certificated for operation with a minimum crew of at least two pilots or which is required to be operated with at least two pilots in accordance with the relevant CAR-OPS requirements.

‘Night’ means the period between the end of evening civil twilight and the beginning of morning civil twilight or such other period between sunset and sunrise as may be prescribed by the appropriate authority.

‘OSD’ means the operational suitability data as established for the applicable type.

‘Other training devices’ (OTD) means training aids other than FSTDs which provide means for training where a complete flight deck environment is not necessary.

‘Performance-Based Navigation (PBN)’ means area navigation based on performance requirements for aircraft operating along an ATS route, on an instrument approach procedure or in a designated airspace.

‘Performance criteria’ means a simple, evaluative statement on the required outcome of the competency element and a description of the criteria used to judge if the required level of performance has been achieved.

‘Pilot-in-command’ (PIC) means the pilot designated as being in command and charged with the safe conduct of the flight.

‘Pilot-in-command under supervision’ (PICUS) means a co-pilot performing, under the supervision of the pilot-in-command, the duties and functions of a pilot-in-command.

‘Powered-lift aircraft’ means any aircraft deriving vertical lift and in-flight propulsion/lift from variable geometry rotors or engines/propulsive devices attached to or contained within the fuselage or wings.

‘Powered sailplane’ means a sailplane equipped with one or more engines that has, with engines inoperative, the characteristics of a sailplane.

‘Private pilot’ means a pilot who holds a licence which prohibits the piloting of aircraft in operations for which remuneration is given, with the exclusion of instruction or examination activities, as established in this regulation.

‘Proficiency check’ means the demonstration of skill to revalidate or renew ratings or privileges, and including such oral examination as may be required.

‘Renewal’ (of, e.g. a rating or certificate) means the administrative action taken after a rating or certificate has lapsed for the purpose of renewing the privileges of the rating or certificate for a further specified period consequent upon the fulfilment of specified requirements.

‘Revalidation’ (of, e.g. a rating or certificate) means the administrative action taken within the period of validity of a rating or certificate which allows the holder to continue to exercise the privileges of a rating or certificate for a further specified period consequent upon the fulfilment of specified requirements.

‘RNP APCH’ means a PBN specification used for instrument approach operations.

‘RNP APCH operation down to LNAV minima’ means a 2D instrument approach operation for which the lateral guidance is based on GNSS positioning.

‘RNP APCH operation down to LNAV/VNAV minima’ means a 3D instrument approach operation for which the lateral guidance is based on GNSS positioning and the vertical guidance is provided either by the Baro VNAV function or by the GNSS positioning including SBAS.

‘RNP APCH operation down to LPV minima’ means a 3D instrument approach operation for which both lateral and vertical guidance are based on GNSS positioning including SBAS.

‘RNP AR APCH’ means a navigation specification used for instrument approach operations requiring a specific approval.

‘Route sector’ means a flight comprising take-off, departure, cruise of not less than 15 minutes, arrival, approach and landing phases.

‘Sailplane’ means a heavier-than-air aircraft which is supported in-flight by the dynamic reaction of the air against its fixed lifting surfaces, the free flight of which does not depend on an engine.

‘Single-pilot aircraft’:

for aeroplanes, it means an aircraft certificated for operation by one pilot;

for helicopters, airships and powered lift aircraft, it means an aircraft which is certificated for operation by one pilot and which is not required to be operated with at least two pilots by the relevant CAR-OPS requirements.

‘Skill test’ means the demonstration of skill for a licence or rating issue, including such oral examination as may be required.

‘Solo flight time’ means flight time during which a student pilot is the sole occupant of an aircraft.

‘Student pilot-in-command’ (SPIC) means a student pilot acting as pilot-in-command on a flight with an instructor where the latter will only observe the student pilot and shall not influence or control the flight of the aircraft.

‘Threat’ means events or errors which occur beyond the influence of the flight crew, increase operational complexity and which must be managed to maintain the margin of safety.

‘Threat management’ means the process of detecting and responding to the threats with countermeasures which reduce or eliminate the consequences of threats, and mitigate the probability of errors or undesired aircraft states.

‘Three-dimensional (3D) instrument approach operation’ means an instrument approach operation using both lateral and vertical navigation guidance.

‘Touring motor glider (TMG)’ means, a specific class of powered sailplanes that has an integrally mounted, non-retractable engine and a non-retractable propeller. It shall be capable of taking off and climbing under its engine power according to its flight manual.

‘Two-dimensional (2D) instrument approach operation’ means an instrument approach operation using lateral navigation guidance only.

‘Type of aircraft’ means a categorisation of aircraft requiring a type rating as determined either in the operational suitability data or by any other means in accordance with CAR-21, and which include all aircraft of the same basic design including all modifications thereto except those which result in a change in handling or flight characteristics.

‘Type rating and licence endorsement list’ means a list recognized or accepted by CAA, containing classes of aeroplanes and types of aircraft for the purpose of flight crew licensing.

‘VNAV’ means Vertical Navigation.

FCL.015 Application and issue, revalidation and renewal of licences, ratings and certificates

- (a) An application for the issue, revalidation or renewal of pilot licences and associated ratings and certificates as well as any amendment thereto shall be submitted to the CAA in a form and manner established by the CAA. The application shall be accompanied by evidence that applicants comply with the requirements for the issue, revalidation or renewal of the licence or certificate as well as associated ratings or endorsements established in this regulation and CAR-FCL3.
- (b) Unless otherwise specified in this regulation, any limitation or extension of the privileges granted by a licence, rating or certificate shall be endorsed in the licence or certificate by the CAA.
- (c) A person shall not hold at any time more than one licence per category of aircraft issued in accordance with this regulation.
- (d) A licence holder shall submit applications in accordance with paragraph (a) to the CAA.
- (e) The Flight Crew Licence will be issued for period of (5) years.
- (f) For the issue of a licence, rating or certificate the applicant shall apply not later than 6 months after having succeeded at the skill test or assessment of competence.
- (g) Training completed in aircraft or in FSTDs in accordance with CAR-OPS shall be taken into account for the experience and revalidation requirements established in this Regulation.

FCL.020 Student pilot

- (a) A student pilot shall not fly solo unless he or she meets the following conditions:
 - (1) is authorised to do so and supervised by a flight instructor;
 - (2) prior to receiving the authorisation specified in point (1), has acquired the competence to safely operate the relevant aircraft during the intended solo flight.
- (b) Before his or her first solo flight, a student pilot shall be at least 16 years of age.

FCL.025 Theoretical knowledge examinations for the issue of licences and ratings

(a) Responsibilities of the applicant

- (1) Applicants shall take the entire set of theoretical knowledge examinations for a specific licence or rating under the responsibility of the CAA.
- (2) Applicants shall only take the theoretical knowledge examination when recommended by the approved training organisation (ATO) responsible for their training, once they have completed the appropriate elements of the training course of theoretical knowledge instruction to a satisfactory standard.
- (3) The recommendation by an ATO shall be valid for 12 months. If the applicant has failed to attempt at least one theoretical knowledge examination paper within this period of validity, the need for further training shall be determined by the ATO, based on the needs of the applicant.

(b) Pass standards

- (1) A pass in a theoretical knowledge examination paper will be awarded to an applicant achieving at least 75 % of the marks allocated to that paper. No penalty marking shall be applied.
- (2) Unless otherwise determined in this regulation, an applicant has successfully completed the required theoretical knowledge examination for the appropriate pilot licence or rating if he or she has passed all the required theoretical knowledge examination papers within a period of 18 months counted from the end of the calendar month when the applicant first attempted an examination.
- (3) If applicants for the ATPL theoretical knowledge examination, or for the issue of a commercial pilot licence (CPL), or an instrument rating (IR) have failed to pass one of the theoretical knowledge examination papers within four attempts, or have failed to pass all papers within either six sittings or within the period mentioned in point (b)(2), they shall retake the complete set of theoretical knowledge examination papers.
- (4) If applicants for the issue of a light aircraft pilot licence (LAPL), a private pilot licence (PPL), a basic instrument rating (BIR) or a gyroplane pilot licence (GPL) have failed to pass one of the theoretical knowledge examination papers within four attempts or have failed to pass all papers within the period mentioned in point (b)(2), they shall retake the complete set of theoretical knowledge examination papers.
- (5) Before retaking the complete set of theoretical knowledge examination papers, applicants shall undertake further training at an ATO. The extent and scope of the training needed shall be determined by the ATO, based on the needs of the applicants.

(c) Validity period

- (1) The successful completion of the theoretical knowledge examinations will be valid:
 - (i) for the issue of a light aircraft pilot licence, a private pilot licence or a gyroplane pilot licence, for a period of 24 months;
 - (ii) for the issue of a commercial pilot licence, a multi-crew pilot licence or an instrument rating (IR), for a period of 36 months;
 - (iii) for the issue of a basic instrument rating (BIR), for an unlimited duration.

The periods in paragraphs (i) and (ii) shall be counted from the day on which the pilots have successfully completed the theoretical knowledge examination, in accordance with paragraph (b)(2).

- (2) The completion of the airline transport pilot licence (ATPL) theoretical knowledge examinations will remain valid for the issue of an ATPL for a period of 7 years from the last validity date of:
 - (i) an IR entered in the licence; or
 - (ii) in the case of helicopters, a helicopter's type rating entered in that licence.

FCL.030 Practical skill test

- (a) Before a skill test for the issue of a licence, rating or certificate is taken, the applicant shall have passed the required theoretical knowledge examination, except in the case of applicants undergoing a course of integrated flying training.
- (b) In any case, the theoretical knowledge instruction shall always have been completed before the skill tests are taken.
- (c) Except for the issue of an airline transport pilot licence, the applicant for a skill test shall be recommended for the test by the organisation/person responsible for the training, once the training is completed. The training records shall be made available to the examiner.
- (d) For the issue of a BIR, the applicant for a skill test must first complete all training modules and be recommended for the skill test by an ATO. His or her training records shall be made available to the examiner, by the ATO.

FCL.035 Crediting of flight time and theoretical knowledge

(a) Crediting of flight time

- (1) Unless otherwise specified in this Regulation, flight time to be credited for a licence, rating or certificate shall have been flown in the same category of aircraft for which the licence, rating or certificate is sought.
- (2) PIC or under instruction.
 - (i) An applicant for a licence, rating or certificate shall be credited in full with all solo, dual instruction or PIC flight time towards the total flight time required for the licence, rating or certificate.
 - (ii) A graduate of an ATP integrated training course is entitled to be credited with up to 50 hours of student pilot-in-command instrument time towards the PIC time required for the issue of the airline transport pilot licence, commercial pilot licence and a multi-engine type or class rating.
 - (iii) A graduate of a CPL/IR integrated training course is entitled to be credited with up to 50 hours of the student pilot-in-command instrument time towards the PIC time required for the issue of the commercial pilot licence and a multi-engine type or class rating.
- (3) Flight time as co-pilot or PICUS. Unless otherwise determined in this Regulation, the holder of a pilot licence, when acting as co-pilot or PICUS, is entitled to be credited with all of the co-pilot time towards the total flight time required for a higher grade of pilot licence.
- (4) All hours flown in the manned, :
 - aeroplanes (or TMGs), which have no more than two seats, measurable stall speed or minimum steady flight speed in landing configuration not exceeding 45 knots calibrated air speed and a maximum take-off mass (MTOM) of no more than 600 kg for aeroplanes not intended to be operated on water or 650 kg for aeroplanes intended to be operated on water;

- sailplanes and powered sailplanes, which have no more than two seats and a MTOM of no more than 600 kg

shall be credited in full towards fulfilling the flight time requirements of point FCL.140.A(a)(1) and point FCL.740.A(b)(1)(ii), provided that the following conditions are met:

- (i) the aeroplane, TMG or sailplane, concerned is of the same category and class as the CAR-FCL aircraft in respect of which the hours flown are to be credited;
 - (ii) in case of training flights with an instructor, the aeroplane, TMG or sailplane, used is subject to an authorisation specified in point ORA.ATO.135 of CAR-ORA.
- (5) All hours flown in single and two-seater gyroplanes which have a MTOM of at least 450 kg and not exceeding 600 kg, shall be credited in full towards completing the 12 hours of flight time and 12 take-offs and landings in accordance with point FCL.240.G(a) but shall not be credited towards the requirement in point FCL.240.G(a)(1)(ii).

(b) Crediting of theoretical knowledge

- (1) Applicants that have passed the theoretical knowledge examination for an airline transport pilot licence shall be credited towards the requirements for the theoretical knowledge for the light aircraft pilot licence, the private pilot licence, the commercial pilot licence and, except in the case of helicopters, the IR and the BIR in the same category of aircraft.
- (2) Applicants that have passed the theoretical knowledge examination for a commercial pilot licence shall be credited towards the requirements for the theoretical knowledge for:
 - (i) the light aircraft pilot licence in the same category of aircraft;
 - (ii) the private pilot licence in the same category of aircraft; and
 - (iii) the subject 'communications' for the BIR. This credit shall include the IFR part of the subject 'communications' only if that subject was completed in accordance with point FCL.310.
- (3) Holders of an IR or applicants that have passed the IR theoretical knowledge examination for a category of aircraft shall be credited towards the requirements for the theoretical knowledge instruction and examination for:
 - (i) the IR in another category of aircraft; and
 - (ii) the BIR.
- (4) Holders of a pilot licence shall be credited towards the requirements for theoretical knowledge instruction and examination for a licence in another category of aircraft in accordance with Appendix 1 to this regulation. This credit also applies to applicants for a pilot licence who have already successfully completed the theoretical knowledge examinations for the issue of that licence in another category of aircraft, as long as the theoretical knowledge examination is within the validity period specified in point FCL.025(c).
- (5) By way of derogation from paragraph (b)(3), holders of an IR(A) who have completed a competency-based modular IR(A) course shall be fully credited towards the requirements for theoretical knowledge instruction and examination for an IR in another category of aircraft only if they have also passed the theoretical knowledge instruction and examination

for the IFR part of the course required in accordance with point FCL.720.A.(a)(2)(ii)(A).

- (6) When Appendix 1 includes a credit for the subject Communications, all of the following shall apply:
- (i) such credit shall only be granted for training and examination for that subject if applicants, during previous theoretical knowledge examinations in accordance with CAA examinations requirements, have completed either the subject Communications or both subjects VFR communications and IFR communications;
 - (ii) applicants who have completed either only the subject VFR communications or only the subject IFR communications shall complete theoretical knowledge instruction in the subject Communications, the duration of which may be reduced based on an assessment of the applicants by the ATO. For applicants who have completed the subject VFR communications, aspects purely related to VFR communication may be reduced. For applicants who have completed the subject IFR communications, aspects purely related to IFR communication may be reduced. In any case, applicants shall complete the theoretical knowledge examination in the subject Communications.

FCL.040 Exercise of the privileges of licences

The exercise of the privileges granted by a licence shall be dependent upon the validity of the ratings contained therein, if applicable, and of the medical certificate as appropriate to the privileges exercised.

FCL.045 Obligation to carry and present documents

- (a) A valid licence and a valid medical certificate shall always be carried by the pilot when exercising the privileges of the licence.
- (b) The pilot shall also carry a personal identification document containing his/her photo.
- (c) A pilot or a student pilot shall without undue delay present his/her flight time record for inspection upon request by an authorised representative of an authority.
- (d) A student pilot shall carry on all solo cross-country flights evidence of the authorisation required by FCL.020(a)(1).

FCL.050 Recording of flight time

The pilot shall keep a reliable record of the details of all flights flown in a form and manner established by the CAA.

FCL.055 Language proficiency

- (a) General. Aeroplane, helicopter, powered-lift aircraft, airship and gyroplane pilots required to use the radio telephone shall not exercise the privileges of their licences and ratings unless they have a valid language proficiency endorsement on their licence in English. The endorsement shall indicate the language, the proficiency level and the validity date, and it shall be obtained in accordance with a procedure established by the CAA. The minimum acceptable proficiency level is the operational level (Level 4) in accordance with Appendix 2 to this Regulation.

- (b) The applicant for a language proficiency endorsement shall demonstrate, in accordance with Appendix 2 to this Regulation, at least an operational level of language proficiency both in the use of phraseologies and plain language to an assessor certified by the CAA or a language-testing body approved by the CAA. To do so, the applicant shall demonstrate the ability to:
 - (1) communicate effectively in voice-only and in face-to-face situations;
 - (2) communicate on common and work-related topics with accuracy and clarity;
 - (3) use appropriate communicative strategies to exchange messages and to recognise and resolve misunderstandings in a general or work-related context;
 - (4) handle successfully the linguistic challenges presented by a complication or unexpected turn of events which occurs within the context of a routine work situation or communicative task with which they are otherwise familiar; and
 - (5) use a dialect or accent which is intelligible to the aeronautical community.
- (c) Except for pilots who have demonstrated language proficiency at the expert level (level 6) in accordance with Appendix 2 to this Regulation, the language proficiency endorsement shall be re-evaluated every:
 - (1) 3 years, if the level demonstrated is operational level (level 4); or
 - (2) 6 years, if the level demonstrated is extended level (level 5).
- (d) (Reserved).
- (e) The demonstration of language proficiency and the use of the English language shall be done through a method of assessment established by the CAA.

FCL.060 Recent experience

- (a) (Reserved).
- (b) Aeroplanes, helicopters, powered-lift aircraft, airships, VTOL-capable aircraft (VCA) and gyroplanes. A pilot shall not operate an aircraft in commercial air transport or for carrying passengers:
 - (1) as PIC or co-pilot unless he/she has carried out, in the preceding 90 days, at least 3 take-offs, approaches and landings as a pilot flying in an aircraft of the same type or class or an FFS representing that type or class. The 3 take-offs and landings shall be performed in either multi-pilot or single-pilot operations, depending on the privileges held by the pilot; and
 - (2) as PIC at night unless he/she:
 - (i) has carried out in the preceding 90 days at least 1 take-off, approach and landing at night as a pilot flying in an aircraft of the same type or class or an FFS representing that type or class; or
 - (ii) holds an IR;
 - (3) as cruise relief co-pilot unless he or she has completed, within the preceding 90 days, either of the following:
 - (i) at least three (3) sectors as a cruise relief co-pilot in the relevant type;

- (ii) training the content of which is determined by the operator and that comprises at least three (3) sectors as cruise relief co-pilot in an FSTD representing the relevant type;
 - (iii) recurrent training in accordance with the relevant requirements of CAR-OPS;
 - (iv) a proficiency check for cruise relief co-pilots in accordance with Appendix 9.
 - (4) When a pilot has the privilege to operate more than one type of aeroplane with similar handling and operation characteristics, the 3 take-offs, approaches and landings required in (1) may be performed as defined in the operational suitability data.
 - (5) When a pilot has the privilege to operate more than one type of non-complex helicopter with similar handling and operation characteristics, as defined in the operational suitability data, the 3 take-offs, approaches and landings required in (1) may be performed in just one of the types, provided that the pilot has completed at least 2 hours of flight in each of the types of helicopter, during the preceding 6 months.
- (c) Specific requirements for commercial air transport:
- (1) In the case of commercial air transport, the 90-day period prescribed in subparagraphs (b)(1) and (2) above may be extended up to a maximum of 120 days, as long as the pilot undertakes line flying under the supervision of a type rating instructor or examiner.
 - (2) If the pilot does not comply with the requirement in point (1), he or she shall complete a training flight with an instructor qualified in accordance with Subpart J to instruct for that aircraft type. The training flight shall be performed in the aircraft or an FFS of the aircraft type to be used, and shall include at least the requirements described in points (b)(1) and (2) before he or she can exercise his/her privileges.

FCL.065 Curtailment of privileges of licence holders aged 60 years or more in commercial air transport

- (a) Age 60-64. Aeroplanes and helicopters. The holder of a pilot licence who has attained the age of 60 years shall not act as a pilot of an aircraft engaged in commercial air transport except as a member of a multi-pilot crew. By way of derogation, such holders shall be entitled to act as pilots of an aircraft engaged in single-pilot helicopter emergency medical service (HEMS) operations in accordance with CAR-OPS, provided that they comply with the applicable requirements specified for that purpose in that Regulation and the relevant medical requirements in CAR-FCL3.
- (b) Age 65. Holders of a pilot licence who has attained the age of 65 years shall not act as a pilot of an aircraft that is engaged in commercial air transport.

FCL.070 Revocation, suspension and limitation of licences, ratings and certificates

- (a) Licences, ratings and certificates issued in accordance with this regulation may be limited, suspended or revoked by the CAA when the pilot does not comply with the requirements of this regulation, CAR-FCL3 or the applicable operational requirements, in accordance with the conditions and procedures laid down by CAA.
- (b) When the pilot has his/her licence suspended or revoked, he/she shall immediately return the licence or certificate to the CAA.

SUBPART B

*LIGHT AIRCRAFT PILOT LICENCE — LAPL**SECTION 1**Common requirements***FCL.100 LAPL — Minimum age**

Applicants for the LAPL for aeroplanes or helicopters shall be at least 17 years old.

FCL.105 LAPL — Privileges and conditions

- (a) General. The privileges of the holder of an LAPL are to act without remuneration as PIC in non-commercial operations on the appropriate aircraft category.
- (b) Conditions. Applicants for the LAPL shall have fulfilled the requirements for the relevant aircraft category and, when applicable, for the class or type of aircraft used in the skill test.

FCL.110 LAPL — Crediting for the same aircraft category

- (a) Applicants for an LAPL who have held another licence in the same category of aircraft shall be fully credited towards the requirements of the LAPL in that category of aircraft.
- (b) Without prejudice to the paragraph above, if the licence has lapsed, the applicant shall have to pass a skill test in accordance with FCL.125 for the issue of an LAPL in the appropriate aircraft category.

FCL.115 LAPL — Training course

- (a) Applicants for an LAPL shall complete a training course at an ATO. That training course shall include:
 - (1) theoretical knowledge and flight instruction appropriate to the privileges of the LAPL applied for;
 - (2) additionally, for the LAPL(H), the mandatory training elements for the relevant helicopter type as defined in the OSD.
- (b) Theoretical knowledge instruction and flight instruction may be completed at an ATO different from the one where applicants have commenced their training.
- (c) For the training for the SEP aeroplanes-sea class privilege, the elements of Section B (Specific requirements for the aeroplane category), point 7 (Class ratings – sea), of Appendix 9 shall be considered.
- (d) Applicants for an LAPL may receive credits for previous PPL training they have undergone in accordance with Subpart C in the same aircraft category, based on an assessment of the applicant by the ATO that is responsible for the LAPL training course. In any case, applicants shall comply with the experience requirements set out in points FCL.110.A(a) or FCL.110.H(a), as applicable.

FCL.120 LAPL — Theoretical knowledge examination

Applicants for an LAPL shall demonstrate a level of theoretical knowledge appropriate to the privileges granted, through examinations on the following:

- (a) common subjects:
 - Air law,
 - Human performance,
 - Meteorology,
 - Communications, and
 - Navigation.
- (b) specific subjects concerning the different aircraft categories:
 - Principles of flight,
 - Operational procedures,
 - Flight performance and planning, and
 - Aircraft general knowledge.

FCL.125 LAPL — Skill test

- (a) Applicants for an LAPL shall demonstrate through the completion of a skill test the ability to perform, as PIC on the appropriate aircraft category, the relevant procedures and manoeuvres with competency appropriate to the privileges granted.
- (b) Applicants for the skill test shall have received flight instruction on the same class or type of aircraft to be used for the skill test. The privileges will be restricted to the class or type used for the skill test until further extensions are endorsed on the licence, in accordance with this Subpart.
- (c) *Pass marks*
 - (1) The skill test shall be divided into different sections, representing all the different phases of flight appropriate to the category of aircraft flown.
 - (2) Failure in any item of a section will cause the applicant to fail the entire section. If the applicant fails only 1 section, he/she shall repeat only that section. Failure in more than 1 section will cause the applicant to fail the entire test.
 - (3) When the test needs to be repeated in accordance with (2), failure in any section, including those that have been passed on a previous attempt, will cause the applicant to fail the entire test.
 - (4) Failure to achieve a pass in all sections of the test in 2 attempts will require further practical training.

SECTION 2*Specific requirements for the LAPL for aeroplanes — LAPL(A)***FCL.105.A LAPL(A) — Privileges and conditions****(a) Privileges**

The privileges of the holder of an LAPL for aeroplanes are to act as PIC on SEP aeroplanes-land (SEP(land)), SEP aeroplanes-sea (SEP(sea)) or TMG with a maximum certificated take-off mass of 2000 kg or less, carrying a maximum of three (3) passengers, such that there are never more than four (4) persons on board of the aircraft.

(b) Conditions

- (1) Holders of a LAPL(A) shall carry passengers only if they have completed 10 hours of flight time as PIC on aeroplanes or TMG after the issuance of the licence.
- (2) Holders of a LAPL(A) who previously held an ATPL(A), an MPL(A), a CPL(A) or a PPL(A), are exempted from the requirements laid down in point (b)(1).

FCL.110.A LAPL(A) — Experience requirements and crediting**(a) Applicants for an LAPL(A) shall have completed at least 30 hours of flight instruction on aeroplanes or TMGs, including at least:**

- (1) 15 hours of dual flight instruction in the class in which the skill test will be taken;
- (2) 6 hours of supervised solo flight time, including at least 3 hours of solo cross-country flight time with at least 1 cross-country flight of at least 150 km (80 NM), during which 1 full stop landing at an aerodrome different from the aerodrome of departure shall be made.

(b) Specific requirements for applicants who hold an SPL, including privileges to fly TMGs.

Applicants for an LAPL(A) who hold an SPL with the privileges to fly TMGs shall have completed at least 21 hours of flight time on TMGs after the endorsement of the TMG privileges and shall comply with the requirements of point FCL.135.A(a) on aeroplanes.

(c) Crediting.

Applicants with prior experience as PIC may be credited towards the requirements of point (a) under the following conditions:

- (1) The amount of credit shall be decided by the ATO where the pilot undergoes the training course, on the basis of a pre-entry flight assessment, but shall in any case:
 - (i) not exceed the total flight time as PIC;
 - (ii) not exceed 50 % of the hours required in point (a);
 - (iii) not include the requirements of point (a)(2);
- (2) (reserved).

FCL.135.A LAPL(A) — Extension of privileges to another class or variant of aeroplane

- (a) Applicants for an LAPL(A) shall be issued with privileges for the class of aeroplanes or TMGs in which the skill test was taken. In order to extend their privileges to another class, holders of an LAPL(A) shall complete, in that other class, all of the following:
- (1) 3 hours of flight instruction, including the following:
 - (i) 10 dual take-offs and landings;
 - (ii) 10 supervised solo take-offs and landings.
 - (2) a skill test to demonstrate an adequate level of practical skill in the new class. During that skill test, the applicant shall also demonstrate to the examiner an adequate level of theoretical knowledge for the other class in the following subjects:
 - (i) Operational procedures;
 - (ii) Flight performance and planning;
 - (iii) Aircraft general knowledge.
- (b) In order to extend the privileges to another variant within a class, the pilot shall either undergo differences training or do a familiarisation. The differences training shall be entered in the pilot's logbook or in an equivalent record and be signed by the instructor. When extending the privileges for an SEP aeroplane class to a variant with another type of engine referred to in Article 2, "SEP aeroplane", the differences training shall consist of dual flight instruction and theoretical knowledge instruction which shall include, with regard to that other type of engine and related aircraft systems, at least all of the following subjects:
- (1) Operational procedures;
 - (2) Flight performance and planning;
 - (3) Aircraft general knowledge.
- (c) Applicants for the extension of privileges of the LAPL(A) to TMG who also hold an SPL in accordance with this regulation, including the privileges to fly on TMGs, shall receive full credits towards the requirements in paragraph (a).

FCL.140.A LAPL(A) — Recency requirements

- (a) Holders of a LAPL(A) shall exercise the privileges of their licence only if in the last 2 years they have met any of the following conditions as pilots of aeroplanes or TMGs:
- (1) they have completed at least 12 hours of flight time as PIC or flying dual or solo under the supervision of an instructor, including:
 - (i) 12 take-offs and landings;
 - (ii) refresher training of at least 1 hour of total flight time with and to the satisfaction of an instructor who shall select those flight exercises that allow the applicant to refresh their competence in safely operating the aircraft and applying normal, abnormal and emergency procedures;

- (2) they have passed a LAPL(A) proficiency check with an examiner. The proficiency check programme shall be based on the skill test for the LAPL(A);
- (b) If holders of a LAPL(A) hold both a SEP(land) and a SEP(sea) privilege, they may comply with the requirements in point (a)(1) in either class or a combination thereof, which shall be valid for both privileges. For this purpose, at least 1 hour of the required flight time and 6 out of the required 12 take-offs and landings shall be completed in each class.
- (c) Holders of an LAPL(A) with privileges for SEP aeroplanes who, in accordance with point FCL.135.A(b), have extended their privileges to a variant with a different type of engine referred to in Article 2, “SEP aeroplane”, if they have not flown that variant within the preceding 2 years, shall complete any of the following in that variant, before exercising their privileges in that variant:
 - (1) further differences training in accordance with point FCL.135.A(b);
 - (2) a proficiency check;
 - (3) refresher training in accordance with point FCL.140.A(a)(1)(ii).
- (d) The dual flights, flights under supervision referred to in the introductory phrase of point (a)(1), the refresher training referred to in point (a)(1)(ii) and point (c)(3) and the proficiency check referred to in point (a)(2) and point (c)(2) shall be entered in the pilot’s logbook or equivalent record and shall be signed by the instructor or examiner, as applicable.

SECTION 3*Specific requirements for the LAPL for helicopters — LAPL(H)***FCL.105.H LAPL(H) — Privileges**

The privileges of the holder of an LAPL for helicopters are to act as PIC on single-engine helicopters with a maximum certificated take-off mass of 2 000 kg or less, carrying a maximum of 3 passengers, such that there are never more than 4 persons on board.

FCL.110.H LAPL(H) — Experience requirements and crediting

- (a) Applicants for the LAPL(H) shall have completed 40 hours of flight instruction on helicopters. At least 35 hours of which shall be flown on the type of helicopter that is to be used for the skill test. The flight instruction shall include at least:
 - (1) 20 hours of dual flight instruction; and
 - (2) 10 hours of supervised solo flight time, including at least 5 hours of solo cross-country flight time with at least 1 cross-country flight of at least 150 km (80 NM), during which one full stop landing at an aerodrome different from the aerodrome of departure shall be made.
- (b) Crediting. Applicants with prior experience as PIC may be credited towards the requirements of point (a) under the following conditions:
 - (1) The amount of credit shall be decided by the ATO where the pilot undergoes the training course, on the basis of a pre-entry flight assessment, but shall in any case:
 - (i) not exceed the total flight time as PIC;
 - (ii) not exceed 50 % of the hours required in point (a);
 - (iii) not include the requirements of point (a)(2);
 - (2) (reserved).

FCL.135.H LAPL(H) — Extension of privileges to another type or variation of helicopter

- (a) Applicants for an LAPL(H) shall be issued with privileges for the specific type of helicopter in which the skill test was taken. In order to extend their privileges to another type of helicopter, holders of an LAPL(H) shall complete, in that other type, all of the following:
 - (1) unless otherwise specified in the OSD, at least 5 hours of flight instruction, including:
 - (i) 15 dual take-offs, approaches and landings;
 - (ii) 15 supervised solo take-offs, approaches and landings;
 - (2) a skill test to demonstrate an adequate level of practical skill in the new type. During that skill test, the applicant shall also demonstrate to the examiner an adequate level of theoretical knowledge for the other type in the following subjects:
 - (i) Operational procedures,
 - (ii) Flight performance and planning,

- (iii) Aircraft general knowledge.
- (b) Before the holder of an LAPL(H) can exercise the privileges of the licence in another variant of helicopter than the one used for the skill test, the pilot shall undertake differences training or do familiarisation, as determined in the OSD. The differences training shall be entered in the pilot's logbook or equivalent record and shall be signed by the instructor.

FCL.140.H LAPL(H) — Recency requirements

- (a) Holders of an LAPL(H) shall exercise the privileges of their licence on a specific type only if in the last 12 months they have, in the relevant type, taken one of the following steps:
 - (1) completed both of the following:
 - (i) at least six (6) hours of flight time on helicopters of that type as PIC, or flying dual or solo under the supervision of an instructor, including six (6) take-offs, approaches and landings;
 - (ii) a refresher training of at least 1 hour of total flight time with and to the satisfaction of an instructor who shall select those flight exercises that allow the applicant to refresh their competence in safely operating the aircraft and applying normal, abnormal and emergency procedures;
 - (2) passed a proficiency check with an examiner on the specific type before resuming the exercise of the privileges of their licence. That proficiencycheck programme shall be based on the skill test for the LAPL(H).
- (b) Applicants may choose to complete the refresher training referred to in point (a)(1)(ii) in the aircraft or an FSTD representing the relevant type, or in a combination of both.
- (c) The dual flights, flights under supervision referred to in point (a)(1)(i), the refresher training referred to in point (a)(1)(ii) and the proficiency check referred to in point (a)(2) shall be entered in the pilot's logbook or equivalent record and shall be signed by the instructor or examiner, as applicable.

SUBPART C

PRIVATE PILOT LICENCE (PPL) AND GYROPLANE PILOT LICENCE (GPL)***SECTION 1******Common requirements*****FCL.200 Minimum age**

Applicants for a PPL or a GPL shall be at least 17 years old.

FCL.205 Conditions

- (a) Applicants for the issue of a PPL shall have fulfilled the requirements for the class or type rating for the aircraft used in the skill test, as established in Subpart H.
- (b) Applicants for the issue of a GPL shall have fulfilled the requirements for the class or type of aircraft used in the skill test.

FCL.210 Training course

- (a) Applicants for a PPL or a GPL shall complete a training course at an ATO.
- (b) The course shall include theoretical knowledge and flight instruction appropriate to the privileges of the PPL or GPL applied for.
- (c) Theoretical knowledge instruction and flight instruction may be completed at an ATO different from the one where applicants have commenced their training.

FCL.215 Theoretical knowledge examination

Applicants for a PPL or a GPL shall demonstrate a level of theoretical knowledge appropriate to the privileges granted through examinations in the following subjects:

- (a) common subjects:
 - Air law,
 - Human performance,
 - Meteorology,
 - Communications; and
 - Navigation.
- (b) specific subjects concerning the different aircraft categories:
 - Principles of flight,
 - Operational procedures,
 - Flight performance and planning, and
 - Aircraft general knowledge.

FCL.235 Skill test

- (a) Through the completion of a skill test, applicants for a PPL or a GPL shall demonstrate the ability to perform as PIC on the appropriate aircraft category the relevant procedures and manoeuvres with the competency appropriate to the privileges granted.
- (b) Applicants for the skill test shall have received flight instruction on the same class or type of aircraft to be used for the skill test.
- (c) Pass marks
 - (1) The skill test shall be divided into different sections, representing all the different phases of flight appropriate to the category of aircraft flown.
 - (2) Failure in any item of a section will cause the applicant to fail the entire section. If the applicant fails only 1 section, he/she shall repeat only that section. Failure in more than 1 section will cause the applicant to fail the entire test.
 - (3) When the test needs to be repeated in accordance with (2), failure in any section, including those that have been passed on a previous attempt, will cause the applicant to fail the entire test.
 - (4) Failure to achieve a pass in all sections of the test in 2 attempts will require further training.

SECTION 2***Specific requirements for the PPL aeroplanes — PPL(A)*****FCL.205.A PPL(A) — Privileges**

- (a) The privileges of the holders of a PPL(A) are to act without remuneration as PIC or co-pilots of aeroplanes or TMGs engaged in non-commercial operations and to exercise all privileges of holders of an LAPL(A).
- (b) Notwithstanding the paragraph above, the holder of a PPL(A) with instructor or examiner privileges may receive remuneration for:
 - (1) the provision of flight instruction for the LAPL(A) or PPL(A);
 - (2) the conduct of skill tests and proficiency checks for the licences specified in point (1);
 - (3) the training, testing and checking for the ratings or certificates associated with the instructor's or examiner's licence, as applicable.

FCL.210.A PPL(A) — Experience requirements and crediting

- (a) Applicants for a PPL(A) shall have completed at least 45 hours of flight instruction in aeroplanes or TMGs, of which five (5) hours may have been completed in an FSTD, including at least the following:

- (1) 25 hours of dual flight instruction;
- (2) 10 hours of supervised solo flight time, including at least 5 hours of solo cross-country flight time with at least one (1) cross-country flight of at least 270 km (150 NM), during which full stop landings at two (2) aerodromes different from the aerodrome of departure shall be made.

Applicants may complete the flight time of a night rating training course in accordance with point FCL.810 (a)(1)(ii) as part of the 45 hours of flight instruction, provided that, before commencing night rating training, they have completed basic instrument flight training.

- (b) Specific requirements for applicants holding an LAPL(A). Applicants for a PPL(A) shall receive credits for previous LAPL(A) training they have undergone and shall be issued with a PPL(A), provided that the LAPL(A) training and the PPL(A) training that they completed in total complies with the experience requirements in point (a). However, in such a case all of the following shall apply:

- (1) if applicants already hold an LAPL(A), all of the following shall apply, provided that applicants have completed at least 45 hours of total flight time in aeroplanes or TMGs:
 - (i) the requirement in the introductory sentence of point (a) is reduced to 40 hours of flight instruction;
 - (ii) the requirement in point (a)(1) is reduced to 21 hours of dual flight instruction;
- (2) applicants shall have completed at least all of the following with an instructor that is qualified to instruct for a PPL(A):
 - (i) 5 hours of dual flight instruction;

(ii) solo flight time as specified in point (a)(2).

(c) Specific requirements for applicants who hold an SPL, including privileges to fly TMGs.

Applicants for a PPL(A) who hold an SPL with the privileges to fly TMGs shall have completed:

- (1) at least 24 hours of flight time on TMGs after endorsement of the TMG privileges; and
- (2) at least 15 hours of flight instruction in aeroplanes in a training course at an ATO, including at least the requirements of point (a)(2).

(d) Crediting. Applicants holding a pilot licence for another category of aircraft, with the exception of balloons, shall be credited with 10 % of their total flight time as PIC on such aircraft up to a maximum of 10 hours. The amount of credit given shall in any case not include the requirements in (a)(2).

SECTION 3***Specific requirements for the PPL helicopters — PPL(H)*****FCL.205.H PPL(H) — Privileges**

- (a) The privileges of the holder of a PPL(H) are to act without remuneration as PIC or co-pilot of helicopters engaged in non-commercial operations and to exercise all privileges of holders of an LAPL(H).
- (b) Notwithstanding the paragraph above, the holder of a PPL(H) with instructor or examiner privileges may receive remuneration for:
 - (1) the provision of flight instruction for the LAPL(H) or the PPL(H);
 - (2) the conduct of skill tests and proficiency checks for the licences specified in point (1);
 - (3) the training, testing and checking for the ratings and certificates associated with the instructor's or examiner's licence, as applicable.

FCL.210.H PPL(H) — Experience requirements and crediting

- (a) Applicants for a PPL(H) shall have completed at least 45 hours of flight instruction on helicopters, of which five (5) hours may have been completed in an FSTD, including at least:
 - (1) 25 hours of dual flight instruction; and
 - (2) 10 hours of supervised solo flight time, including at least 5 hours of solo cross-country flight time with at least 1 cross-country flight of at least 185 km (100 NM), with full stop landings at 2 aerodromes different from the aerodrome of departure.
 - (3) 35 of the 45 hours of flight instruction have to be completed on the same type of helicopter as the one used for the skill test.
- (b) Specific requirements for applicants that have undergone LAPL(H) training. Applicants for a PPL(H) shall receive credits for previous LAPL(H) training they have undergone and shall be issued with a PPL(H), provided that the LAPL(H) training and the PPL(H) training that they completed in total complies with the experience requirements in point (a).
- (c) Applicants holding a pilot licence for another category of aircraft, with the exception of balloons, shall be credited with 10 % of their total flight time as PIC on such aircraft up to a maximum of 6 hours. The amount of credit given shall in any case not include the requirements in (a)(2).

SECTION 4*Specific requirements for the PPL airships — PPL(As)***FCL.205.As PPL(As) — Privileges**

- (a) The privileges of the holder of a PPL(As) are to act without remuneration as PIC or co-pilot on airships engaged in non-commercial operations.
- (b) Notwithstanding the paragraph above, the holder of a PPL(As) with instructor or examiner privileges may receive remuneration for:
 - (1) the provision of flight instruction for the PPL(As);
 - (2) the conduct of skill tests and proficiency checks for the licence specified in point (1);
 - (3) the training, testing and checking for the ratings or certificates associated with the instructor's or examiner's licence, as applicable.

FCL.210.As PPL(As) — Experience requirements and crediting

- (a) Applicants for a PPL(As) shall have completed at least 35 hours of flight instruction in airships, 5 of which may have been completed in an FSTD, including at least:
 - (1) 25 hours of dual flight instruction, including:
 - (i) 3 hours of cross-country flight training, including 1 cross-countryflight of at least 65 km (35 NM);
 - (ii) 3 hours of instrument instruction;
 - (2) 8 take-offs and landings at an aerodrome, including masting and unmasting procedures;
 - (3) 8 hours of supervised solo flight time.
- (b) Applicants who hold a BPL and are qualified to fly hot-air airships shall be credited with 10 % of their total flight time as PIC on such airships and up to a maximum of 5 hours.

‘SECTION 5***Specific requirements for the GPL*****FCL.205.G GPL – Privileges**

- (a) The privileges of the holder of a GPL are to act as PIC in gyroplanes:
 - (1) without remuneration in non-commercial operations;
 - (2) performing the carriage of passengers only when they have completed 10 hours of flight time as PIC on gyroplanes after the issuance of the licence.
- (b) Notwithstanding point (a)(1), the holder of a GPL with instructor or examiner privileges may receive remuneration for:
 - (1) the provision of flight instruction for the GPL;
 - (2) the conduct of skill tests and proficiency checks for the GPL;
 - (3) the training, testing and checking for the ratings and privileges associated with the instructor's or examiner's licence, as applicable.
- (c) GPL holders shall exercise GPL privileges only if they comply with the applicable recency requirements and only if their medical certificate, appropriate to the privileges exercised, is valid.

FCL.210.G GPL – Experience requirements and crediting

- (a) An applicant for a GPL shall have completed at least 35 hours of flight instruction in gyroplanes, 5 of which may have been completed in an FSTD, including at least:
 - (1) 20 hours of dual flight instruction; and
 - (2) 8 hours of supervised solo flight time, including at least 4 hours of solo cross-country flight time with at least one cross-country flight of at least 150 km (80 NM), during which full-stop landings at two aerodromes different from the aerodrome of departure shall be made.
- (b) Crediting. An applicant that holds a pilot licence for another category of aircraft, with the exception of balloons, shall be credited with 10 % of their total flight time as PIC on such aircraft up to a maximum of 10 hours. In any case, credits shall not be given for the requirements of point (a)(2).
- (c) Applicants with prior experience as PIC on gyroplanes, that have a maximum take-off mass of at least 450 kg, may receive credits towards the requirements of point (a). The amount of credit shall be decided by the ATO where the applicant undergoes the training course, on the basis of a pre-entry flight assessment, but shall in any case not exceed any of the following:
 - (1) the total flight time as PIC;
 - (2) 50 % of the hours required in point (a).

In any case, credits shall not be given for the requirements of point (a)(2).

FCL.235.G GPL – Privileges for classes, types and variants of gyroplanes

- (a) For the purpose of gyroplane pilot licensing in accordance with this Regulation, gyroplanes shall be categorised into the following class and types:
 - (1) single-propeller gyroplane (SPG) class: Single-pilot gyroplanes whose single-centric propulsion unit is operated by a single thrust control and driven by either of the following types of engines, if so specified following the certification process in accordance with CAR-21:
 - (a) a piston engine system which, may consist of more than one piston engine;
 - (b) an electric engine system which, may consist of more than one electric engine;
 - (c) a hybrid engine system consisting of piston and electric engines;
 - (2) gyroplane types that require privileges for that individual type, as determined following the certification process in accordance with CAR-21.
- (b) Applicants for a GPL shall be issued with privileges for the class or type of gyroplanes in which the skill test was taken. In order to extend their privileges to another class or type, holders of a GPL shall complete, in that other class or type, all of the following:
 - (1) unless specified otherwise in the OSD, where applicable, 3 hours of flight instruction, including:
 - (i) 10 dual take-offs and landings; and
 - (ii) 10 supervised solo take-offs and landings;
 - (2) a skill test to demonstrate an adequate level of practical skill in the new class or type. During this skill test, the applicant shall also demonstrate to the examiner an adequate level of theoretical knowledge for the other class or type in the following subjects:
 - (i) operational procedures;
 - (ii) flight performance and planning;
 - (iii) aircraft general knowledge.
- (c) In order to extend the privileges to another variant within a class or type, the pilot shall complete differences training or familiarisation. Where applicable, that differences training or familiarisation shall comply with the OSD. The differences training shall be entered in the pilot's logbook or into an equivalent record and be signed by the instructor. When extending the privileges for an SPG class to a variant with another type of engine, as specified in point (a)(1), the differences training shall consist of dual flight instruction and theoretical knowledge instruction which shall include, with regard to that other type of engine and related aircraft systems, at least all of the following:
 - (1) operational procedures;
 - (2) flight performance and planning;
 - (3) aircraft general knowledge.

FCL.240.G GPL – Recency requirements

- (a) Holders of a GPL shall exercise the privileges of their licence in a specific class or type of gyroplane only if in the last 2 years they have met any of the following conditions as pilots of gyroplanes in the relevant class or type:
 - (1) they have completed at least 12 hours of flight time as PIC or flying dual or solo under the supervision of an instructor, including:
 - (i) 12 take-offs and landings;
 - (ii) refresher training of at least 1 hour of total flight time with and to the satisfaction of an instructor who shall select those flight exercises that allow the applicant to refresh their competence in safely operating the aircraft and applying normal, abnormal and emergency procedures;
 - (2) they have passed a GPL proficiency check with an examiner. The proficiency check programme shall be based on the skill test for the GPL.
- (b) Holders of a GPL with privileges for the SPG class who, in accordance with point FCL.235.G(c), have extended their privileges to a variant with a different type of engine as specified in point FCL.235.G(a) shall, if they have not flown that variant within the preceding 2 years, complete any of the following in that variant, before exercising their privileges in that variant:
 - (1) further differences training in accordance with point FCL.235.G(c);
 - (2) a proficiency check;
 - (3) refresher training in accordance with point (a)(1)(ii).
- (c) The dual flights and the solo flights under supervision as per the introductory phrase of point (a)(1), the refresher training as per points (a)(1)(ii) and (b)(3), and the proficiency check as per point (a)(2) and (b)(2) shall be entered in the pilot's logbook or equivalent record and shall be signed by the instructor or examiner, as applicable.

SUBPART D

COMMERCIAL PILOT LICENCE — CPL**SECTION 1*****Common requirements*****FCL.300 CPL — Minimum age**

An applicant for a CPL shall be at least 18 years of age.

FCL.305 CPL — Privileges and conditions

- (a) Privileges. The privileges of the holder of a CPL are, within the appropriate aircraft category, to:
- (1) exercise all the privileges of the holder of an LAPL and a PPL;
 - (2) act as PIC or co-pilot of any aircraft engaged in operations other than commercial air transport;
 - (3) act as PIC in commercial air transport of any single-pilot aircraft subject to the restrictions specified in FCL.060 and in this Subpart;
 - (4) act as co-pilot in commercial air transport subject to the restrictions specified in FCL.060.
- (b) Conditions. An applicant for the issue of a CPL shall have fulfilled the requirements for the class or type rating of the aircraft used in the skill test.

FCL.310 CPL — Theoretical knowledge examinations

An applicant for a CPL shall demonstrate a level of knowledge appropriate to the privileges granted in the following subjects:

- Air Law,
- Aircraft General Knowledge — Airframe/Systems/Powerplant,
- Aircraft General Knowledge — Instrumentation,
- Mass and Balance,
- Performance,
- Flight Planning and Monitoring,
- Human Performance,
- Meteorology,
- General Navigation,
- Radio Navigation,
- Operational Procedures,
- Principles of Flight,
- Visual Flight Rules (VFR) Communications.

FCL.315 CPL — Training course

An applicant for a CPL shall have completed theoretical knowledge instruction and flight instruction at an ATO, in accordance with Appendix 3 to this Regulation.

FCL.320 CPL — Skill test

An applicant for a CPL shall pass a skill test in accordance with Appendix 4 to this Regulation to demonstrate the ability to perform, as PIC of the appropriate aircraft category, the relevant procedures and manoeuvres with the competency appropriate to the privileges granted.

SECTION 2*Specific requirements for the aeroplane category — CPL(A)***FCL.315.A CPL — Training course**

Theoretical knowledge and flight instruction for the issue of a CPL(A) shall include upset prevention and recovery training.

FCL.325.A CPL(A) — Specific requirements for applicants who hold an MPL

(a) Applicants for a CPL(A) who hold an MPL shall have completed in aeroplanes:

(1) 70 hours of flight time in one of the following ways:

- (i) as PIC;
- (ii) made up of at least 10 hours as PIC and the additional flight time as PIC under supervision (PICUS).

Of these 70 hours, 20 shall be of VFR cross-country flight time as PIC, or cross-country flight time made up of at least 10 hours as PIC and 10 hours as PICUS. That shall include a VFR cross-country flight of at least 540 km (300 NM) in the course of which full-stop landings at two different aerodromes shall be flown as PIC;

(2) the elements of the CPL(A) modular course as specified in Chapter E, point 10(a) and point 11, of Appendix 3;

(3) the CPL(A) skill test, in accordance with point FCL.320.

(b) When being issued with a CPL in accordance with point (a), applicants shall be subject to the following conditions:

- (1) comply with the requirements of point FCL.405.A(c) in order to have the privileges of their IR(A) extended to single-pilot operations in aeroplanes;
- (2) have the privileges of their type ratings restricted to exercise the privileges of a co-pilot only. That restriction shall be removed when applicants complete a proficiency check for the relevant type in accordance with Appendix 9 in the role of the PIC.

SUBPART E

*MULTI-CREW PILOT LICENCE — MPL***FCL.400.A MPL — Minimum age**

An applicant for an MPL shall be at least 18 years of age.

FCL.405.A MPL — Privileges

- (a) The privileges of the holder of an MPL are to act as co-pilot in an aeroplane required to be operated with a co-pilot.
- (b) Holders of an MPL shall, upon application:
 - (1) be issued with additional privileges of the holder of a PPL(A), provided that they comply with the requirements for the PPL(A) specified in Subpart C;
 - (2) have their MPL replaced by a CPL(A), provided that they comply with the requirements specified in point FCL.325.A.
- (c) The holder of an MPL shall have the privileges of his/her IR(A) limited to aeroplanes required to be operated with a co-pilot. The privileges of the IR(A) may be extended to single-pilot operations in aeroplanes, provided that the licence holder has completed the training necessary to act as PIC in single-pilot operations exercised solely by reference to instruments and passed the skill test of the IR(A) as a single-pilot.

FCL.410.A MPL — Training course and theoretical knowledge examinations

- (a) Course Applicants for the issue of an MPL shall have completed a training course of theoretical knowledge and flight instruction at an ATO in accordance with Appendix 5 to this Regulation.
- (b) Examination Applicants for the issue of an MPL shall demonstrate a level of theoretical knowledge appropriate to the holders of an ATPL(A), in accordance with FCL.515, and to a multi-pilot type rating.

FCL.415.A MPL — Practical skill

- (a) An applicant for an MPL shall have demonstrated through continuous assessment the skills required for fulfilling all the competency units specified in Appendix 5 to this Regulation, as pilot flying and pilot not flying, in a multi-engine turbine-powered multi-pilot aeroplane, under VFR and IFR.
- (b) On completion of the training course, the applicant shall pass a skill test in accordance with Appendix 9 to this Regulation, to demonstrate the ability to perform the relevant procedures and manoeuvres with the competency appropriate to the privileges granted. The skill test shall be taken in the type of aeroplane used on the advanced phase of the MPL integrated training course or in an FFS representing the same type.

SUBPART F

*AIRLINE TRANSPORT PILOT LICENCE — ATPL**SECTION 1**Common requirements***FCL.500 ATPL — Minimum age**

Applicants for an ATPL shall be at least 21 years of age.

FCL.505 ATPL — Privileges

- (a) The privileges of the holder of an ATPL are, within the appropriate aircraft category, to:
- (1) exercise all the privileges of the holder of an LAPL, a PPL and a CPL;
 - (2) act as PIC of aircraft engaged in commercial air transport.
- (b) Applicants for the issue of an ATPL shall have fulfilled the requirements for the type rating of the aircraft used in the skill test.

FCL.515 ATPL — Training course and theoretical knowledge examinations

- (a) Course. Applicants for an ATPL shall have completed a training course at an ATO. The course shall be either an integrated training course or a modular course, in accordance with Appendix 3 to this Regulation.
- (b) Examination. Applicants for an ATPL shall demonstrate a level of knowledge appropriate to the privileges granted in the following subjects:
- Air Law,
 - Aircraft General Knowledge — Airframe/Systems/Powerplant,
 - Aircraft General Knowledge — Instrumentation,
 - Mass and Balance,
 - Performance,
 - Flight Planning and Monitoring,
 - Human Performance,
 - Meteorology,
 - General Navigation,
 - Radio Navigation,
 - Operational Procedures,
 - Principles of Flight,
 - VFR Communications,
 - IFR Communications.

SECTION 2*Specific requirements for the aeroplane category — ATPL(A)***FCL.505.A ATPL(A) — Restriction of privileges for pilots previously holding an MPL**

When the holder of an ATPL(A) has previously held only an MPL, the privileges of the licence shall be restricted to multi-pilot operations, unless the holder has complied with FCL.405.A(b)(2) and (c) for single-pilot operations.

FCL.510.A ATPL(A) — Prerequisites, experience and crediting

(a) Prerequisites. Applicants for an ATPL(A) shall hold:

- (1) an MPL; or
- (2) a CPL(A) and a multi-engine IR for aeroplanes. In this case, the applicant shall also have received instruction in MCC.

(b) Experience. Applicants for an ATPL(A) shall have completed a minimum of 1500 hours of flight time in aeroplanes, including at least:

- (1) 500 hours in multi-pilot operations on aeroplanes;
- (2) (i) 500 hours as PIC under supervision; or
(ii) 250 hours as PIC; or
(iii) 250 hours, including at least 70 hours as PIC, and the remaining as PIC under supervision;
- (3) 200 hours of cross-country flight time of which at least 100 hours shall be as PIC or as PIC under supervision;
- (4) 75 hours of instrument time of which not more than 30 hours may be instrument ground time; and
- (5) 100 hours of night flight as PIC or co-pilot.

Of the 1500 hours of flight time, up to 100 hours of flight time may have been completed in an FFS and FNPT. Of these 100 hours, only a maximum of 25 hours may be completed in an FNPT.

(c) Crediting.

- (1) Holders of a pilot licence for other categories of aircraft shall be credited with flight time up to a maximum of:
 - (i) for TMG or sailplanes, 30 hours flown as PIC;
 - (ii) for helicopters, 50 % of all the flight time requirements of paragraph (b).
- (2) Holders of a flight engineer licence issued by CAA shall be credited with 50 % of the flight engineer time up to a maximum credit of 250 hours. These 250 hours may be credited against the 1500 hours requirement of paragraph (b), and the 500 hours requirement of paragraph (b)(1), provided that the total credit given against any of these paragraphs does not exceed 250 hours.

- (3) Holders of a restricted type rating issued in accordance with point FCL.720.A(c) shall receive credits for their flight time completed while exercising the privileges of that type rating up to a maximum of 250 hours.
- (d) The experience required in (b) shall be completed before the skill test for the ATPL(A) is taken.

FCL.520.A ATPL(A) — Skill test

Applicants for an ATPL(A) shall pass a skill test in accordance with Appendix 9 to this Regulation to demonstrate the ability to perform, as PIC of a multi-pilot aeroplane under IFR, the relevant procedures and manoeuvres with the competency appropriate to the privileges granted.

The skill test shall be taken in the aeroplane or an adequately qualified FFS representing the same type.

SECTION 3***Specific requirements for the helicopter category — ATPL(H)*****FCL.510.H ATPL(H) — Prerequisites, experience and crediting**

Applicants for an ATPL(H) shall:

- (a) hold a CPL(H);
- (b) have received instruction in MCC in accordance with point FCL.735.H;
- (c) have completed as a pilot of helicopters a minimum of 1000 hours of flight time including at least:
 - (1) 350 hours in multi-pilot helicopters;
 - (2)
 - (i) 250 hours as PIC; or
 - (ii) 100 hours as PIC and 150 hours as PIC under supervision; or
 - (iii) 250 hours as PIC under supervision in multi-pilot helicopters. In this case, the ATPL(H) privileges shall be limited to multi-pilot operations only, until 100 hours as PIC have been completed;
 - (3) 200 hours of cross-country flight time of which at least 100 hours shall be as PIC or as PIC under supervision;
 - (4) 30 hours of instrument time of which not more than 10 hours may be instrument ground time; and
 - (5) 100 hours of night flight as PIC or as co-pilot.

Of the 1 000 hours, a maximum of 100 hours may have been completed in an FSTD, of which not more than 25 hours may be completed in an FNPT.

- (d) Flight time in aeroplanes shall be credited up to 50 % against the flight time requirements of paragraph (c).
- (e) The experience required in (c) shall be completed before the skill test for the ATPL(H) is taken;
- (f) applicants for an ATPL(H) shall receive a full credit for the requirement in point (b) when they comply with point FCL.720.H(a)(2)(ii) and, additionally, have received training at an ATO to meet the necessary standard for the successful completion of the course as per point FCL.735.H.

FCL.520.H ATPL(H) — Skill test

Applicants for an ATPL(H) shall pass a skill test in accordance with Appendix 9 to this Regulation to demonstrate the ability to perform as PIC of a multi-pilot helicopter the relevant procedures and manoeuvres with the competency appropriate to the privileges granted.

The skill test shall be taken in the helicopter or an adequately qualified FFS representing the same type.

SUBPART G

INSTRUMENT RATING — IR**SECTION 1***Common requirements***FCL.600 IR — General**

Except as provided in point FCL.835, operations under IFR on an aeroplane, helicopter, airship or powered-lift aircraft shall be conducted only by holders of a PPL, CPL, MPL and ATPL with an IR appropriate to the category of aircraft or, if an IR appropriate to the category of aircraft is not available, only while undergoing skill testing or dual instruction.

FCL.605 IR — Privileges and conditions**(a) Privileges**

The privileges of a holder of an IR are to fly aircraft under IFR, including PBN operations, with a minimum decision height of

- (1) no less than 200 feet (60 m);
- (2) less than 200 ft (60 m), provided that they are authorised to do so in accordance with relevant requirements of CAR-OPS.

(b) Conditions

- (1) Holders of an IR shall exercise their privileges in accordance with the conditions established in Appendix 8 to this Regulation.
- (2) To exercise privileges as PIC under IFR in multi-pilot helicopters, holders of an IR(H) shall have at least 70 hours of instrument time, of which up to 30 hours may be instrument ground time.

FCL.610 IR — Prerequisites and crediting

Applicants for an IR shall:

(a) hold:

- (1) at least a PPL in the appropriate aircraft category, and:
 - (i) the privileges to fly at night in accordance with FCL.810, if the IR privileges will be used at night; or
 - (ii) an ATPL in another category of aircraft; or
- (2) a CPL, in the appropriate aircraft category;

- (b) have completed at least 50 hours of cross-country flight time as PIC in aeroplanes, TMGs, helicopters or airships, of which at least 10 or, in the case of airships, 20 hours shall be in the relevant aircraft category;

- (c) Helicopters only. Applicants who have completed an ATP(H)/IR, ATP(H), CPL(H)/IR or CPL(H) integrated training course shall be exempted from the requirement in (b).

FCL.615 IR — Theoretical knowledge and flight instruction

- (a) Course. Applicants for an IR shall have received a course of theoretical knowledge and flight instruction at an ATO. The course shall be:
- (1) an integrated training course which includes training for the IR, in accordance with Appendix 3 to this Regulation; or
 - (2) a modular course in accordance with Appendix 6 to this Regulation.
- (b) Examination. Applicants shall demonstrate a level of theoretical knowledge appropriate to the privileges granted in the following subjects:
- Air Law,
 - Aircraft General Knowledge - Instrumentation,
 - Flight Planning and Monitoring,
 - Human Performance,
 - Meteorology,
 - Radio Navigation,
 - IFR Communications.

FCL.620 IR — Skill test

Applicants for an IR shall pass a skill test in accordance with Appendix 7 to this Regulation to demonstrate the ability to perform the relevant procedures and manoeuvres with a degree of competency appropriate to the privileges granted.

FCL.625 IR — Validity, revalidation and renewal

- (a) Validity
- An IR shall be valid for 1 year.
- (b) Revalidation
- (1) An IR shall be revalidated within the 3 months immediately preceding its expiry date by complying with the revalidation criteria for the relevant aircraft category.
 - (b) If applicants choose to fulfil the revalidation requirements earlier than prescribed in point (1), the new validity period shall commence from the date of the proficiency check.
 - (3) Applicants who fail to pass the relevant section of an IR proficiency check before the expiry date of the IR shall exercise the IR privileges only if they have passed the IR proficiency check.
 - (4) Applicants for the revalidation of an IR shall receive full credits for the proficiency check as required in this Subpart when they complete EBT practical assessment in accordance with Appendix 10 related to the IR at an EBT operator.

(c) Renewal

If an IR has expired, in order to renew their privileges, applicants shall comply with all of the following:

- (1) in order to determine whether refresher training is necessary for the applicant to reach the level of proficiency needed to pass the instrument element of the skill test in accordance with Appendix 9, they shall undergo an assessment at either of the following organisations:
 - (i) at an ATO;
 - (ii) at an EBT operator that is specifically approved for such refresher training;
 - (2) if deemed necessary by the organisation providing the assessment in accordance with point (1), they shall complete refresher training at that organisation;
 - (3) after complying with point (1) and, as applicable, point (2), they shall pass a proficiency check in accordance with Appendix 9 or complete EBT practical assessment in accordance with Appendix 10 in the relevant aircraft category. That EBT practical assessment may be combined with the refresher training specified in point (2);
 - (4) they shall hold the relevant class or type rating unless specified otherwise in this Regulation.
- (d) If the IR has not been revalidated or renewed in the preceding 7 years, applicants for the IR shall pass again the IR theoretical knowledge examination and skill test.
- (e) Holders of a valid IR on a pilot licence issued by an ICAO member state in accordance with Annex 1 to the Chicago Convention shall not be required to comply with the requirements in points (c)(1), (c)(2) and (d) when renewing the IR privileges contained in licences issued in accordance with this Regulation.
- (f) The proficiency check specified in point (c)(3) may be combined with a proficiency check performed for the renewal of the relevant class or type rating.

SECTION 2*Specific requirements for the aeroplane category***FCL.620A IR(A) — Skill test**

- (a) For a multi-engine IR(A), the skill test shall be taken in a multi-engine aeroplane. For a single-engine IR(A), the test shall be taken in a single-engine aeroplane. A multi-engine centreline thrust aeroplane shall be considered a single-engine aeroplane for the purposes of this point.
- (b) Applicants who have completed a skill test for a multi-engine IR(A) in a single-pilot multi-engine aeroplane for which a class rating is required shall also be issued with a single-engine IR(A) for the single-engine aeroplane class or type ratings that they hold.

FCL.625.A IR(A) — Revalidation

- (a) Revalidation.

To revalidate an IR(A), applicants shall:

- (1) hold the relevant class or type rating, unless the IR revalidation is combined with the renewal of the relevant class or type rating;
 - (2) pass a proficiency check in accordance with Appendix 9, or complete EBT practical assessment in accordance with Appendix 10, if the IR revalidation is combined with the revalidation of a class or type rating;
 - (3) if the IR revalidation is not combined with the revalidation of a class or type rating:
 - (i) for single-pilot aeroplanes, complete section 3B and those parts of section 1 which are relevant to the intended flight of the proficiency check in accordance with Appendix 9 to this Regulation;
 - (ii) for multi-engine aeroplanes, complete section 6 of the proficiency check for single-pilot aeroplanes in accordance with Appendix 9 to this Regulation by sole reference to instruments.
 - (4) An FNPT II or an FFS representing the relevant class or type of aeroplane may be used for the revalidation pursuant to point (3), provided that at least each alternate proficiency check for the revalidation of an IR(A) is performed in an aeroplane.
- (b) Cross-credit shall be given in accordance with Appendix 8 to this Regulation.

SECTION 3*Specific requirements for the helicopter category***FCL.625.H IR(H) — Revalidation**

- (a) To revalidate an IR(H), applicants shall:
- (1) hold the relevant type rating, unless the IR revalidation is combined with the renewal of the relevant type rating;
 - (2) pass a proficiency check in accordance with Appendix 9 to this Regulation for the relevant type of helicopter if the IR revalidation is combined with the revalidation of a type rating;
 - (3) if the IR revalidation is not combined with the revalidation of a type rating, complete Section 5 and the relevant parts of Section 1 of the proficiency check in accordance with Appendix 9 to this Regulation for the relevant type of helicopter.
- (b) An FTD 2/3 or an FFS representing the relevant type of helicopter may be used for the proficiency check pursuant to point (a)(3), provided that at least each alternate proficiency check for the revalidation of an IR(H) is performed in a helicopter.
- (c) Cross-credit shall be given in accordance with Appendix 8 to this Regulation.

FCL.630.H IR(H) — Extension of privileges of an IR(H) to further helicopter types

Unless specified otherwise in the operational suitability data(OSD), holders of an IR(H) who wish to extend their IR(H) privileges to further helicopter types shall, in addition to the relevant type rating training course, complete at an ATO 2 hours of flight training on the relevant type by sole reference to instruments according to IFR which may be conducted in an FFS or an FTD which appropriately represents the relevant type for IFR operation.'

SECTION 4*Specific requirements for the airship category***FCL.620.As IR(As) — Skill test**

For a multi-engine IR(As), the skill test shall be taken in a multi-engine airship. For a single-engine IR(As), the test shall be taken in a single-engine airship.'

FCL.625.As IR(As) — Revalidation

Applicants for the revalidation of an IR(As):

- (a) when combined with the revalidation of a type rating, shall complete a proficiency check in accordance with Appendix 9 to this Regulation, for the relevant type of airship;
- (b) when not combined with the revalidation of a type rating, shall complete section 5 and those parts of section 1 relevant to the intended flight of the proficiency check for airships in accordance with Appendix 9 of this Regulation. In this case, an FTD 2/3 or FFS representing the relevant type may be used, but at least each alternate proficiency check for the revalidation of an IR(As) in these circumstances shall be performed in an airship.

SUBPART H

CLASS AND TYPE RATINGS**SECTION 1***Common requirements***FCL.700 Circumstances in which class or type ratings are required**

- (a) Holders of a pilot licence shall act as pilots of an aircraft only if they have a valid and appropriate class or type rating, unless any of the following applies:
- (1) if exercising the privileges of an LAPL or a GPL;
 - (2) if they take skill tests or proficiency checks for renewal of class or type ratings;
 - (3) if they receive flight instruction;
 - (4) (reserved).

FCL.705 Privileges of the holder of a class or type rating

The privileges of the holder of a class or type rating are to act as pilot on the class or type of aircraft specified in the rating.

FCL.710 Class and type ratings — variants

- (a) Pilots shall complete differences training or familiarisation in order to extend their privileges to another variant of aircraft within a class or type rating, or, in the case of point FCL.710(d)(1), in order to maintain those privileges. In the case of variants within a class or type rating, the differences training or familiarisation shall include the relevant elements defined in the OSD, where applicable. When extending the privileges of an SEP aeroplane class rating to a variant with another type of engine referred to in Article 2, "SEP aeroplane", the differences training shall consist of dual flight instruction and theoretical knowledge instruction which shall include, with regard to that other type of engine and related aircraft systems, at least all of the following subjects:
- (1) Aircraft general knowledge;
 - (2) Operational procedures;
 - (3) Flight performance and planning.
- (b) The differences training shall be conducted at any of the following:
- (1) an ATO;
 - (2) an AOC holder having an approved differences training programme for the relevant class or type.
- (c) Notwithstanding the requirement in point (b), differences training for the following aircraft may be conducted by an appropriately qualified instructor unless otherwise provided in the OSD:
- (1) aeroplanes requiring a class rating:

- (i) TMGs;
 - (ii) SEP aeroplanes;
 - (iii) MEP aeroplanes;
 - (iv) SET aeroplanes, except for complex or high-performance SET aeroplanes;
- (2) single-engine helicopters with a maximum take-off mass not exceeding 3 175 kg.
- (d) Pilots who, after having extended their privileges to another variant within a class or type rating in accordance with this point, have not flown that variant within the preceding 2 years shall, before exercising their privileges in that variant, complete any of the following in that variant:
- (1) further differences training in accordance with points (a) and (b) or, if applicable, (c);
 - (2) a proficiency check;
 - (3) in the case of a variant within the SEP class rating with a particular engine type referred to in Article 2, “SEP aeroplanes”, refresher training in accordance with point FCL.740.A(b)(1)(ii)(C).
- (da) Point FCL.710(d) shall not apply in the case of variants within the TMG class rating and variants within the SEP class rating that have the same type of engine referred to in Article 2, “SEP aeroplanes”.
- (e) The differences training or the proficiency check in that variant shall be entered in the pilots’ logbook or equivalent record and signed by the instructor or examiner as appropriate.

FCL.725 Requirements for the issue of class and type ratings

- (a) Training course. An applicant for a class or type rating shall complete a training course at an ATO. The type rating training course shall include the mandatory training elements for the relevant type as defined by manufacturer or in accordance with the OSD, where applicable.
- (b) Theoretical knowledge examination. The applicant for a class or type rating shall pass a theoretical knowledge examination organised by the ATO to demonstrate the level of theoretical knowledge required for the safe operation of the applicable aircraft class or type.
- (1) For multi-pilot aircraft, the theoretical knowledge examination shall be written and comprise at least 100 multiple-choice questions distributed appropriately across the main subjects of the syllabus.
 - (2) For single-pilot multi-engine aircraft, the theoretical knowledge examination shall be written and the number of multiple-choice questions shall depend on the complexity of the aircraft.
 - (3) For single-engine aircraft, the theoretical knowledge examination shall be conducted verbally by the examiner during the skill test to determine whether or not a satisfactory level of knowledge has been achieved.
 - (4) For single-pilot aeroplanes that are classified as high-performance aeroplanes, the examination shall be written and comprise at least 100 multiple-choice questions distributed appropriately across the subjects of the syllabus.

- (5) For single-pilot single-engine and single-pilot multi-engine aeroplanes (sea), the examination shall be in a written form and shall comprise at least 30 multiple-choice questions.
- (c) Skill test. An applicant for a class or type rating shall pass a skill test in accordance with Appendix 9 to this regulation to demonstrate the skill required for the safe operation of the applicable class or type of aircraft.

The applicant shall pass the skill test within a period of 6 months after commencement of the class or type rating training course and within a period of 6 months preceding the application for the issue of the class or type rating.

- (d) Single- and multi-pilot operation in single-pilot aircraft – type ratings
- (1) The privileges of holders of a type rating for a single-pilot aircraft include the privileges to fly the aircraft in single-pilot operations and multi-pilot operations. However, such holders shall exercise those privileges for a particular form of operation only if they comply with all of the following:
- (i) they have successfully completed flight training for the relevant form of operation in the relevant aircraft type in accordance with Appendix 9 to this Regulation, unless specified otherwise in the OSD. That flight training for a particular form of operation shall either be included in the initial type rating training course at an ATO or, following the initial issuance of the type rating, be completed in the form of additional training at either of the following:
- (A) an ATO;
- (B) an EBT operator that is specifically entitled to provide such training on the basis of either an approval or a declaration;
- (ii) they have completed a skill test or a proficiency check:
- (A) for single-pilot operations in one of the following ways:
- (1) in single-pilot operations;
- (2) in multi-pilot operations with additional elements for single-pilot operations as specified in Appendix 9;
- (B) for multi-pilot operations, in multi-pilot operations.
- (iii) additionally, in the case of multi-pilot operations in single-pilot aircraft:
- (A) they meet the requirements that are specified in:
- (1) point FCL.720.A(b)(4) or point FCL.720.H(a)(2), as applicable;
- (2) point FCL.720.A(b)(5), for single-pilot aeroplanes, before starting flight training for multi-pilot operations in accordance with point FCL.725(d)(1)(i);
- (B) they exercise their privileges only at an organisation that is certified by the CAA to conduct air operations, subject to CAR-OPS series or other relevant CAA regulations for air operations.

- (2) When applicants for the initial issue of a type rating for a single-pilot aircraft complete the flight training and the skill test in multi-pilot operations only, the type rating shall be issued with a restriction to multi-pilot operations. That restriction shall be removed when applicants complete, in accordance with Appendix 9, additional training and a proficiency check that include the necessary elements for single-pilot operations.

In all other cases, the form of operation shall not be entered onto the licence.

(da) Single- and multi-pilot operations – aeroplane class ratings

The privileges of holders of a class rating for a single-pilot aeroplane include the privileges to fly the aeroplane in multi-pilot operations, provided that such holders:

- (1) comply with the requirements set out in:
 - (i) point FCL.720.A(b)(4);
 - (ii) point FCL.720.A(b)(5), before starting flight training for multi-pilot operations in accordance with point FCL.725(da)(2);
- (2) have completed flight training and passed a proficiency check for multi-pilot operations in the relevant aeroplane class in accordance with Section B, point 5(g), of Appendix 9 at an organisation that is specified in point FCL.725(d)(1)(i); and
- (3) exercise their privileges only at an organisation that is certified by the CAA to conduct air operations, subject to CAR-OPS series or other relevant CAA regulations for air operations.

Additional privileges for multi-pilot operations in a single-pilot aeroplane class shall not be entered onto the licence.

- (db) If a skill test or proficiency check for a single-pilot aircraft class or type rating is conducted in either of the following, the form or forms of operation in which that skill test or a proficiency check is conducted shall be entered in the logbook of the applicants and signed by the examiner:

- (1) multi-pilot operations;
- (2) single-pilot and multi-pilot operations.

- (e) (Reserved).

- (f) Applicants for a class rating for TMGs who also hold an SPL, including the privileges to fly on TMGs, shall receive full credits towards the requirements in paragraphs (a), (b) and (c).

FCL.740 Validity and renewal of class and type ratings

(a) Validity

- (1) The validity period of class and type ratings shall be 1 year, except for single-pilot single-engine class ratings for which the validity period shall be 2 years, unless otherwise determined in the OSD. If pilots choose to fulfil the revalidation requirements earlier than prescribed in points FCL.740.A, FCL.740.H, FCL.740.PL and FCL.740.As, the new validity period shall commence from the date of the proficiency check.

- (2) Applicants for the revalidation of a class or type rating shall receive full credits for the proficiency check as required in this Subpart when they complete EBT practical assessment in accordance with Appendix 10 at an operator that has implemented EBT for the relevant class or type rating.

(b) Renewal

For the renewal of a class or type rating, applicants shall comply with all of the following:

- (1) in order to determine whether refresher training is necessary for the applicant to reach the level of proficiency to safely operate the aircraft, they shall undergo an assessment at one of the following:
 - (i) at an ATO;
 - (ii) (reserved);
 - (iii) at an ATO or with an instructor, if the rating expired no more than 3 years ago and the rating concerned a non-high-performance SEP aeroplane class rating or a TMG class rating;
 - (iv) at an EBT operator that is specifically approved for such refresher training;
- (2) if deemed necessary by the organisation or the instructor providing the assessment as per point (1), they shall complete refresher training at that organisation or with that instructor;
- (3) after complying with point (1) and, as applicable, point (2), they shall pass a proficiency check in accordance with Appendix 9 or complete EBT practical assessment in accordance with Appendix 10. That EBT practical assessment may be combined with the refresher training specified in point (2).

Applicants shall be exempted from the requirement in points (b)(1) and (b)(2) if they hold a valid rating for the same class or type of aircraft on a pilot licence issued by an ICAO member state in accordance with Annex 1 to the Chicago Convention and if they are entitled to exercise the privileges of that rating.

- (c) Pilots who leave an operator's EBT programme after having failed to demonstrate an acceptable level of competence in accordance with that EBT programme shall not exercise the privileges of that type rating until they have complied with one of the following:
 - (1) they have completed EBT practical assessment in accordance with Appendix 10;
 - (2) they have passed a proficiency check in accordance with point FCL.625(c)(3) or point FCL.740(b)(3), as applicable. In such a case, point FCL.625(b)(4) and point FCL.740(a)(2) shall not apply.

SECTION 2*Specific requirements for the aeroplane category***FCL.720.A Experience requirements and prerequisites for the issue of class or type ratings — aeroplanes**

Unless otherwise determined in the OSD, applicants for the issue of a class or type rating shall comply with the following experience requirements and prerequisites for the issue of the relevant rating:

(a) Single-pilot aeroplanes

(1) Single-pilot multi-engine aeroplanes

Applicants for the issue of a first class or type rating on a single-pilot multi-engine aeroplane shall have completed at least 70 hours as PIC in aeroplanes.

(2) Single-pilot high-performance non-complex aeroplanes

Before starting flight training, applicants for the issue of a class or type rating for a single-pilot aeroplane classified as a high-performance aeroplane shall:

- (i) have at least 200 hours of total flying experience, of which 70 hours as PIC in aeroplanes; and
- (ii) comply with one of the following requirements:
 - (A) hold a certificate of satisfactory completion of a course for additional theoretical knowledge undertaken at an ATO; or
 - (B) have passed the ATPL(A) theoretical knowledge examinations in accordance with this regulation; or
 - (C) hold, in addition to a licence issued in accordance with this regulation, an ATPL(A) or CPL(A)/IR with theoretical knowledge credit for ATPL(A), issued in accordance with Annex 1 to the Chicago Convention.

(3) Single-pilot high-performance complex aeroplanes

Applicants for the issue of a type rating for a complex single-pilot aeroplane classified as a high-performance aeroplane shall, in addition to meeting the requirements in point (2), comply with all of the following:

- (i) they shall hold or have held a single- or multi-engine IR(A), as appropriate and as established in Subpart G;
- (ii) for the issue of the first type rating, they shall, before starting the type rating training course, meet the requirements in point (b)(5).

(b) Multi-pilot aeroplanes

Applicants for the issue of the first type rating for a multi-pilot aeroplane shall be student pilots currently undergoing training on an MPL training course or shall, before starting the type rating training course, comply with the following requirements:

- (1) have at least 70 hours of flight experience as PIC in aeroplanes;

- (2) hold or have held a multi-engine IR(A);
 - (3) have passed the ATPL(A) theoretical knowledge examinations in accordance with this regulation;
 - (4) except when the type rating course is combined with an MCC course:
 - (i) hold a certificate of satisfactory completion of an MCC course in aeroplanes; or
 - (ii) hold a certificate of satisfactory completion of MCC in helicopters and have more than 100 hours of flight experience as pilots of multi-pilot helicopters; or
 - (iii) have at least 500 hours as pilots of multi-pilot helicopters; or
 - (iv) have at least 500 hours as pilots in multi-pilot operations on single-pilot multi-engine aeroplanes, in commercial air transport in accordance with the applicable air operations requirements; and
 - (5) have completed the training course specified in point FCL.745.A, unless they comply with any of the following:
 - (i) they completed, within the preceding 3 years, the training and checking in accordance with points CAR-OPS-1.945 or CAR-OPS-1.965;
 - (ii) they have completed the training specified in point FCL.915(e)(1)(ii).
- (c) Notwithstanding point FCL.720.A(b), applicants who comply with Section B, point 6(i), of Appendix 9 shall be issued with a type rating with restricted privileges for a multi-pilot aeroplane that allows holders of such a rating to act as cruise relief co-pilots above Flight Level 200, provided that two other members of the crew have a type rating in accordance with point FCL.720.A (b).
- To remove the restriction, applicants shall comply with all of the following:
- (1) undergo an assessment at an ATO which shall determine their training needs to have the restriction removed;
 - (2) based on the assessment specified in point (1), complete, at that ATO, training which shall allow them to reach the level of proficiency to safely operate the aircraft;
 - (3) after the completion of the training specified in point (2), complete a skill test in accordance with Appendix 9;
 - (4) after the completion of the skill test specified in point (3), meet one of the following conditions:
 - (i) comply with point CAR-OPS1.945(d), provided that they meet the experience requirements specified in point FCL.730.A;
 - (ii) complete flight training in the aircraft which includes manoeuvres on take-off, landing and go-around.
- (d) When so determined in the OSD, the exercise of the privileges of a type rating may be initially limited to flight under the supervision of an instructor. The flight hours under supervision shall be entered in the pilots' logbook or equivalent record and signed by the instructor. The limitation shall be removed when pilots demonstrate that the hours of flight under supervision required in the OSD have been completed.

FCL.725.A Theoretical knowledge and flight instruction for the issue of class and type ratings — aeroplanes

Unless otherwise determined in in the OSD:

- (a) for single-pilot multi-engine aeroplanes:
 - (1) the theoretical knowledge course for a single-pilot multi-engine class rating shall include at least 7 hours of instruction in multi-engine aeroplane operations; and
 - (2) the flight training course for a single-pilot multi-engine class or type rating shall include at least 2 hours and 30 minutes of dual flight instruction under normal conditions of multi-engine aeroplane operations, and not less than 3 hours 30 minutes of dual flight instruction in engine failure procedures and asymmetric flight techniques.
- (b) for single-pilot aeroplanes (sea):
 - (1) the training course for single-pilot aeroplane (sea) ratings shall include theoretical knowledge and flight instruction; and
 - (2) the flight training for a class or type rating (sea) for single-pilot aero-planes (sea) shall include at least 8 hours of dual flight instruction if applicants hold the land version of the relevant class or type rating, or 10 hours if applicants do not hold such a rating; and
- (c) for single-pilot non-high-performance complex aeroplanes, single-pilot high-performance complex aeroplanes and multi-pilot aeroplanes, the training courses shall include UPRT theoretical knowledge and flight instruction related to the specificities of the relevant class or type. For the flight instruction, FSTDs may be used in accordance with Section A, point 18 of Appendix 9.

FCL.730.A Specific requirements for pilots undertaking a zero flight time type rating (ZFTT) course — aeroplanes

- (a) A pilot undertaking instruction at a ZFTT course shall have completed, on a multi-pilot turbo-jet aeroplane certificated to the standards of CS-25 or equivalent airworthiness code or on a multi-pilot turbo-prop aeroplane having a maximum certificated take-off mass of not less than 10 tonnes or a certificated passenger seating configuration of more than 19 passengers, at least:
 - (1) if an FFS qualified to level CG, C or interim C is used during the course:
 - (i) in the case of cruise relief co-pilots, 1 500 hours of flight time;
 - (ii) in all other cases, 1 500 hours flight time or 250 route sectors;
 - (2) if an FFS qualified to level DG or D is used during the course:
 - (i) in the case of cruise relief co-pilots, 750 hours of flight time;
 - (ii) in all other cases, 500 hours flight time or 100 route sectors.
- (b) When a pilot is changing from a turbo-prop to a turbo-jet aeroplane or from a turbo-jet to a turbo-prop aeroplane, additional simulator training shall be required.

FCL.735.A Multi-crew cooperation training course — aeroplanes

- (a) The MCC training course shall comprise at least:
- (1) 25 hours of theoretical knowledge instruction and exercises; and
 - (2) 20 hours of practical MCC training, or 15 hours in the case of student pilots attending an ATP integrated course.

An FNPT II MCC or an FFS shall be used. When the MCC training is combined with initial type rating training, the practical MCC training may be reduced to no less than 10 hours if the same FFS is used for both the MCC and type rating training.

- (b) The MCC training course shall be completed within 6 months at an ATO.
- (c) Unless the MCC course has been combined with a type rating course, on completion of the MCC training course the applicant shall be given a certificate of completion.
- (d) An applicant having completed MCC training for any other category of aircraft shall not be required to comply with the requirement in (a)(1).

FCL.740.A Revalidation of class and type ratings — aeroplanes

- (a) Revalidation of multi-engine class ratings and type ratings. For revalidation of multi-engine class ratings and type ratings, the applicant shall:
- (1) pass a proficiency check in accordance with Appendix 9 or complete EBT practical assessment in accordance with Appendix 10 in the relevant class or type of aeroplane or an FSTD representing that class or type, within the 3 months immediately preceding the expiry date of the rating; and
 - (2) complete during the period of validity of the rating, at least:
 - (i) 10 route sectors as pilot of the relevant class or type of aeroplane; or
 - (ii) 1 route sector as pilot of the relevant class or type of aeroplane or FFS, flown with an examiner. This route sector may be flown during the proficiency check.
 - (3) A pilot working for a commercial air transport operator approved in accordance with the applicable air operations requirements who has passed the operators proficiency check combined with the proficiency check for the revalidation of the class or type rating shall not be required to comply with the requirement in (2).
 - (4) The revalidation of a BIR or an IR(A), if held, may be combined with a proficiency check for the revalidation of a class or type rating.
- (b) Revalidation of single-pilot single-engine class ratings.
- (1) SEP aeroplane class ratings and TMG class ratings. For the revalidation of SEP aeroplane class ratings or TMG class ratings, applicants shall:
 - (i) within the 3 months preceding the expiry date of the rating, pass a proficiency check in the relevant class in accordance with Appendix 9 to this regulation with an examiner; or

- (ii) within the 12 months preceding the expiry date of the rating, complete 12 hours of flight time in the relevant class, including the following:
 - (A) 6 hours as PIC;
 - (B) 12 take-offs and 12 landings;
 - (C) refresher training of at least 1 hour of total flight time with and to the satisfaction of a flight instructor (FI) or a class rating instructor (CRI) who shall select those flight exercises that allow the applicant to refresh their competence in safely operating the aircraft and applying normal, abnormal and emergency procedures. Applicants shall be exempted from this refresher training if they have passed any of the following, in any class or type of aeroplane:
 - (1) a class or type rating proficiency check;
 - (2) a skill test;
 - (3) an EBT practical assessment;
 - (4) an assessment of competence.
- (2) When applicants hold both an SEP aeroplane-land class rating and a TMG class rating, they may complete the requirements of point (1) in either class or a combination of those classes, and achieve revalidation of both ratings.
- (3) Single-pilot single-engine turbo-prop aeroplanes. For revalidation of single-engine turbo-prop class ratings applicants shall pass a proficiency check on the relevant class in accordance with Appendix 9 to this regulation with an examiner, within the 3 months preceding the expiry date of the rating.
- (4) When applicants hold both an SEP aeroplane-land class rating and an SEP aeroplane-sea class rating, they may complete the requirements of point (1)(ii) in either class or a combination of those classes, and achieve the fulfilment of those requirements for both ratings. At least 1 hour of required PIC time and 6 of the required 12 take-offs and 12 landings shall be completed in each class.
- (5) The proficiency check for the revalidation of a single-pilot single-engine aeroplane class rating may be combined with the proficiency check for the revalidation of a BIR, in accordance with point FCL.835(g)(8).
- (c) Applicants who fail to achieve a pass in all sections of a proficiency check before the expiry date of a class or type rating shall not exercise the privileges of that rating until a pass in the proficiency check has been achieved.

FCL.745.A Advanced UPRT course — aeroplanes

- (a) The advanced UPRT course shall be completed at an ATO and shall comprise at least:
 - (1) 5 hours of theoretical knowledge instruction;
 - (2) pre-flight briefings and post-flight debriefings; and

- (3) 3 hours of dual flight instruction with a flight instructor for aeroplanes FI(A) qualified in accordance with point FCL.915(e) and consisting of advanced UPRT in an aeroplane qualified for the training task. Flight time that does not include advanced UPRT but serves to go to or return from the UPRT training area shall not count towards those 3 hours.
- (b) Upon completion of the UPRT course, applicants shall be issued with a certificate of completion by the ATO.

SECTION 3*Specific requirements for the helicopter category***FCL.720.H Experience requirements and prerequisites for the issue of type ratings — helicopters**

Unless otherwise determined in the OSD, an applicant for the issue of the first helicopter type rating shall comply with the following experience requirements and prerequisites for the issue of the relevant rating:

- (a) Multi-pilot helicopters. An applicant for a type rating for a multi-pilot helicopter type shall, before starting the type rating training course:
 - (1) have at least 70 hours as PIC on helicopters;
 - (2) except when the type rating course is combined with an MCC course:
 - (i) hold a certificate of satisfactory completion of an MCC course in helicopters; or
 - (ii) have completed at least 500 hours of flight time as a pilot in multi-pilot operations in any aircraft category.
 - (3) have passed the ATPL(H) theoretical knowledge examinations.
- (b) A graduate from an ATP(H)/IR, ATP(H), CPL(H)/IR or CPL(H) integrated course and who does not comply with the requirement of (a)(1), shall be entitled to undergo the type rating training course for a multi-pilot helicopter type rating and shall have the type rating issued with the privileges limited to exercising functions as co-pilot only. The limitation shall be removed once the pilot has complied with all of the following:
 - (1) completed 70 hours as PIC or pilot-in-command under supervision of helicopters;
 - (2) passed the multi-pilot skill test on the applicable helicopter type as PIC.
- (c) Multi-engine helicopters. An applicant for the issue of a first type rating for a multi-engine helicopter shall:
 - (1) before starting flight training:
 - (i) have passed the ATPL(H) theoretical knowledge examinations; or
 - (ii) hold a certificate of completion of a pre-entry course conducted by an ATO. The course shall cover the following subjects of the ATPL(H) theoretical knowledge course:
 - Aircraft General Knowledge: airframe/systems/powerplant, and instrument/electronics,
 - Flight Performance and Planning: mass and balance, performance;
 - (2) in the case of applicants who have not completed an ATP(H)/IR, ATP(H), or CPL(H)/IR integrated training course, have completed at least 70 hours as PIC on helicopters.

FCL.735.H Multi-crew cooperation training course — helicopters

- (a) The MCC training course shall comprise at least:
- (1) for MCC/IR:
 - (i) 25 hours of theoretical knowledge instruction and exercises; and
 - (ii) 20 hours of practical MCC training or 15 hours, in the case of student pilots attending an ATP(H)/IR integrated course. When the MCC training is combined with the initial type rating training for a multi-pilot helicopter, the practical MCC training may be reduced to not less than 10 hours if the same FSTD is used for both MCC and type rating;
 - (2) for MCC/VFR:
 - (i) 25 hours of theoretical knowledge instruction and exercises; and
 - (ii) 15 hours of practical MCC training or 10 hours, in the case of student pilots attending an ATP(H)/IR integrated course. When the MCC training is combined with the initial type rating training for a multi-pilot helicopter, the practical MCC training may be reduced to not less than 7 hours if the same FSTD is used for both MCC and type rating.
- (b) The MCC training course shall be completed within 6 months at an ATO.
An FNPT II or III qualified for MCC, an FTD 2/3 or an FFS shall be used.
- (c) Unless the MCC course has been combined with a multi-pilot type rating course, on completion of the MCC training course the applicant shall be given a certificate of completion.
- (d) An applicant having completed MCC training for any other category of aircraft shall not be required to comply with the requirement in (a)(1)(i) or (a)(2)(i), as applicable.
- (e) An applicant for MCC/IR training who has completed MCC/VFR training shall not be required to comply the requirement in (a)(1)(i), and shall complete 5 hours of practical MCC/IR training.

FCL.740.H Revalidation of type ratings — helicopters

- (a) Revalidation. For revalidation of type ratings for helicopters, applicants shall comply with one of the following, as applicable:
- (1) they shall take the following steps:
 - (i) within the validity period of the type rating, complete at least 2 hours as pilot in the relevant helicopter type;
 - (ii) within the 3 months immediately preceding the expiry date of the type rating, pass a proficiency check:
 - (A) which is conducted in accordance with Appendix 9 in the relevant type of helicopter or an FSTD representing that type;
 - (B) the duration of which may be counted towards the flight time specified in point (i);
 - (2) for type ratings for single-engine helicopters up to a maximum take-off mass of 3 175 kg, they shall meet one of the following conditions:
 - (i) comply with point (a)(1);

- (ii) complete, in the relevant type of helicopter, both of the following:
 - (A) within the validity period of the type rating, at least 6 hours as PIC;
 - (B) within the 3 months immediately preceding the expiry date of the rating, a refresher training of at least 1 hour of total flight time with and to the satisfaction of an instructor who shall select those flight exercises that allow the applicant to refresh their competence in safely operating the aircraft and applying normal, abnormal and emergency procedures. Applicants may choose to complete the refresher training in the aircraft or an FSTD representing the relevant type, or in a combination of both.
- (b) When applicants hold more than one type rating for SEP helicopters, they may achieve revalidation of all the relevant type ratings by passing the proficiency check in accordance with point (a)(1)(ii) or completing the refresher training in accordance with point (a)(2)(ii)(B) in only one of the relevant types held, provided that they have completed either of the following flight time as PIC in each of the other relevant types during the validity period:
 - (1) if they completed a proficiency check in accordance with point (a)(1)(ii), at least 2 hours;
 - (2) if they completed a refresher training in accordance with point (a)(2)(ii)(B), at least 6 hours.

The proficiency check or the refresher training, as applicable, shall be performed each time on a different type. The new validity period of all type ratings revalidated in accordance with this point shall commence together with the validity period of the type rating for which the proficiency check or the refresher training is performed.
- (c) When applicants hold more than one type rating for SET helicopters with a maximum certificated take-off mass up to 3 175 kg, they may achieve revalidation of all the relevant type ratings by passing the proficiency check in accordance with point (a)(1)(ii) or completing the refresher training in accordance with point (a)(2)(ii)(B) in only one of the relevant types held, provided that they have completed all of the following:
 - (1) 300 hours as PIC on helicopters;
 - (2) 15 hours on each of the types held;
 - (3) either of the following flight times as PIC in each of the other relevant types during the validity period:
 - (i) if they completed a proficiency check in accordance with point (a)(1)(ii), at least 2 hours;
 - (ii) if they completed a refresher training in accordance with point (a)(2)(ii)(B), at least 6 hours.

The proficiency check shall be performed each time on a different type. The new validity period of all type ratings revalidated in accordance with this point shall commence together with the validity period of the type rating for which the proficiency check or the refresher training is completed.

- (d) Applicants who successfully complete a skill test for the issue of an additional type rating or a proficiency check for the renewal of a type rating shall achieve revalidation for the relevant type ratings already held in the common groups, as specified in points (b) and (c).

The new validity period of all type ratings revalidated in accordance with this point shall commence together with the validity period of the type rating for which the skill test or proficiency check is completed.

- (e) The revalidation of an IR(H), if held, may be combined with a proficiency check for a type rating.
- (f) Applicants who fail to achieve a pass in all sections of a proficiency check before the expiry date of a type rating shall not exercise the privileges of that rating until a pass in the proficiency check has been achieved. In the case of points (b) and (c), applicants shall not exercise their privileges in any of the types.

SECTION 4*Specific requirements for the powered-lift aircraft category***FCL.720.PL Experience requirements and prerequisites for the issue of type ratings — powered-lift aircraft**

Unless otherwise determined in the OSD, an applicant for the first issue of a powered-lift type rating shall comply with the following experience requirements and prerequisites:

- (a) for pilots of aeroplanes:
 - (1) hold a CPL/IR(A) with ATPL theoretical knowledge or an ATPL(A);
 - (2) hold a certificate of completion of an MCC course;
 - (3) have completed more than 100 hours as pilot on multi-pilot aeroplanes;
 - (4) have completed 40 hours of flight instruction in helicopters;
- (b) for pilots of helicopters:
 - (1) hold a CPL/IR(H) with ATPL theoretical knowledge or an ATPL/IR(H);
 - (2) hold a certificate of completion of an MCC course;
 - (3) have completed more than 100 hours as a pilot on multi-pilot helicopters;
 - (4) have completed 40 hours of flight instruction in aeroplanes;
- (c) for pilots qualified to fly both aeroplanes and helicopters:
 - (1) hold at least a CPL(H);
 - (2) hold an IR and ATPL theoretical knowledge or an ATPL in either aeroplanes or helicopters;
 - (3) hold a certificate of completion of an MCC course in either helicopters or aeroplanes;
 - (4) have completed at least 100 hours as a pilot on multi-pilot helicopters or aeroplanes;
 - (5) have completed 40 hours of flight instruction in aeroplanes or helicopters, as applicable, if the pilot has no experience as ATPL or on multi-pilot aircraft.

FCL.725.PL Flight instruction for the issue of type ratings — powered-lift aircraft

The flight instruction part of the training course for a powered-lift type rating shall be completed in both the aircraft and an FSTD representing the aircraft and adequately qualified for this purpose.

FCL.740.PL Revalidation of type ratings — powered-lift aircraft

- (a) Revalidation. For revalidation of powered-lift type ratings, the applicant shall:
 - (1) pass a proficiency check in accordance with Appendix 9 to this regulation in the relevant type of powered-lift within the 3 months immediately preceding the expiry date of the rating;
 - (2) complete during the period of validity of the rating, at least:
 - (i) 10 route sectors as pilot of the relevant type of powered-lift aircraft; or

- (ii) 1 route sector as pilot of the relevant type of powered-lift aircraft or FFS, flown with an examiner. This route sector may be flown during the proficiency check.
- (3) A pilot working for a commercial air transport operator approved in accordance with the applicable air operations requirements who has passed the operators proficiency check combined with the proficiency check for the revalidation of the type rating shall not be required to comply with the requirement in (2).
- (b) An applicant who fails to achieve a pass in all sections of a proficiency check before the expiry date of a type rating shall not exercise the privileges of that rating until a pass in the proficiency check has been achieved.

SECTION 5*Specific requirements for the airship category***FCL.720.As Prerequisites for the issue of type ratings — airships**

Unless otherwise determined in the OSD, an applicant for the first issue of an airship type rating shall comply with the following experience requirements and prerequisites:

- (a) for multi-pilot airships:
 - (1) have completed 70 hours of flight time as PIC on airships;
 - (2) hold a certificate of satisfactory completion of MCC on airships.
 - (3) An applicant who does not comply with the requirement in (2) shall have the type rating issued with the privileges limited to exercising functions as co-pilot only. The limitation shall be removed once the pilot has completed 100 hours of flight time as PIC or pilot-in-command under supervision of airships.

FCL.735.As Multi-crew cooperation training course — airships

- (a) The MCC training course shall comprise at least:
 - (1) 12 hours of theoretical knowledge instruction and exercises; and
 - (2) 5 hours of practical MCC training;An FNPT II, or III qualified for MCC, an FTD 2/3 or an FFS shall be used.
- (b) The MCC training course shall be completed within 6 months at an ATO.
- (c) Unless the MCC course has been combined with a multi-pilot type rating course, on completion of the MCC training course the applicant shall be given a certificate of completion.
- (d) An applicant having completed MCC training for any other category of aircraft shall not be required to comply with the requirements in (a).

FCL.740.As Revalidation of type ratings — airships

- (a) Revalidation. For revalidation of type ratings for airships, the applicant shall:
 - (1) pass a proficiency check in accordance with Appendix 9 to this regulation in the relevant type of airship within the 3 months immediately preceding the expiry date of the rating; and
 - (2) complete at least 2 hours as a pilot of the relevant airship type within the validity period of the rating. The duration of the proficiency check may be counted towards the 2 hours.
 - (3) The revalidation of an IR(As), if held, may be combined with a proficiency check for the revalidation of a class or type rating.
- (b) An applicant who fails to achieve a pass in all sections of a proficiency check before the expiry date of a type rating shall not exercise the privileges of that rating until a pass in the proficiency check has been achieved.

SUBPART I

ADDITIONAL RATINGS**FCL.800 Aerobatic rating**

- (a) Holders of a pilot licence with privileges to fly aeroplanes or TMGs shall undertake aerobatic flights only if they hold an aerobatic rating in accordance with this point.
- (b) Applicants for an aerobatic rating shall have completed:
 - (1) after the issue of the licence, at least 30 hours of flight time as PIC in aeroplanes or TMGs;
 - (2) a training course at an ATO, including:
 - (i) theoretical knowledge instruction appropriate for the rating;
 - (ii) at least 5 hours of aerobatic instruction in aeroplanes or TMGs flown with engine power.
- (c) The privileges of the aerobatic rating shall be limited to aerobatic flight in either aeroplanes or TMGs flown with engine power, depending on which aircraft the requirements of (b)(1) and (b)(2)(ii) were complied with. This limitation shall be lifted upon application if a pilot has successfully completed at least 3 dual training flights in aeroplanes or TMGs flown with engine power, as applicable, covering the full aerobatic training syllabus.
- (d) Applicants for an aerobatic rating who also hold a TMG class rating as well as advanced aerobatic privileges for sailplanes with basic and advance aerobatic privileges shall:
 - (1) be exempted from getting their aerobatic rating limited to aeroplanes, as specified in paragraph (c) if they have complied with the requirements of (b)(1) and (b)(2)(ii) in aeroplanes, or
 - (2) receive full credit towards the requirements in paragraph (b) for the issue of an aerobatic rating restricted to TMGs flown with engine power. This limitation shall be lifted upon application if a pilot has completed the training as specified in paragraph (c).

FCL.805 Sailplane towing and banner towing ratings

- (a) Holders of a pilot licence with privileges to fly aeroplanes or TMGs shall only tow sailplanes or banners when they hold the appropriate sailplane towing or banner towing rating.
- (b) Applicants for a sailplane towing rating shall have completed:
 - (1) at least 30 hours of flight time as PIC and 60 take-offs and landings in aeroplanes, if the activity is to be carried out in aeroplanes, or in TMGs, if the activity is to be carried out in TMGs, completed after the issue of the licence;
 - (2) a training course at an ATO, including:
 - (i) theoretical knowledge instruction on towing operations and procedures;
 - (ii) at least 10 instruction flights towing a sailplane, including at least 5 dual instruction flights; and

- (iii) except for holders of an SPL, 5 familiarisation flights in a sailplane which is launched by an aircraft.
- (c) Applicants for a banner towing rating shall have completed:
 - (1) at least 100 hours of flight time and 200 take-offs and landings as PIC on aeroplanes or TMG, after the issue of the licence. At least 30 of these hours shall be in aeroplanes, if the activity is to be carried out in aeroplanes, or in TMG, if the activity is to be carried out in TMGs;
 - (2) a training course at an ATO, including:
 - (i) theoretical knowledge instruction on towing operations and procedures;
 - (ii) at least 10 instruction flights towing a banner, including at least 5 dual flights.
- (d) The privileges of the sailplane and banner towing ratings shall be limited to aeroplanes or TMGs appropriately to aircraft on which the flight instruction was completed. For banner towing, the privileges shall be limited to the towing method used for flight instruction. The privileges shall be extended if pilots have successfully completed at least three dual training flights covering the full towing training syllabus in either aircraft and towing method for banner towing.
- (e) In order to exercise the privileges of the sailplane or banner towing ratings, the holder of the rating shall have completed a minimum of 5 tows during the last 24 months.
- (f) When the pilot does not comply with the requirement in (e), before resuming the exercise of his/her privileges, the pilot shall complete the missing tows with or under the supervision of an instructor.
- (g) Applicants for a sailplane towing or banner towing rating on TMGs in accordance with this point shall receive full credit towards the requirements of paragraph (b) or (c), as applicable, if they hold a sailplane towing or banner towing rating, as applicable, or if they have fulfilled all the requirements for the issue of that rating.

FCL.810 Night rating

- (a) Aeroplanes, TMGs, airships.
 - (1) Applicants shall have completed a training course within a period of up to 6 months at an ATO to exercise the privileges of an LAPL or a PPL for aeroplanes, TMGs or airships in VFR conditions at night. The course shall comprise:
 - (i) theoretical knowledge instruction;
 - (ii) at least 5 hours of flight time in the appropriate aircraft category at night, including at least 3 hours of dual instruction, including at least 1 hour of cross-country navigation with at least one dual cross-country flight of at least 50 km (27 NM) and 5 solo take-offs and 5 solo full-stop landings.
 - (2) Before completing the training at night, LAPL holders shall have completed the basic instrument flight training required for the issue of the PPL.
 - (3) When applicants hold both a SEP aeroplane-land and a TMG class rating, they may meet the requirements in point (1) in either class or both classes.

- (4) Applicants for a night rating for aeroplanes or TMGs in accordance with this subparagraph shall receive full credit towards the requirements of subparagraphs (1) and (2) if they hold a TMG night rating or if they have fulfilled all the requirements for the issue of that rating.
- (b) Helicopters. If the privileges of a PPL for helicopters are to be exercised in VFR conditions at night, the applicant shall have:
- (1) completed at least 100 hours of flight time as pilot in helicopters after the issue of the licence, including at least 60 hours as PIC on helicopters and 20 hours of cross-country flight;
 - (2) completed a training course at an ATO. The course shall be completed within a period of six (6) months and comprise:
 - (i) 5 hours of theoretical knowledge instruction;
 - (ii) 10 hours of helicopter dual instrument instruction time; and
 - (iii) 5 hours of flight time at night, including at least 3 hours of dual instruction, including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing.
- An applicant that holds or has held an IR in an aeroplane or TMG shall be credited with 5 hours towards the requirement in (2)(ii) above.
- (c) Gyroplanes. If the privileges of a GPL are to be exercised in VFR conditions at night, applicants shall have:
- (1) completed at least 50 hours of flight time as pilot in gyroplanes after the issue of the licence, including at least 20 hours as PIC on gyroplanes and 20 hours of cross-country flight;
 - (2) completed a training course at an ATO. The course shall be completed within a period of 6 months and comprise:
 - (i) 5 hours of theoretical knowledge instruction;
 - (ii) 3 hours of gyroplane dual instrument instruction time; and
 - (iii) 5 hours of flight time at night, including at least 3 hours of dual instruction, including at least 1 hour of cross-country navigation and five solo night circuits; each circuit shall include a take-off and a landing.

An applicant that holds or has held an instrument rating in an aeroplane or a helicopter shall be credited with 2 hours towards the requirement in point (2)(ii) above. An applicant that holds a night rating in an aeroplane, helicopter or TMG shall receive a full credit for the element specified in point (2)(i).

FCL.815 Mountain rating

(Reserved).

FCL.820 Flight test rating

(Reserved).

FCL.835 Basic instrument rating (BIR)

(a) Privileges and conditions

- (1) The privileges of a BIR holder are to conduct flights under IFR on single-pilot aeroplanes for which class ratings are held, with the exception of the following:
 - (i) high-performance aeroplanes;
 - (ii) aeroplane variants if OSD or relevant manufacturer document have determined that an IR is required.
- (2) BIR privileges shall only be exercised in accordance with point FCL.205.A.
- (3) BIR privileges may be exercised at night only if the pilot holds a night rating in accordance with point FCL.810.
- (4) The privileges of a multi-engine BIR shall also be valid on single-engine aeroplanes for which the pilot holds a valid single-engine class rating.
- (5) The exercise of BIR privileges shall be subject to all of the following conditions:
 - (i) the decision height (DH) or minimum descent height (MDH) used in aerodrome operating minima shall be at least 200 ft greater than what would otherwise be calculated according to Aerodrome operating minima in CAR-OPS regulation (reference to CAR-OPS-1.225, CAR-OPS-2.225, as appropriate; and
 - (ii) the visibility used in aerodrome operating minima shall not be less than 1 500 m;
 - (iii) the pilot-in-command shall not commence a flight under IFR or undertake a VFR-to-IFR transition, unless:
 - (A) at the aerodrome of departure, the visibility is at least 1 500 m and the cloud ceiling is at least 600 ft, or the published circling minimum applicable to the aeroplane category, whichever is the greater; and
 - (B) at the destination aerodrome and at any required alternate aerodrome the available current meteorological information indicates, for the period from 1 hour before until 1 hour after the estimated time of arrival, or from the actual time of departure to 1 hour after the estimated time of arrival, whichever period is shorter, a visibility of at least 1 500 m and a cloud ceiling of at least 600 ft, or the published circling minimum applicable to the aeroplane category, or the DH/MDH incremented by 200 ft in accordance with (i), whichever is the greater.

(b) Prerequisites. Applicants for the BIR shall hold at least a PPL(A).

(c) Training course. Applicants for the BIR shall have completed at an ATO:

- (1) theoretical knowledge instruction in accordance with point FCL.615(a); and
- (2) flight instruction that comprises the following instrument flight instruction modules:
 - (i) module 1 – the core flying training module of flight handling skills by sole reference to instruments;

- (ii) module 2 – the applied flying training module of IFR departure, holding, 2D and 3D approach procedures;
 - (iii) module 3 – the applied flying training module of en-route IFR flight procedures; and
 - (iv) module 4 – if a multi-engine BIR is sought, the applied flying training module with one engine inoperative shall include asymmetric instrument approach and go-around procedures; and
- (3) flight instruction that complies with the following requirements:
 - (i) The module specified in paragraph (c)(2)(i) shall be completed first. The modules specified in paragraphs (c)(2)(ii) and (c)(2)(iii), and, if applicable, (c)(2)(iv), may be completed in an order chosen by the applicant.
 - (ii) The modules specified in paragraph (c)(2) may be completed in aeroplanes, FSTDs or a combination of these. In any case, the applicant shall receive training in the aeroplane to be used for the skill test.
 - (iii) Prior to commencing the module specified in paragraph (c)(2)(iv), a pilot who does not hold a multi-engine aeroplane class or type rating shall have received the multi-engine training specified in Subpart H of this regulation.
- (d) Theoretical knowledge. Prior to taking the skill test and through examinations in the subjects referred to in point FCL.615(b), the applicants shall demonstrate a level of theoretical knowledge that is appropriate to the privileges granted. The theoretical knowledge examination shall consist of one examination paper associated with each module as specified in paragraphs (c)(2)(i), (c)(2)(ii) and (c)(2)(iii).
- (e) Skill test. After the completion of the training course specified in paragraph (c), the applicants shall pass a skill test in an aeroplane in accordance with Appendix 7 to this regulation. For a multi-engine BIR, the skill test shall be taken in a multi-engine aeroplane. For a single-engine BIR, the skill test shall be taken in a single-engine aeroplane. A multi-engine centreline thrust aeroplane shall be considered to be a single-engine aeroplane for the purposes of this paragraph.
- (f) By way of derogation from paragraph (d), holders of a single-engine BIR who also hold a multi-engine class rating and who wish to obtain a multi-engine BIR for the first time shall complete a training course at an ATO that comprises the training as specified in paragraph (c)(2)(iv) and shall pass the skill test referred to in paragraph (e).
- (g) Validity, revalidation and renewal
 - (1) A BIR shall be valid for 1 year.
 - (2) Applicants for the revalidation of a BIR shall:
 - (i) within a period of three months immediately preceding the expiry date of the rating, pass a proficiency check in accordance with Appendix 9 to this regulation; or
 - (ii) within the validity period, complete 6 hours as PIC under IFR including three instrument approach procedures and complete a training flight of at least one hour with an instructor who holds privileges to provide training for the BIR.

- (3) For each alternate subsequent revalidation, the holder of the BIR shall pass a proficiency check in accordance with paragraph (g)(2)(i) in an aeroplane.
- (4) If a pilot chooses to fulfil the revalidation requirements specified in paragraph (g)(2)(i) earlier than what is prescribed in that paragraph, the new validity period shall commence from the date of the proficiency check.
- (5) Applicants who fail to pass the relevant sections of a BIR proficiency check before the expiry date of the BIR shall not exercise the BIR privileges until they have passed the proficiency check.
- (6) If a BIR has expired, in order to renew their privileges, applicants shall:
 - (i) where necessary to reach the level of proficiency needed, complete refresher training provided by an ATO or, if the BIR is expired for three years or less, by an instructor who holds privileges to provide training for the BIR; and
 - (ii) pass a proficiency check in an aeroplane.
- (7) For a multi-engine BIR, the proficiency check for the revalidation or renewal as well as the flying training required in paragraph (g)(2)(ii) shall be completed in a multi-engine aeroplane.
- (8) The proficiency check for the revalidation or renewal of a BIR may be combined with a proficiency check for the revalidation or renewal of a single-pilot aeroplane class rating on which BIR privileges may be exercised in accordance with point FCL.835(a)(1).
- (h) Applicants for the BIR who hold a PPL or CPL issued in accordance with this regulation and a valid IR(A) issued in accordance with the requirements of Annex 1 to the Chicago Convention by a third country ICAO member state may be credited in full towards the training course referred to in paragraph (c)(2). In order to be issued with the BIR, the applicants shall:
 - (1) successfully complete the skill test referred to in paragraph (e);
 - (2) demonstrate orally to the examiner during the skill test that they have acquired an adequate level of theoretical knowledge of air law, meteorology, and flight planning and performance; and
 - (3) have experience of at least 25 hours of flight time under IFR as PIC on aeroplanes.
- (j) The holder of an IR shall receive full credits for the requirement in paragraph (c)(2).

SUBPART J

INSTRUCTORS**SECTION 1***Common requirements***FCL.900 Instructor certificates**

(a) General. A person shall only carry out:

(1) flight instruction in aircraft when he/she holds:

- (i) a pilot licence issued or accepted in accordance with this Regulation;
- (ii) an instructor certificate appropriate to the instruction given, issued in accordance with this Subpart;

(2) synthetic flight instruction or MCC instruction when he/she holds an instructor certificate appropriate to the instruction given, issued in accordance with this Subpart.

(b) Special conditions:

(1) The CAA may issue a specific certificate granting privileges for flight instruction when compliance with the requirements established in this Subpart is not possible in the case of the introduction of:

- (i) new aircraft in the Sultanate of Oman or in an operator's fleet; or
- (ii) new training courses in this Regulation.

Such a certificate shall be limited to the training flights necessary for the introduction of the new type of aircraft or the new training course and its validity shall not, in any case, exceed 1 year.

(2) Holders of a certificate issued in accordance with (b)(1) who wish to apply for the issue of an instructor certificate shall comply with the prerequisites and revalidation requirements established for that category of instructor. Notwithstanding FCL.905.TRI(b), a TRI certificate issued in accordance with this (sub)paragraph will include the privilege to instruct for the issue of a TRI or SFI certificate for the relevant type.

(c) Instruction provided outside the territory of the Sultanate of Oman:

(1) By way of derogation from point (a), in the case of flight instruction provided during a training course approved in accordance with this Regulation outside the territory for which Member States are responsible under the Chicago Convention, the CAA shall issue an instructor certificate to applicants who:

(i) holds a pilot licence that meets all of the following criteria:

- (A) it complies with Annex 1 to the Chicago Convention;
- (B) in any case, it is at least a CPL in the relevant aircraft category with a relevant rating or certificate;

- (ii) complies with the requirements established in this Subpart for the issue of the relevant instructor certificate;
 - (iii) demonstrates to the CAA an adequate level of knowledge of Sultanate of Oman's aviation safety rules to be able to exercise instructional privileges in accordance with this Regulation.
- (2) The certificate shall be limited to providing flight instruction during a training course approved in accordance with this Regulation which meets all of the following conditions:
- (i) it is provided outside the territory of Oman;
 - (ii) it is provided to student pilots who have sufficient knowledge of the language in which flight instruction is provided.

FCL.915 General prerequisites and requirements for instructors

(a) General.

Applicants for the issue of an instructor certificate shall be at least 18 years of age.

(b) Additional requirements for instructors that provide flight instruction in aircraft.

Applicants for the issue of or holders of an instructor certificate with privileges to conduct flight instruction in an aircraft shall:

- (1) for licence training, hold at least the licence or, in the case of point FCL.900(c), the equivalent licence, for which flight instruction is to be given;
 - (2) for a rating training, hold the relevant rating or, in the case of point FCL.900(c), the equivalent rating, for which flight instruction is to be given;
 - (3) have:
 - (i) completed at least 15 hours of flight time as pilots of the class or type of aircraft on which flight instruction is to be given, of which a maximum of 7 hours may be in an FSTD representing the class or type of aircraft, if applicable; or
 - (ii) passed an assessment of competence for the relevant category of instructor on that class or type of aircraft;
 - (4) be entitled to act as PIC in the aircraft during such flight instruction; and
 - (5) when providing flight instruction in a variant of the SEP aeroplane class with a particular type of engine referred to in Article 2, "SEP aeroplane", have complied with one of the following conditions:
 - (i) completed at least 5 hours of flight time as pilots in that variant;
 - (ii) passed an assessment of competence for the relevant category of instructor in that variant.
- (c) Credit towards further instructor certificates and for the purpose of revalidation:
- (1) Full credit towards the teaching and learning skills may be granted to:
 - (i) holders of an instructor certificate who apply for further instructor certificates; and

- (ii) applicants for an instructor certificate who already hold an instructor certificate issued in accordance with BPL and SPL regulation.
- (2) Hours flown as an examiner during skill tests or proficiency checks shall be credited in full towards revalidation requirements for all instructor certificates held.
- (d) Credit for extension to further types shall take into account the relevant elements as defined in the operational suitability data (OSD) or acceptable documents by CAA.
- (e) Additional requirements for instructing in a training course in accordance with FCL.745.A:
 - (1) In addition to (b), before acting as instructors for a training course according to FCL.745.A, holders of an instructor certificate shall:
 - (i) have at least 500 hours of flight time as pilots of aeroplanes, including 200 hours of flight instruction;
 - (ii) after complying with the experience requirements in point (e)(1)(i), have completed a UPRT instructor training course at an ATO, during which the competence of applicants shall have been assessed continuously; and
 - (iii) upon completion of the course, have been issued with a certificate of course completion by the ATO, whose Head of Training (HT) shall have entered the privileges specified in point (e)(1) in the logbook of the applicants.
 - (2) The privileges referred to in point (e)(1) shall only be exercised if instructors have, during the last year, received refresher training at an ATO during which the competence required to instruct on a course in accordance with point FCL.745.A is assessed to the satisfaction of the HT.
 - (3) Instructors holding the privileges specified in point (e)(1) may act as instructors for a course as specified in point (e)(1)(ii), provided that they:
 - (i) have 25 hours of flight instruction experience during training according to FCL.745.A;
 - (ii) have completed an assessment of competence for this privilege; and
 - (iii) comply with the recency requirements in point (e)(2).
 - (4) These privileges shall be entered in the logbook of the instructors and signed by the examiner.

FCL.920 Instructor competencies and assessment

All instructors shall be trained to achieve the following competences:

- Prepare resources,
- Create a climate conducive to learning,
- Present knowledge,
- Integrate Threat and Error Management (TEM) and crew resource management,
- Manage time to achieve training objectives,
- Facilitate learning,

- Assess trainee performance,
- Monitor and review progress,
- Evaluate training sessions,
- Report outcome.

FCL.925 Additional requirements for instructors for the MPL

(a) Instructors conducting training for the MPL shall:

- (1) have successfully completed an MPL instructor training course at an ATO; and
- (2) additionally, for the basic, intermediate and advanced phases of the MPL integrated training course:
 - (i) be experienced in multi-pilot operations; and
 - (ii) have completed initial crew resource management training with a commercial air transport operator approved in accordance with the applicable air operations requirements.

(b) MPL instructors training course

- (1) The MPL instructor training course shall comprise at least 14 hours of training.

Upon completion of the training course, the applicant shall undertake an assessment of instructor competencies and of knowledge of the competency-based approach to training.

- (2) The assessment shall consist of a practical demonstration of flight instruction in the appropriate phase of the MPL training course. This assessment shall be conducted by an examiner qualified in accordance with Subpart K.

- (3) Upon successful completion of the MPL training course, the ATO shall issue an MPL instructor qualification certificate to the applicant.

(c) In order to maintain the privileges, the instructor shall have, within the preceding 12 months, conducted within an MPL training course:

- (1) 1 simulator session of at least 3 hours; or
- (2) 1 air exercise of at least 1 hour comprising at least 2 take-offs and landings.

(d) If the instructor has not fulfilled the requirements of (c), before exercising the privileges to conduct flight instruction for the MPL he/she shall:

- (1) receive refresher training at an ATO to reach the level of competence necessary to pass the assessment of instructor competencies; and
- (2) pass the assessment of instructor competencies as set out in (b)(2).

FCL.930 Training course

(a) An applicant for an instructor certificate shall have completed a course of theoretical knowledge and flight instruction at an ATO.

- (b) In addition to the specific elements set out in this Regulation for each category of instructor, the training course shall contain the elements required in point FCL.920.

FCL.935 Assessment of competence

- (a) Except for the multi-crew cooperation instructor (MCCI) and the synthetic training instructor (STI), an applicant for an instructor certificate shall pass an assessment of competence in the appropriate aircraft category, in the relevant class or type or in the appropriate FSTD, to demonstrate to an examiner qualified in accordance with Subpart K of this Regulation the ability to instruct a student pilot to the level required for the issue of the relevant licence, rating or certificate.
- (b) This assessment shall include:
 - (1) the demonstration of the competencies described in FCL.920, during pre-flight, post-flight and theoretical knowledge instruction;
 - (2) oral theoretical examinations on the ground, pre-flight and post-flight briefings and in-flight demonstrations in the appropriate aircraft class, type or FSTD;
 - (3) exercises adequate to evaluate the instructor's competencies.
- (c) The assessment shall be performed on the same class or type of aircraft or FSTD used for the flight instruction.
- (d) When an assessment of competence is required for revalidation of an instructor certificate, an applicant who fails to achieve a pass in the assessment before the expiry date of an instructor certificate shall not exercise the privileges of that certificate until the assessment has successfully been completed.

FCL.940 Validity of instructor certificates

With the exception of the MI, and without prejudice to points FCL.900 (b)(1) and FCL.915 (e)(2), instructor certificates shall be valid for a period of 3 years.

FCL.945 Obligations for instructors

Upon completion of the training flight for the revalidation of an SEP aeroplane or TMG class rating in accordance with FCL.740.A(b)(1)(ii)(C) or for the revalidation of a single-engine helicopter type rating in accordance with point FCL.740.H(a)(2)(ii)(B), and only in the event of fulfilment of all the other revalidation criteria required by FCL.740.A(b)(1)(ii) or point FCL.740.H(a)(2)(ii), as applicable, the instructor shall endorse the applicant's licence with the new expiry date of the rating, if specifically authorised for that purpose by the CAA.

SECTION 2***Specific requirements for the flight instructor — FI*****FCL.905.FI FI — Privileges and conditions**

The privileges of FIs are to conduct flight instruction for the issue, revalidation or renewal of:

- (a) a PPL, LAPL and GPL in the appropriate aircraft category;
- (b) class and type ratings for single-pilot aircraft, except for single-pilot high-performance complex aeroplanes;
- (c) class and type ratings for single-pilot aeroplanes, except for single-pilot high-performance complex aeroplanes, in multi-pilot operations, provided that FIs meet any of the following conditions:
 - (1) hold or have held a TRI certificate for multi-pilot aeroplanes;
 - (2) have completed all of the following:
 - (i) at least 500 hours as pilots in multi-pilot operations on aeroplanes;
 - (ii) the training course for an MCCI in accordance with point FCL.930.MCCI;
- (d) type ratings for single or multi-pilot airships;
- (e) a CPL in the appropriate aircraft category, provided that FIs have completed at least 200 hours of flight instruction in that aircraft category;
- (f) the night rating, provided that FIs meet all of the following conditions:
 - (1) are qualified to fly at night in the appropriate aircraft category;
 - (2) have demonstrated the ability to instruct at night to an FI qualified in accordance with point (j);
 - (3) comply with the night experience requirement laid down in point FCL.060(b)(2);
- (g) a towing or aerobatic rating, provided that such privileges are held and the FI has demonstrated the ability to instruct for that rating to an FI who is qualified in accordance with point (j);
- (h) a BIR or an IR in the appropriate aircraft category, provided that FI meets the following conditions:
 - (1) they have completed as student pilots the IRI training course and have passed an assessment of competence for the IRI certificate;
 - (2) they comply with points FCL.915.CRI(a), FCL.930.CRI and FCL.935 in the case of multi-engine aeroplanes and with points FCL.910.TRI(c)(1) and FCL.915.TRI(d)(2) in the case of multi-engine helicopters;

In addition to conditions (1) and (2):

- (3) if during an approved training course at an ATO, the FI is providing training in FSTDs or supervising SPIC training flights that take place under IFR, the FI shall have completed at least 50 hours of flight time under IFR after the issuance of the BIR or the IR, of which a maximum of 10 hours may be instrument ground time in an FFS, an FTD 2/3 or an FNPT II;

- (4) if the FI is providing training in an aircraft, the FI shall have completed at least 200 hours of flight time under IFR, of which up to 50 hours may be instrument ground time in an FFS, an FTD 2/3 or an FNPT II;
- (i) single-pilot multi-engine class or type ratings, except for single-pilot high-performance complex aeroplanes, provided that they meet the following conditions:
 - (1) in the case of aeroplanes, comply with points FCL.915.CRI(a), FCL.930.CRI and FCL.935;
 - (2) in the case of helicopters, comply with points FCL.910.TRI(c)(1) and FCL.915.TRI(d)(2);
- (j) an FI, an IRI, a CRI or an STI certificate provided that they meet all of the following conditions:
 - (1) they have completed at least 500 hours of flight instruction in the appropriate aircraft category;
 - (2) they have passed an assessment of competence in accordance with point FCL.935 in the appropriate aircraft category to demonstrate to a flight instructor examiner (FIE) the ability to instruct for the relevant certificate;
- (k) an MPL, provided that the FIs meet all of the following conditions:
 - (1) for the core flying phase of the training, have completed at least 500 hours of flight time as a pilot of aeroplanes, including at least 200 hours of flight instruction;
 - (2) for the basic phase of the training:
 - (i) hold a multi-engine aeroplane IR and the privilege to instruct for an IR;
 - (ii) have completed at least 1 500 hours of flight time in multi-crew operations;
 - (3) in the case of FIs already qualified to instruct on ATP(A) or CPL(A)/IR integrated courses, the requirement in point (2)(ii) may be replaced by the completion of a structured course of training consisting of:
 - (i) MCC qualification;
 - (ii) observation of five sessions of flight instruction in Phase 3 of an MPL course;
 - (iii) observation of five sessions of flight instruction in Phase 4 of an MPL course;
 - (iv) observation of five operator recurrent line-oriented flight training sessions;
 - (v) the content of the MCCI course.

In this case, FIs shall conduct their first five instructor sessions under the supervision of a TRI(A), an MCCI(A) or an SFI(A) qualified for MPL flight instruction.

FCL.910.FI FI — Restricted privileges

- (a) An FI shall have his or her privileges limited to conducting flight instruction under the supervision of an FI for the same category of aircraft nominated by the ATO for this purpose, in the following cases:
 - (1) for the issue of the PPL and LAPL;
 - (2) in all integrated courses at PPL level, in case of aeroplanes and helicopters;

- (3) for class and type ratings for single-pilot, single-engine aircraft, except for single-pilot high-performance complex aeroplanes;
- (4) for the night, towing or aerobatic ratings.
- (b) While conducting training under supervision, in accordance with (a), the FI shall not have the privilege to authorise student pilots to conduct first solo flights and first solo cross-country flights.
- (c) The limitations in (a) and (b) shall be removed from the FI certificate when the FI has completed at least:
 - (1) for the FI(A), 100 hours of flight instruction in aeroplanes or TMGs and, in addition has supervised at least 25 student solo flights;
 - (2) for the FI(H) 100 hours of flight instruction in helicopters and, in addition has supervised at least 25 student solo flight air exercises;
 - (3) for the FI(As), 15 hours or 50 take-offs of flight instruction covering the full training syllabus for the issue of a PPL(As).
 - (4) for the FI(G):
 - (i) 100 hours of flight instruction in gyroplanes and, in addition, has supervised at least 25 solo flights;
 - (ii) in the case of an FI(G) who also holds an FI(A) or FI(H) certificate and complies with points (1) or (2), as applicable, 25 hours of flight instruction in gyroplanes and, in addition, has supervised at least 10 student solo flights.

FCL.915.FI FI — Prerequisites

An applicant for an FI certificate shall:

- (a) in the case of the FI(A), FI(H) and FI(G):
 - (1) have received at least 10 hours of instrument flight instruction on the appropriate aircraft category, of which not more than 5 hours may be instrument ground time in an FSTD;
 - (2) have completed 20 hours of VFR cross-country flight on the appropriate aircraft category as PIC; and
- (b) additionally, for the FI(A):
 - (1) hold at least a CPL(A); or
 - (2) hold at least a PPL(A), or hold an MPL with additional PPL privileges in accordance with point FCL.405.A(b)(1), and have complied with the following conditions:
 - (i) except for an FI(A) providing training for the LAPL(A) only, passed the CPL theoretical knowledge examination, which may be taken without completing a CPL theoretical knowledge training course and which in that case shall not be valid for any of the following:
 - (A) the issue of a CPL;
 - (B) receiving credits for CPL theoretical knowledge in accordance with point FCL.035 and Appendix 1;

- (ii) completed at least 200 hours of flight time on aeroplanes or TMGs, of which 150 hours as PIC;
- (3) have completed at least 30 hours in the class or type of aeroplane used for the FI(A) training course, of which at least 5 hours shall have been completed during the 6 months preceding the pre-entry flight assessment set out in point FCL.930.FI(a);
- (4) have completed a VFR cross-country flight as PIC, including a flight of at least 540 km (300 NM) in the course of which full stop landings at 2 different aerodromes shall be made;
- (c) additionally, for the FI(H), have completed 250 hours total flight time as pilot on helicopters of which:
 - (1) at least 100 hours shall be as PIC, if the applicant holds at least a CPL(H); or
 - (2) at least 200 hours as PIC if the applicant holds at least a PPL(H) and has passed the CPL theoretical knowledge examination, which may be taken without completing a CPL theoretical knowledge training course and which shall not be valid for the issue of a CPL;
- (ca) additionally, for the FI(G), have completed at least 150 hours of flight time on gyroplanes, of which at least 100 hours as PIC.
- (d) for an FI(As), have completed 500 hours of flight time on airships as PIC, of which 400 hours shall be as PIC holding a CPL(As);

FCL.930.FI FI — Training course

- (a) Applicants for the FI certificate shall, at an ATO, have passed a specific pre-entry flight assessment with an FI qualified in accordance with FCL.905.FI(j) within the 6 months preceding the start of the course, to assess their ability to undertake the course. That pre-entry flight assessment shall be based on the proficiency check for the class and type ratings as set out in Appendix 9.
- (b) The FI training course shall include:
 - (1) 25 hours of teaching and learning;
 - (2) at least 100 hours of theoretical knowledge instruction, including progress tests;
 - (3)
 - (i) in the case of an FI(A), (H) and (G), at least 30 hours of flight instruction, of which 25 hours shall be dual flight instruction, of which 5 hours may be conducted in an FFS, an FNPT I or II, or an FTD 2/3;
 - (ii) in the case of an FI(As), at least 20 hours of flight instruction, of which 15 hours shall be dual flight instruction.
- (c) Applicants for an FI certificate in another category of aircraft who are holding or have held an FI(A), (H), (As) or (G) shall be credited with 55 hours towards the requirement in point (b)(2).
- (d) Applicants for an FI(G) certificate that hold or have held an FI(A), (H) or (As) certificate shall be credited with 15 hours towards the requirement in point (b)(3)(i), of which a maximum of 10 hours shall be a credit towards the dual instruction time.
- (e) Applicants for the FI certificate who hold or have held any other instructor certificate issued in accordance with this Regulation shall be deemed to meet the requirements in point (b)(1).

FCL.940.FI FI — Revalidation and renewal**(a) Revalidation**

- (1) To revalidate an FI certificate, holders shall fulfil at least two out of the three following requirements before the expiry date of the FI certificate:
 - (i) they have completed:
 - (A) in the case of an FI(A) and an FI(H), at least 50 hours of flight instruction in the appropriate aircraft category as FIs, TRIs, CRIs, IRIs MIs or examiners. If the privileges to instruct for the BIR and the IR are to be revalidated, 10 of those 50 hours shall be flight instruction for a BIR or an IR and shall have been completed within the last 12 months immediately preceding the expiry date of the FI certificate;
 - (B) in the case of an FI(As), at least 20 hours of flight instruction in airships as FIs, IRIs or as examiners. If the privileges to instruct for the IR are to be revalidated, 10 of those hours shall be flight instruction for an IR and shall have been completed in the period of 12 months immediately preceding the expiry date of the FI certificate;
 - (C) in the case of an FI(G), at least 50 hours of flight instruction in gyroplanes as FIs or as examiners;
 - (ii) they have completed instructor refresher training as an FI at an ATO or at the CAA.
 - (iii) they have passed an assessment of competence in accordance with point FCL.935 in the period of 12 months immediately preceding the expiry date of the FI certificate.
- (2) For at least each alternate revalidation, in the case of FI(A), FI(H) or FI(G), or each third revalidation, in the case of FI(As), holders of the relevant FI certificate shall pass an assessment of competence in accordance with point FCL.935.

(b) Renewal.

If the FI certificate has expired, applicants shall, within a period of 12 months before the application date for the renewal, complete instructor refresher training as an FI at an ATO or at the CAA and complete an assessment of competence in accordance with point FCL.935.

SECTION 3***Specific requirements for the type rating instructor — TRI*****FCL.905.TRI TRI – Privileges and conditions**

(a) The privileges of a TRI are to instruct for:

- (1) The revalidation and renewal of an IR, provided the TRI holds a valid IR;
- (2) the issue of a TRI or SFI certificate, provided that the holder meets all of the following conditions:
 - (i) has at least 50 hours of instructional experience as a TRI or SFI in accordance with this Regulation or CAR-OPS;
 - (ii) has conducted the flight instruction syllabus of the relevant part of the TRI training course in accordance with point FCL.930.TRI(ab)(3) to the satisfaction of the head of training of an ATO;
- (3) in the case of the TRI for single-pilot aeroplanes:

- (i) the issue, revalidation and renewal of type ratings for single-pilot high-performance complex aeroplanes provided that the applicant seeks privileges to operate in single-pilot operations.

The privileges of the TRI(SPA) may be extended to flight instruction for single-pilot high-performance complex aeroplane type ratings in multi-pilot operations, provided that the TRI meets any of the following conditions:

- (A) holds or has held a TRI certificate for multi-pilot aeroplanes;
 - (B) has at least 500 hours on aeroplanes in multi-pilot operations and completed an MCCI training course in accordance with point FCL.930.MCCI;
 - (ii) the MPL course on the basic phase, provided that he or she has the privileges extended to multi-pilot operations and holds or has held an FI(A) or an IRI(A) certificate;
- (4) in the case of the TRI for multi-pilot aeroplanes:
- (i) the issue, revalidation and renewal of type ratings for:
 - (A) multi-pilot aeroplanes;
 - (B) single-pilot high-performance complex aeroplanes when the applicant seeks privileges to operate in multi-pilot operations;
 - (ii) MCC training;
 - (iii) the MPL course on the basic, intermediate and advanced phases, provided that, for the basic phase, he or she holds or has held an FI(A) or IRI(A) certificate;
- (5) in the case of the TRI for helicopters:
- (i) the issue, revalidation and renewal of helicopter type ratings;
 - (ii) MCC training, provided that he or she has completed 350 hours of flight time as a pilot in multi-pilot operations in any aircraft category;

- (6) in the case of the TRI for powered-lift aircraft:
 - (i) the issue, revalidation and renewal of powered-lift type ratings;
 - (ii) MCC training.
- (b) The privileges of a TRI include privileges to conduct EBT practical assessment at an EBT operator, provided that the instructor complies with the relevant requirements of CAR-OPS for EBT instructor standardisation at that EBT operator.

FCL.910.TRI TRI — Restricted privileges

- (a) General. If the TRI training is carried out in FSTDs only, the privileges of TRIs shall be restricted to training in FSTDs. This restriction shall however include the following privileges for conducting, in the aircraft:
 - (1) LIFUS, provided that the TRI training course has included the relevant training specified in point FCL.930.TRI(ab)(4);
 - (2) landing training, provided that the TRI training course has included the relevant training specified in point FCL.930.TRI(ab)(4); or
 - (3) the training flight specified in point FCL.060(c)(2), provided that the TRI training course has included the training referred to in points (a)(1) or (a)(2).

The restriction to FSTD shall be removed if TRIs have completed an assessment of competence in the aircraft.

- (b) TRIs for aeroplanes and for powered-lift aircraft — TRI(A) and TRI(PL). The privileges of TRIs are restricted to the type of aeroplane or powered-lift aircraft in which the training and the assessment of competence were conducted. Unless otherwise determined in the OSD, to extend the privileges of TRIs to further types, TRIs shall have:
 - (1) completed within the 12 months preceding the application, at least 15 route sectors, including take-offs and landings on the applicable aircraft type, of which of maximum of 7 sectors may be completed in an FSTD;
 - (2) completed the relevant parts of the technical training and the flight instruction parts of the applicable TRI course;
 - (3) passed the relevant sections of the assessment of competence in accordance with point FCL.935 in order to demonstrate to an FIE or a TRE qualified in accordance with Subpart K to this Regulation their ability to instruct a pilot to the level required for the issue of a type rating, including pre-flight, post-flight and theoretical knowledge instruction.

The privileges of TRIs shall be extended to further variants, provided that they comply with point FCL.710 in those other variants and, where applicable, the elements set out in the OSD for those variants.

- (c) TRIs for helicopters — TRI(H).
 - (1) The privileges of TRIs(H) are restricted to the type of helicopter in which the assessment of competence for the issue of the TRI certificate was taken. Unless otherwise determined in the OSD, the privileges of the TRIs shall be extended to further types if TRIs have:

- (i) completed the relevant parts of the technical training and flight instruction parts of the TRI course;
- (ii) completed within the 12 months preceding the date of application, at least 10 hours on the applicable helicopter type, of which a maximum of 5 hours may be completed in an FFS or FTD 2/3; and
- (iii) passed the relevant sections of the assessment of competence in accordance with point FCL.935 in order to demonstrate to an FIE or a TRE qualified in accordance with Subpart K of this Regulation their ability to instruct a pilot to the level required for the issue of a type rating, including pre-flight, post-flight and theoretical knowledge instruction.

The privileges of TRIs shall be extended to further variants, provided that they comply with point FCL.710 in those other variants and, where applicable, the elements set out in the OSD for those variants.

- (2) In order to extend the privileges of a TRI(H) to multi-pilot privileges in the same type of helicopters, the holder shall have at least 350 hours of flight time as a pilot in multi-pilot operations in any aircraft category or have at least 100 hours of flight time as a pilot in multi-pilot operations on the specific type within the last 2 years.
 - (3) Before the privileges of a TRI(H) are extended from single-pilot helicopters to multi-pilot helicopters, the holder shall comply with point FCL.915.TRI(d)(3).
- (d) (Reserved).

FCL.915.TRI TRI — Prerequisites

An applicant for a TRI certificate shall:

- (a) hold a CPL, MPL or ATPL pilot licence on the applicable aircraft category;
- (b) for a TRI (MPA) certificate:
 - (1) have completed 1 500 hours flight time as a pilot on multi-pilot aeroplanes; and
 - (2) have completed, within the 12 months preceding the date of application, 30 route sectors, including take-offs and landings, as PIC or co-pilot on the applicable aeroplane type, of which 15 sectors may be completed in an FFS representing that type;
- (c) for a TRI (SPA) certificate:
 - (1) have completed, within the 12 months preceding the date of the application, at least 30 route sectors, including take-offs and landings, as PIC on the applicable aeroplane type, of which a maximum of 15 sectors may be completed in an FSTD representing that type; and
 - (2) (i) have competed at least 500 hours flight time as pilot on aeroplanes, including 30 hours as PIC on the applicable type of aeroplane; or
 - (ii) hold or have held an FI certificate for multi-engine aeroplanes with IR(A) privileges;
- (d) for TRI(H):
 - (1) for a TRI(H) certificate for single-pilot single-engine helicopters, either:

- (i) have completed 250 hours as a pilot on helicopters; or
 - (ii) hold an FI(H) certificate.
 - (2) for a TRI(H) certificate for single-pilot multi-engine helicopters, either:
 - (i) have completed 500 hours as pilot of helicopters, including 100 hours as PIC on single-pilot multi-engine helicopters; or
 - (ii) hold an FI(H) certificate and have completed 100 hours of flight time as a pilot in multi-engine helicopters.
 - (3) for a TRI(H) certificate for multi-pilot helicopters, have completed 1 000 hours of flight time as a pilot on helicopters, and have either :
 - (i) 350 hours in multi-pilot operations on any aircraft category or
 - (ii) 100 hours of flight time as a pilot in multi-pilot operations on the type for which the TRI(H) certificate is sought.
 - (4) Holders of an FI(H) certificate shall be fully credited towards the requirements of (1) and (2) in the relevant single-pilot helicopter;
- (e) for TRI(PL):
- (1) have completed 1 500 hours flight time as a pilot on multi-pilot aeroplanes, powered-lift, or multi-pilot helicopters; and
 - (2) have completed, within the 12 months preceding the application, 30 route sectors, including take-offs and landings, as PIC or co-pilot on the applicable powered-lift type, of which 15 sectors may be completed in an FFS representing that type.

FCL.930.TRI TRI — Training course

- (a) The TRI training course shall be conducted:
- (1) in the case of MPA, in an FFS or a combination of FSTD(s) and FFS;
 - (2) in the case of type ratings for SPA and helicopters, in either of the following:
 - (i) an available and accessible FFS, or in a combination of such FFS and FSTD(s);
 - (ii) a combination of FSTD(s) and the aircraft if an FFS is not available or accessible;
 - (iii) the aircraft if no FSTD is available or accessible.
- (aa) By way of derogation from point (a), the TRI training course:
- (1) for non-complex helicopters may be conducted in a combination of FSTD(s) and the aircraft even if an FFS is available and accessible;
 - (2) for aircraft referred to in Section A, point 1e, of Appendix 9 may be conducted in accordance with points FCL.930.TRI(a)(2)(i), (ii) or (iii), irrespective of the availability and accessibility of FFS or FSTD.
- (ab) The TRI training course shall include:
- (1) 25 hours of teaching and learning;

- (2) 10 hours of technical training, including revision of technical knowledge, the preparation of lesson plans and the development of classroom or simulator instructional skills;
- (3) 5 hours of flight instruction on the appropriate aircraft or an FSTD representing that aircraft for single-pilot aircraft and 10 hours for multi-pilot aircraft or an FSTD representing that aircraft;
- (4) if privileges for conducting LIFUS or take-off and landing training are sought, the following training, as applicable:
 - (i) in an FSTD and related to the relevant privileges, additional specific training which, in the case of privileges for conducting take-off and landing training, shall include training for emergency procedures related to the aircraft;
 - (ii) consolidation of the specific training in accordance with point (4)(i), where the applicant shall, in the aircraft, provide LIFUS or take-off and landing training, as applicable, under the supervision of a TRI that is nominated for that purpose by the ATO.
- (b) Applicants holding or having held an instructor certificate shall be fully credited towards the requirement of (a)(1).
- (c) An applicant for a TRI certificate who holds an SFI certificate for the relevant type shall be fully credited towards the requirements of this paragraph for the issue of a TRI certificate restricted to flight instruction in simulators.

FCL.935.TRI TRI — Assessment of competence

- (a) The assessment of competence for a TRI for MPA and PL shall be conducted in an FFS. If no FFS is available or accessible, an aircraft shall be used.
- (b) The assessment of competence for a TRI for single-pilot high-performance complex aeroplanes and helicopters shall be conducted in any of the following:
 - (1) an available and accessible FFS;
 - (2) if no FFS is available or accessible, in a combination of FSTD(s) and an aircraft;
 - (3) if no FSTD is available or accessible, in an aircraft.

FCL.940.TRI TRI — Revalidation and renewal

- (a) Revalidation

- (1) Aeroplanes

To revalidate a TRI(A) certificate, applicants shall, within the 12 months immediately preceding the expiry date of the certificate fulfil at least two out of the three following requirements:

- (i) conduct one of the following parts of a complete type rating or recurrent training course: simulator session of at least 3 hours or one air exercise of at least 1 hour comprising a minimum of two take-offs and landings;
 - (ii) complete instructor refresher training as a TRI(A) at an ATO;
 - (iii) pass the assessment of competence in accordance with point FCL.935. Applicants who

have complied with point FCL.910.TRI (b)(3) shall be deemed to comply with this requirement.

(2) Helicopters and powered lift

To revalidate a TRI(H) or TRI(PL) certificate, applicants shall, within the validity period of the TRI certificate fulfil at least two out of the three following requirements:

- (i) completed at least 50 hours of flight instruction in each of the types of aircraft for which instructional privileges are held or in an FSTD representing those types, of which at least 15 hours shall be completed in the period of 12 months immediately preceding the expiry date of the TRI certificate. In the case of a TRI(PL), those hours shall be completed as a TRI or a type rating examiner (TRE), or as an SFI or a synthetic flight examiner (SFE). In the case of a TRI(H), the time flown as FIs, instrument rating instructors (IRIs), synthetic training instructors (STIs) or as any kind of examiners shall be accounted for this purpose;
 - (ii) complete instructor refresher training as a TRI(H) or TRI(PL), as relevant, at an ATO;
 - (iii) in the period of 12 months immediately preceding the expiry date of the certificate, passed an assessment of competence in accordance with points FCL.935, FCL.910.TRI(b)(3) or FCL.910.TRI(c)(3), as applicable.
- (3) For at least each alternate revalidation of a TRI certificate, holders shall pass the assessment of competence in accordance with point FCL.935.
- (4) If TRIs hold a certificate for more than one type of aircraft within the same category, the assessment of competence taken on one of those types of aircraft shall revalidate the TRI certificate for the other types held within the same category of aircraft, unless it is otherwise determined in the OSD.
- (5) Specific requirements for the revalidation of a TRI(H) certificate
- TRIs(H) holding an FI(H) certificate in the relevant type shall be deemed to comply with the requirements in point (a). In that case, the TRI(H) certificate shall be valid until the expiry date of the FI(H) certificate.

(b) Renewal

To renew a TRI certificate, applicants shall, within the 12 months immediately preceding the date of the application, have passed the assessment of competence in accordance with point FCL.935 and shall have completed the following:

- (1) for aeroplanes:
 - (i) at least 30 route sectors, including take-offs and landings on the applicable aeroplane type, of which maximum 15 sectors may be completed in an FFS;
 - (ii) instructor refresher training as a TRI at an ATO which shall cover the relevant elements of the TRI training course;
- (2) for helicopters and powered lift:
 - (i) at least 10 hours of flight time, including take-offs and landings on the applicable aircraft type, of which maximum 5 hours may be completed in an FFS or FTD 2/3;

- (ii) instructor refresher training as a TRI at an ATO, which shall cover the relevant elements of the TRI training course.
- (3) If applicants held a certificate for more than one type of aircraft within the same category, the assessment of competence taken on one of those types of aircraft shall renew the TRI certificate for the other types held within the same category of aircraft, unless it is otherwise determined in the OSD.

SECTION 4***Specific requirements for the class rating instructor — CRI*****FCL.905.CRI CRI — Privileges and conditions**

- (a) The privileges of a CRI are to instruct for:
 - (1) the issue, revalidation or renewal of a class or type rating for single-pilot aeroplanes, except for single-pilot high-performance complex aeroplanes, when the privileges sought by the applicant are to fly in single-pilot operations;
 - (2) a towing or aerobatic rating for the aeroplane category, provided that the CRI holds the relevant rating and has demonstrated the ability to instruct for that rating to an FI qualified in accordance with FCL.905.FI(j);
 - (3) extension of LAPL(A) privileges to another class or variant of aeroplane.
- (b) The privileges of a CRI are restricted to the class or type of aeroplane in which the instructor assessment of competence was taken. The privileges of the CRI shall be extended to further classes or types when the CRI has completed, within the last 12 months:
 - (1) 15 hours flight time as PIC on aeroplanes of the applicable class or type of aeroplane;
 - (2) one training flight from the right-hand seat under the supervision of another CRI or FI qualified for that class or type occupying the other pilot's seat.
- (ba) The privileges of CRIs are to instruct for class and type ratings for single-pilot aeroplanes, except for single-pilot high-performance complex aeroplanes, in multi-pilot operations, provided that CRIs meet any of the following conditions:
 - (1) hold or have held a TRI certificate for multi-pilot aeroplanes;
 - (2) have at least 500 hours on aeroplanes in multi-pilot operations and completed an MCCI training course in accordance with point FCL.930.MCCI.
- (c) Applicants for a CRI for multi-engine aeroplanes holding a CRI certificate for single-engine aeroplanes shall have fulfilled the prerequisites for a CRI established in FCL.915.CRI(a) and the requirements of FCL.930.CRI(a)(3) and FCL.935.

FCL.915.CRI CRI — Prerequisites

An applicant for a CRI certificate shall have completed at least:

- (a) for multi-engine aeroplanes:
 - (1) 500 hours flight time as a pilot on aeroplanes;
 - (2) 30 hours as PIC on the applicable class or type of aeroplane;
- (b) for single-engine aeroplanes:
 - (1) 300 hours flight time as a pilot on aeroplanes;
 - (2) 30 hours as PIC on the applicable class or type of aeroplane.

FCL.930.CRI CRI — Training course

- (a) The training course for the CRI shall include, at least:
- (1) 25 hours of teaching and learning instruction;
 - (2) 10 hours of technical training, including revision of technical knowledge, the preparation of lesson plans and the development of classroom/ simulator instructional skills;
 - (3) 5 hours of flight instruction on multi-engine aeroplanes or an FSTD representing that class or type of aeroplane, including at least 3 hours on the aeroplane, or at least 3 hours of flight instruction on single-engine aeroplanes, given by an FI(A) qualified in accordance with point FCL.905.FI(j).
- (b) Applicants holding or having held an instructor certificate shall be fully credited towards the requirement of (a)(1).

FCL.940.CRI CRI — Revalidation and renewal

- (a) To revalidate a CRI certificate, applicants shall fulfil, within the validity period of the CRI certificate, at least two out of the following three requirements:
- (1) conduct at least 10 hours of flight instruction as a CRI. If applicants have CRI privileges on both single-engine and multi-engine aeroplanes, those hours of flight instruction shall be equally divided between single-engine and multi-engine aeroplanes;
 - (2) complete a refresher training as a CRI at an ATO or at the CAA;
 - (3) pass the assessment of competence in accordance with point FCL.935 for multi-engine or single-engine aeroplanes, as relevant.
- (b) For at least each alternate revalidation of a CRI certificate, holders shall have complied with the requirement in point (a)(3).
- (c) Renewal

If the CRI certificate has expired, it shall be renewed if the applicants in the period of 12 months before the application for the renewal:

- (1) have completed a refresher training as a CRI at an ATO or at the CAA;
- (2) have completed the assessment of competence as required by point FCL.935.

SECTION 5***Specific requirements for the instrument rating instructor — IRI*****FCL.905.IRI IRI — Privileges and conditions**

- (a) The privileges of IRIs are to instruct for the issue, revalidation and renewal of a BIR and an IR in the appropriate aircraft category.
- (b) Specific requirements for the MPL course. To instruct for the basic phase of training on an MPL course, the IRI(A) shall:
 - (1) hold an IR for multi-engine aeroplanes; and
 - (2) have completed at least 1 500 hours of flight time in multi-crew operations.
 - (3) In the case of IRI already qualified to instruct on ATP(A) or CPL(A)/IR integrated courses, the requirement of point FCL.905.IRI(b)(2) may be replaced by the completion of the course provided for in point FCL.905.FI(k)(3).

FCL.915.IRI IRI — Prerequisites

Applicants for an IRI certificate shall:

- (a) in case of an IRI(A):
 - (1) to provide training in FSTDs during an approved training course at an ATO, have completed at least 200 hours of flight time under IFR after the issuance of the BIR or the IR, of which at least 50 hours shall be in aeroplanes;
 - (2) to provide training in an aeroplane, have completed at least 800 hours of flight time under IFR, of which at least 400 hours shall be in aeroplanes;
 - (3) to apply for an IRI(A) for multi-engine aeroplanes, meet the requirements of points FCL.915.CRI(a), FCL.930.CRI and FCL.935;
- (b) for an IRI(H):
 - (1) to provide training in FSTDs during an approved training course at an ATO, have completed at least 125 hours of flight time under IFR after the issuance of the IR, of which at least 65 hours shall be instrument flight time in helicopters;
 - (2) to provide training in a helicopter, have completed at least 500 hours of flight time under IFR, of which at least 250 hours shall be instrument flight time in helicopters; and
 - (3) when seeking privileges to provide training in multi-engine helicopters, meet the requirements of points FCL.910.TRI(c)(1) and FCL.915.TRI(d)(2);
- (c) Applicants for an IRI(As) certificate shall have completed at least 300 hours of flight time under IFR, of which at least 100 hours shall be instrument flight time in airships.

FCL.930.IRI IRI — Training course

- (a) The training course for the IRI shall include, at least:
 - (1) 25 hours of teaching and learning instruction;

- (2) 10 hours of technical training, including revision of instrument theoretical knowledge, the preparation of lesson plans and the development of classroom instructional skills;
- (3) (i) for the IRI(A), at least 10 hours of flight instruction on an aeroplane, FFS, FTD or FPNT II. In the case of applicants holding an FI(A) certificate, these hours are reduced to 5;
 - (ii) for the IRI(H), at least 10 hours of flight instruction on a helicopter, FFS, FTD 2/3 or FNPT II/III. In the case of applicants holding an FI(H) certificate, those hours are reduced to at least 5;
 - (iii) for the IRI(As), at least 10 hours of flight instruction on an airship, FFS, FTD 2/3 or FNPT II.
- (b) Flight instruction shall be given by an FI qualified in accordance with FCL.905.FI(j).
- (c) Applicants holding or having held an instructor certificate shall be fully credited towards the requirement of (a)(1).

FCL.940.IRI IRI — Revalidation and renewal

For revalidation and renewal of an IRI certificate, the holder shall meet the requirements for revalidation and renewal of an FI certificate, in accordance with FCL.940.FI.

SECTION 6***Specific requirements for the synthetic flight instructor — SFI*****FCL.905.SFI SFI — Privileges and conditions**

- (a) The privileges of SFIs are to carry out synthetic flight instruction, within the relevant aircraft category, for:
- (1) the revalidation and renewal of an IR, provided that they hold or have held an IR in the relevant aircraft category;
 - (2) the issue of an IR, provided that they hold or have held an IR in the relevant aircraft category and have completed an IRI training course.
- (b) The privileges of SFIs for single-pilot aeroplanes are to carry out synthetic flight instruction for:
- (1) the issue, revalidation and renewal of type ratings for single-pilot high-performance complex aeroplanes, if applicants seek privileges to operate in single-pilot operations.
- The privileges of SFIs for single-pilot aeroplanes may be extended to flight instruction for single-pilot high-performance complex aeroplanes type ratings in multi-pilot operations, provided that they meet any of the following conditions:
- (i) hold or have held a TRI certificate for multi-pilot aeroplanes;
 - (ii) have at least 500 hours on aeroplanes in multi-pilot operations and have completed an MCCI training course in accordance with point FCL.930.MCCI;
- (2) the MCC and the MPL training courses on the basic phase, provided that the privileges of SFIs(SPA) have been extended to multi-pilot operations in accordance with point (1).
- (c) The privileges of SFIs for multi-pilot aeroplanes are to carry out synthetic flight instruction for:
- (1) the issue, revalidation and renewal of type ratings for multi-pilot aeroplanes and if applicants seek privileges to operate in multi-pilot operations, for single-pilot high-performance complex aeroplanes;
 - (2) the MCC training course;
 - (3) the MPL course on the basic, intermediate and advanced phases, provided that, for the basic phase, they hold or have held an FI(A) or an IRI(A) certificate;
- (d) The privileges of SFIs for helicopters are to carry out synthetic flight instruction for:
- (1) the issue, revalidation and renewal of helicopter type ratings;
 - (2) MCC training, provided that they have at least 350 hours as a pilot in multi-pilot operations in any aircraft category.
- (e) The privileges of an SFI include privileges to conduct EBT practical assessment at an EBT operator, provided that the instructor complies with the requirements of CAR-OPS for EBT instructor standardisation at that EBT operator.

FCL.910.SFI SFI — Restricted privileges

The privileges of SFIs shall be restricted to the FTD 2/3 or FFS of the aircraft type in which the SFI training course was taken.

Unless otherwise specified in the OSD, to extend the privileges of SFIs to other FSTDs representing further types of the same category of aircraft, SFIs shall have:

- (a) completed the simulator content of the relevant type rating course;
- (b) completed the relevant parts of the technical training and the FSTD content of the flight instruction syllabus of the applicable TRI course;
- (c) conducted on a complete type rating course at least 3 hours of flight instruction related to the duties of an SFI on the applicable type under the supervision and to the satisfaction of a TRE or an SFE qualified for this purpose.

The privileges of the SFI shall be extended to further variants in accordance with the OSD or CAA discretion if the SFI has completed the type relevant parts of the technical training and the FSTD content of the flight instruction syllabus of the applicable TRI course.

FCL.915.SFI SFI — Prerequisites

An applicant for an SFI certificate shall:

- (a) hold or have held a CPL, MPL or ATPL in the appropriate aircraft category;
- (b) have completed the proficiency check for the issue of the specific aircraft type rating in an FFS representing the applicable type, within the 12 months preceding the application; and
- (c) additionally, for an SFI(A) for multi-pilot aeroplanes or SFI(PL), have:
 - (1) at least 1 500 hours flight time as a pilot on multi-pilot aeroplanes or powered-lift, as applicable;
 - (2) completed, as a pilot or as an observer, within the 12 months preceding the application, at least:
 - (i) 3 route sectors on the flight deck of the applicable aircraft type; or
 - (ii) 2 line-orientated flight training-based simulator sessions conducted by qualified flight crew on the flight deck of the applicable type. These simulator sessions shall include 2 flights of at least 2 hours each between 2 different aerodromes, and the associated pre-flight planning and de-briefing;
- (d) additionally, for an SFI(A) for single-pilot high-performance complex aeroplanes:
 - (1) have completed at least 500 hours of flight time as PIC on single-pilot aeroplanes;
 - (2) hold or have held a multi-engine IR(A) rating; and
 - (3) have met the requirements in (c)(2);
- (e) additionally, for an SFI(H), have:
 - (1) completed, as a pilot or as an observer, at least 1 hour of flight time on the flight deck of the applicable type, within the 12 months preceding the application; and

- (2) in the case of multi-pilot helicopters, at least 1 000 hours of flying experience as a pilot in helicopters, including at least 350 hours in multi-pilot operations in any aircraft category;
- (3) in the case of single-pilot multi-engine helicopters, completed 500 hours as pilot of helicopters, including 100 hours as PIC on single-pilot multi-engine helicopters;
- (4) in the case of single-pilot single-engine helicopters, completed 250 hours as a pilot on helicopters;
- (5) in the case of single-pilot helicopters in multi-pilot operations, completed at least 350 hours in multi-pilot operations in any aircraft category.

FCL.930.SFI SFI — Training course

- (a) The training course for the SFI shall include:
 - (1) the FSTD content of the applicable type rating course;
 - (2) the relevant parts of the technical training and the FSTD content of the flight instruction syllabus of the applicable TRI training course;
 - (3) 25 hours of teaching and learning instruction.
- (b) An applicant for an SFI certificate who:
 - (1) holds a TRI certificate for the relevant type shall be fully credited towards the requirements of point (a);
 - (2) holds or has held an instructor certificate shall be fully credited towards the requirement of point (a)(3).

FCL.940.SFI SFI — Revalidation and renewal

- (a) Revalidation

To revalidate an SFI certificate, applicants shall fulfil, before the expiry date of the SFI certificate, at least two out of the following three requirements:

 - (1) have completed at least 50 hours as instructors or examiners in FSTDs, of which at least 15 hours in the period of 12 months immediately preceding the expiry date of the SFI certificate;
 - (2) have completed instructor refresher training as an SFI at an ATO;
 - (3) have passed the relevant sections of the assessment of competence in accordance with point FCL.935.
- (b) Additionally, applicants shall have completed, on an FFS, the proficiency checks for the issue of the specific aircraft type ratings representing the types for which privileges are held.
- (c) For at least each alternate revalidation of an SFI certificate, holders shall comply with the requirement in point (a)(3).
- (d) If an SFI holds a certificate in more than one type of aircraft within the same category, the assessment of competence taken on one of those types shall revalidate the SFI certificate for the other types held within the same category of aircraft, unless otherwise is determined in the OSD or by CAA.

(e) Renewal

To renew the SFI certificate, applicants shall, within the period of 12 months immediately preceding the application for the renewal, comply with all of the following conditions:

- (1) have completed instructor refresher training as an SFI at an ATO;
- (2) have passed the assessment of competence in accordance with point FCL.935;
- (3) have completed, on an FSTD, the skill test for the issue of the specific aircraft type ratings representing the types for which privileges are to be renewed.

SECTION 7***Specific requirements for the multi-crew cooperation instructor — MCCI*****FCL.905.MCCI MCCI — Privileges and conditions**

- (a) The privileges of an MCCI are to carry out flight instruction during:
- (1) the practical part of MCC courses when not combined with type rating training; and
 - (2) in the case of MCCI(A), the basic phase of the MPL integrated training course, provided he/she holds or has held an FI(A) or an IRI(A) certificate.

FCL.910.MCCI MCCI — Restricted privileges

The privileges of the holder of an MCCI certificate shall be restricted to the FNPT II/III MCC, FTD 2/3 or FFS in which the MCCI training course was taken.

The privileges may be extended to other FSTDs representing further types of aircraft when the holder has completed the practical training of the MCCI course on that type of FNPT II/III MCC, FTD 2/3 or FFS.

FCL.915.MCCI MCCI — Prerequisites

An applicant for an MCCI certificate shall:

- (a) hold or have held a CPL, MPL or ATPL in the appropriate aircraft category;
- (b) have at least:
- (1) in the case of aeroplanes, airships and powered-lift aircraft, 1 500 hours of flying experience as a pilot in multi-pilot operations, of which at least 350 hours in the appropriate aircraft category;
 - (2) in the case of helicopters, 1 000 hours of flying experience as a pilot in multi-pilot operations, of which at least 350 hours in helicopters.

FCL.930.MCCI MCCI — Training course

- (a) The training course for the MCCI shall include, at least:
- (1) 25 hours of teaching and learning instruction;
 - (2) technical training related to the type of FSTD where the applicant wishes to instruct;
 - (3) 3 hours of practical instruction, which may be flight instruction or MCC instruction on the relevant FNPT II/III MCC, FTD 2/3 or FFS, under the supervision of a TRI, SFI or MCCI nominated by the ATO for that purpose. These hours of flight instruction under supervision shall include the assessment of the applicant's competence as described in FCL.920.
- (b) Applicants holding or having held an FI, TRI, CRI, IRI or SFI certificate shall be fully credited towards the requirement of (a)(1).

FCL.940.MCCI MCCI — Revalidation and renewal

- (a) For revalidation of an MCCI certificate the applicant shall have completed the requirements of FCL.930.MCCI(a)(3) on the relevant type of FNPT II/III, FTD 2/3 or FFS, within the last 12 months of the validity period of the MCCI certificate.
- (b) Renewal. If the MCCI certificate has lapsed, the applicant shall complete the requirements of FCL.930.MCCI(a)(2) and (3) on the relevant type of FNPT II/III MCC, FTD 2/3 or FFS.

SECTION 8***Specific requirements for the synthetic training instructor — STI*****FCL.905.STI STI — Privileges and conditions**

- (a) The privileges of an STI are to carry out synthetic flight instruction in the appropriate aircraft category for:
 - (1) the issue of a licence;
 - (2) the issue, revalidation or renewal of a BIR and an IR and a class or type rating for single-pilot aircraft, except for single-pilot high-performance complex aeroplanes.
- (b) Additional privileges for the STI(A). The privileges of an STI(A) shall include synthetic flight instruction during the core flying skills training of the MPL integrated training course.

FCL.910.STI STI — Restricted privileges

The privileges of STIs shall be restricted to the FSTD in which the STI training course was taken.

The privileges may be extended to other FSTDs representing further types of aircraft if in the period of 12 months immediately preceding the application the holders have:

- (a) completed the FSTD content of the CRI or TRI course on the class or type of aircraft for which instructional privileges are sought;
- (b) passed in the FSTD on which flight instruction is to be conducted, the applicable section of the proficiency check in accordance with Appendix 9 to this Regulation for the appropriate class or type of aircraft.

For STIs(A) instructing on BITD only, the proficiency check shall include only the exercises appropriate for the skill test for the issue of a PPL(A);

- (c) conducted, on a CPL, an IR, a PPL or a class or type rating course, at least 3 hours of flight instruction under the supervision of an FI, a CRI(A), an IRI or a TRI nominated by the ATO for this purpose, including at least 1 hour of flight instruction that is supervised by an FIE in the appropriate aircraft category.

FCL.915.STI STI — Prerequisites

- (a) Applicants for the issue of an STI certificate shall:
 - (1) hold, or have held within the 3 years prior to the application, a pilot licence and instructional privileges appropriate to the courses on which instruction is intended;
 - (2) have completed in an FSTD the relevant proficiency check for the class or type rating, in the period of 12 months immediately preceding the application.

Applicants for the issue of an STI(A) wishing to instruct on BITDs only, shall complete the exercises appropriate for a skill test for the issue of a PPL(A) only;

- (b) Additionally, to the requirements laid down in point (a), applicants for the issue of an STI(H) certificate shall have completed at least 1 hour of flight time as an observer on the flight deck of the applicable type of helicopter, in the period of 12 months immediately preceding the application.

FCL.930.STI STI — Training course

- (a) The training course for the STI shall comprise at least 3 hours of flight instruction related to the duties of an STI in an FFS, FTD 2/3 or FNPT II/III, under the supervision of an FIE. These hours of flight instruction under supervision shall include the assessment of the applicant's competence as described in FCL.920.

Applicants for an STI(A) wishing to instruct on a BITD only, shall complete the flight instruction on a BITD.

- (b) For applicants for an STI(H), the course shall also include the FFS content of the applicable TRI course.

FCL.940.STI STI — Revalidation and renewal of the STI certificate

- (a) Revalidation

To revalidate an STI certificate, applicants shall, within the period of 12 months immediately preceding the expiry date of the STI certificate, comply with all of the following conditions:

- (1) have conducted at least 3 hours of flight instruction in an FSTD, as part of a complete CPL, IR, PPL or class or type rating course;
- (2) have passed in the FSTD on which flight instruction is conducted, the applicable sections of the proficiency check in accordance with Appendix 9 to this Regulation for the appropriate class or type of aircraft.

For STIs(A) instructing on BITDs only, the proficiency check shall include the exercises appropriate for a skill test for the issue of a PPL(A) only.

- (b) Renewal

To renew STI certificate, the applicants shall within the period of 12 months immediately preceding the application for the renewal:

- (1) complete a refresher training as an STI at an ATO;
- (2) pass in the FSTD on which flight instruction is conducted, the applicable sections of the proficiency check in accordance with Appendix 9 to this Regulation for the appropriate class or type of aircraft.

For an STI(A) instructing on BITDs only, the proficiency check shall include the exercises appropriate for a skill test for the issue of a PPL(A) only;

- (3) conduct, in the relevant aircraft category, on a complete CPL, IR, PPL or class or type rating course, at least 3 hours of flight instruction under the supervision of an FI, a CRI, an IRI or a TRI nominated by the ATO for this purpose, including at least 1 hour of flight instruction supervised by a flight instructor examiner (FIE).

SECTION 9

Mountain rating instructor — MI

(Reserved)

SECTION 10

Specific requirements for the flight test instructor — FTI

(Reserved)

SUBPART K

EXAMINERS

SECTION 1

*Common requirements***FCL.1000 Examiner certificates**

(a) General

Holders of an examiner certificate shall:

- (1) hold, unless otherwise determined in this Regulation, an equivalent licence, rating or certificate to the ones for which they are authorised to conduct skill tests, proficiency checks or assessments of competence and the privilege to instruct for them;
- (2) be qualified to act as PIC in the aircraft during a skill test, proficiency check or assessment of competence if conducted on the aircraft.

(b) Special conditions:

- (1) The CAA may issue a specific certificate granting privileges for the conduct of skill tests, proficiency checks and assessments of competence if compliance with the requirements established in this Subpart is not possible because of the introduction of any of the following:
 - (i) new aircraft in the Sultanate of Oman or in an operator's fleet;
 - (ii) new training courses in this Regulation.

Such a certificate shall be limited to the skill tests, proficiency checks and assessments of competence necessary for the introduction of the new type of aircraft or the new training course and its validity shall not, in any case, exceed 1 year.

- (2) Holders of a certificate issued in accordance with point (b)(1) who wish to apply for an examiner certificate shall comply with the prerequisites and revalidation requirements for that category of examiner certificate.
- (3) Where no qualified examiner is available, CAA may, on a case-by-case basis, authorise inspectors or examiners who do not meet the relevant instructor, type or class rating requirements as specified in (a), to perform skill tests, proficiency checks and assessments of competence.

(c) Examination provided outside the territory of the Sultanate of Oman:

- (1) By way of derogation from point (a), in the case of skill tests and proficiency checks provided outside the territory for which the Sultanate of Oman is responsible under the Chicago Convention, the CAA shall issue an examiner certificate to applicants holding a pilot licence that is compliant with Annex 1 to the Chicago Convention, provided that those applicants:
 - (i) hold at least an equivalent licence, rating, or certificate to the one for which they are authorised to conduct skill tests, proficiency checks or assessments of competence, and in any case at least a CPL;

- (ii) are qualified to act as PIC in the aircraft during a skill test or proficiency check that is conducted in the aircraft;
 - (iii) comply with the requirements established in this Subpart for the issue of the relevant examiner certificate; and
 - (iv) demonstrate to the CAA an adequate level of knowledge of Omani aviation safety rules to be able to exercise examiner privileges in accordance with this Regulation.
- (2) The certificate referred to in point (1) shall be limited to performing skill tests and proficiency checks:
- (i) outside the territory for which the Sultanate of Oman is responsible under the Chicago Convention; and
 - (ii) to pilots who have sufficient knowledge of the language in which the test/check is given.

FCL.1005 Limitation of privileges in case of vested interests

Examiners shall not conduct:

- (a) skill tests or assessments of competence of applicants for the issue of a licence, rating or certificate to whom they have provided more than 25 % of the required flight instruction for the licence, rating or certificate for which the skill test or assessment of competence is being taken; and
- (b) skill tests, proficiency checks or assessments of competence whenever they feel that their objectivity may be affected.

FCL.1010 Prerequisites for examiners

Applicants for an examiner certificate shall demonstrate:

- (a) relevant knowledge, background and appropriate experience related to the privileges of an examiner;
- (b) that they have not been subject to any sanctions, including the suspension, limitation or revocation of any of their licences, ratings or certificates issued in accordance with this Regulation, for non-compliance with Civil Aviation Law and Regulation during the last 3 years.

FCL.1015 Examiner standardisation

- (a) An applicant for an examiner certificate shall undertake a standardisation course which is provided by the CAA or which is provided by an ATO and approved by the CAA.
- (b) The standardisation course shall consist of theoretical and practical instruction and shall include, at least:
 - (1) the conduct of 2 skill tests, proficiency checks or assessments of competences for the licences, ratings or certificates for which the applicant seeks the privilege to conduct tests and checks;

- (2) instruction on the applicable requirements in this Regulation and the applicable air operations requirements, the conduct of skill tests, proficiency checks and assessments of competence, and their documentation and reporting;
- (3) a briefing on the CAA administrative procedures, requirements for protection of personal data, liability, accident insurance and fees;
- (4) an instruction on how to get access to these national procedures and requirements

FCL.1020 Examiners assessment of competence

Applicants for an examiner certificate shall demonstrate their competence to an inspector from the CAA or a senior examiner specifically authorised to do so by the CAA through the conduct of a skill test, proficiency check or assessment of competence in the examiner role for which privileges are sought, including briefing, conduct of the skill test, proficiency check or assessment of competence, and assessment of the person to whom the test, check or assessment is given, debriefing and recording documentation.

FCL.1025 Validity, revalidation and renewal of examiner certificates

(a) Validity

An examiner certificate shall be valid for 3 years.

(b) Revalidation

To revalidate an examiner certificate, holders shall comply with all of the following conditions:

- (1) before the expiry date of the certificate, have conducted at least six skill tests, proficiency checks, assessments of competence, or EBT evaluation phases during an EBT module;
- (2) in the period of 12 months immediately preceding the expiry date of the certificate, have completed an examiner refresher course which is provided by the CAA or which is provided by an ATO and approved by the CAA;
- (3) one of the skill tests, proficiency checks, assessments of competence or EBT evaluation phases conducted in accordance with point (1) shall take place in the period of 12 months immediately preceding the expiry date of the examiner certificate and shall:
 - (i) have been assessed by an CAA inspector or by a senior examiner specifically authorised to do so by the CAA; or
 - (ii) comply with the requirements in point FCL.1020.

If applicants for the revalidation hold privileges for more than one category of examiner, all examiner privileges may be revalidated if applicants comply with the requirements laid down in points (b)(1) and (2) and point FCL.1020 for one of the categories of examiner certificates held, in agreement with the CAA.

(c) Renewal

If the certificate has expired, before resuming the exercise of the privileges, the applicants shall comply with the requirements in point (b)(2) and point FCL.1020 in the period of 12 months immediately preceding the application for the renewal.

- (d) An examiner certificate shall only be revalidated or renewed if applicants demonstrate continued compliance with the requirements laid down in points FCL.1010 and FCL.1030.

FCL.1030 Conduct of skill tests, proficiency checks and assessments of competence

- (a) When conducting skill tests, proficiency checks and assessments of competence, examiners shall:
- (1) ensure that communication with the applicant can be established without language barriers;
 - (2) verify that the applicant complies with all the qualification, training and experience requirements in this Regulation for the issue, revalidation or renewal of the licence, rating or certificate for which the skill test, proficiency check or assessment of competence is taken;
 - (3) make the applicant aware of the consequences of providing incomplete, inaccurate or false information related to their training and flight experience.
- (b) After completion of the skill test or proficiency check, the examiner shall:
- (1) inform the applicant of the result of the test. In the event of a partial pass or fail, the examiner shall inform the applicant that he/she may not exercise the privileges of the rating until a full pass has been obtained. The examiner shall detail any further training requirement and explain the applicant's right of appeal;
 - (2) in the event of a pass in a proficiency check or assessment of competence for revalidation or renewal, endorse the applicant's licence or certificate with the new expiry date of the rating or certificate, if specifically authorised for that purpose by the CAA;
 - (3) provide the applicant with a signed report of the skill test or proficiency check and submit without delay copies of the report to the CAA. The report shall include:
 - (i) a declaration that the examiner has received information from the applicant regarding his/her experience and instruction, and found that experience and instruction complying with the applicable requirements in this Regulation;
 - (ii) confirmation that all the required manoeuvres and exercises have been completed, as well as information on the verbal theoretical knowledge examination, when applicable. If an item has been failed, the examiner shall record the reasons for this assessment;
 - (iii) the result of the test, check or assessment of competence;
 - (iv) a declaration that the examiner has reviewed and applied the CAA procedures and requirements;
 - (v) a copy of the examiner certificate containing the scope of his/her privileges as examiner in the case of skill tests, proficiency checks or assessments of competence.
- (c) Examiners shall maintain records for 5 years with details of all skill tests, proficiency checks and assessments of competence performed and their results.
- (d) Upon request by the CAA, examiners shall submit all records and reports, and any other information, as required for oversight activities.

SECTION 2*Specific requirements for flight examiners — FE***FCL.1005.FE FE — Privileges and conditions**

- (a) FE(A). The privileges of an FE for aeroplanes are to conduct:
- (1) skill tests for the issue of the PPL(A) and skill tests and proficiency checks for associated single-pilot class and type ratings, except for single-pilot high-performance complex aeroplanes, provided that the examiner has completed at least 1 000 hours of flight time as a pilot on aeroplanes or TMGs, including at least 250 hours of flight instruction;
 - (2) skill tests for the issue of the CPL(A) and skill tests and proficiency checks for the associated single-pilot class and type ratings, except for single-pilot high-performance complex aeroplanes, provided that the examiner has completed at least 2 000 hours of flight time as a pilot on aeroplanes or TMGs, including at least 250 hours of flight instruction;
 - (3) skill tests and proficiency checks for the LAPL(A), provided that the examiner has completed at least 500 hours of flight time as a pilot on aeroplanes or TMGs, including at least 100 hours of flight instruction;
 - (4) skill tests for the issue of a mountain rating, provided that the examiner has completed at least 500 hours of flight time as a pilot on aeroplanes or TMGs, including at least 500 take-offs and landings of flight instruction for the mountain rating;
 - (5) proficiency checks for the revalidation and renewal of BIRs, provided that the FE has completed at least 1 500 hours as a pilot on aeroplanes and complies with the requirements in FCL.1010.IRE(a)(2).
- (b) FE(H). The privileges of an FE for helicopters are to conduct:
- (1) skill tests for the issue of the PPL(H) and skill tests and proficiency checks for single-pilot single-engine helicopter type ratings entered in a PPL(H), provided that the examiner has completed 1 000 hours of flight time as a pilot on helicopters, including at least 250 hours of flight instruction;
 - (2) skill tests for the issue of the CPL(H) and skill tests and proficiency checks for single-pilot single-engine helicopter type ratings entered in a CPL(H), provided the examiner has completed 2 000 hours of flight time as pilot on helicopters, including at least 250 hours of flight instruction;
 - (3) skill tests and proficiency checks for single-pilot multi-engine helicopter type ratings entered in a PPL(H) or a CPL(H), provided the examiner has completed the requirements in (1) or (2), as applicable, and holds a CPL(H) or ATPL(H) and, when applicable, an IR(H);
 - (4) skill tests and proficiency checks for the LAPL(H), provided that the examiner has completed at least 500 hours of flight time as a pilot on helicopters, including at least 150 hours of flight instruction.

- (c) FE(As). The privileges of an FE for airships are to conduct skill tests for the issue of the PPL(As) and CPL(As) and skill tests and proficiency checks for the associated airship type ratings, provided that the examiner has completed 500 hours of flight time as a pilot on airships, including 100 hours of flight instruction.
- (d) FE(G). The privileges of an FE for gyroplanes are to conduct skill tests and proficiency checks for the GPL and for associated privileges for gyroplane classes and types, provided that the FE has completed at least 500 hours of flight time as a pilot on gyroplanes, including at least 100 hours of flight instruction, of which up to 40 hours may be flight instruction conducted as FI(A) or FI(H).

FCL.1010.FE FE — Prerequisites

An applicant for an FE certificate shall hold an FI certificate in the appropriate aircraft category.

SECTION 3*Specific requirements for type rating examiners — TRE***FCL.1005.TRE TRE — Privileges and conditions**

- (a) TRE(A) and TRE(PL). The privileges of a TRE for aeroplanes or powered-lift aircraft are to conduct:
- (1) skill tests for the initial issue of type ratings for aeroplanes or powered-lift aircraft, as applicable;
 - (2) proficiency checks for the revalidation or renewal of type ratings and IRs;
 - (3) skill tests for ATPL(A) issue;
 - (4) skill tests for MPL issue, provided that the examiner has complied with the requirements in FCL.925;
 - (5) assessments of competence for the issue, revalidation or renewal of a TRI or SFI certificates in the applicable aircraft category, provided that they have completed at least 3 years as a TRE and have undergone specific training for the assessment of competence in accordance with point FCL.1015 (b).
- (b) TRE(H). The privileges of a TRE(H) are to conduct:
- (1) skill tests and proficiency checks for the issue, revalidation or renewal of helicopter type ratings;
 - (2) proficiency checks for the revalidation or renewal of IRs, provided the TRE(H) holds a valid IR(H);
 - (3) skill tests for ATPL(H) issue;
 - (4) assessments of competence for the issue, revalidation or renewal of a TRI(H) or SFI(H) certificates, provided that they have completed at least 3 years as a TRE and have undergone specific training for the assessment of competence in accordance with point FCL.1015 (b).

FCL.1010.TRE TRE — Prerequisites

- (a) TRE(A) and TRE(PL). Applicants for a TRE certificate for aeroplanes and powered-lift aircraft shall:
- (1) in the case of multi-pilot aeroplanes or powered-lift aircraft, have completed 1 500 hours of flight time as a pilot of multi-pilot aeroplanes or powered-lift aircraft, as applicable, of which at least 500 hours shall be as PIC;
 - (2) in the case of single-pilot high-performance complex aeroplanes, have completed 500 hours of flight time as a pilot of single-pilot aeroplanes, of which at least 200 hours shall be as PIC;
 - (3) hold a CPL or ATPL and a TRI certificate for the applicable type;
 - (4) for the initial issue of a TRE certificate, have completed at least 50 hours of flight instruction as a TRI, FI or SFI in the applicable type or an FSTD representing that type.
- (b) TRE(H). Applicants for a TRE (H) certificate for helicopters shall:
- (1) hold a TRI(H) certificate or, in the case of single-pilot single-engine helicopters, a valid FI(H) certificate, for the applicable type;

- (2) for the initial issue of a TRE certificate, have completed 50 hours of flight instruction as a TRI, FI or SFI in the applicable type or an FSTD representing that type;
- (3) in the case of multi-pilot helicopters, hold a CPL(H) or ATPL(H) and have completed 1 500 hours of flight as a pilot on multi-pilot helicopters, of which at least 500 hours shall be as PIC;
- (4) in the case of single-pilot multi-engine helicopters:
 - (i) have completed 1 000 hours of flight as pilot on helicopters, of which at least 500 hours shall be as PIC;
 - (ii) hold a CPL(H) or ATPL(H) and, when applicable, a valid IR(H);
- (5) in the case of single-pilot single-engine helicopters:
 - (i) have completed 750 hours of flight as a pilot on helicopters, of which at least 500 hours shall be as PIC;
 - (ii) hold a CPL(H) or ATPL(H).
- (6) Before the privileges of a TRE(H) are extended from single-pilot operations to multi-pilot operations on the same type of helicopter, the holder shall have either:
 - (i) at least 100 hours in multi-pilot operations on this type; or
 - (ii) at least 350 hours in multi-pilot operations in any aircraft category.
- (7) In the case of applicants for the first multi-pilot multi-engine TRE certificate, the 1 500 hours of flight experience on multi-pilot helicopters required in (b)(3) may be considered to have been met if they have completed the 500 hours of flight time as PIC on a multi-pilot helicopter of the same type.

SECTION 4***Specific requirements for Class Rating Examiner — CRE*****FCL.1005.CRE CRE — Privileges**

The privileges of a CRE are to conduct, for single-pilot aeroplanes, except for single-pilot high-performance complex aeroplanes:

- (a) skill tests for the issue of class and type ratings;
- (b) proficiency checks for:
 - (1) revalidation or renewal of class and type ratings;
 - (2) revalidation of IRs, provided that they have completed at least 1500 hours as pilots of aeroplanes and have competed at least 450 hours of flight time under IFR;
 - (3) renewal of IRs, provided that they comply with the requirements laid down in point FCL.1010.IRE(a); and
 - (4) revalidation and renewal of BIRs, provided that the CRE has completed:
 - (i) 1 500 hours of flight time as a pilot of aeroplanes; and
 - (ii) 450 hours of flight time under IFR; and
- (c) skill tests for the extension of LAPL(A) privileges to another class or variant of aeroplane.

FCL.1010.CRE CRE — Prerequisites

Applicants for a CRE certificate shall:

- (a) hold a CPL(A), MPL(A) or ATPL(A) with single-pilot privileges or have held it and hold a PPL(A);
- (b) hold a CRI or FI certificate with instructional privileges for the applicable class or type;
- (c) have completed 500 hours of flight time as a pilot on aeroplanes.

SECTION 5***Specific requirements for Instrument Rating Examiner — IRE*****FCL.1005.IRE IRE — Privileges**

The privileges of holders of an instrument rating examiner (IRE) certificate are to conduct skill tests for the issue and proficiency checks for the revalidation or renewal of BIRs and IRs.

FCL.1010.IRE IRE — Prerequisites**(a) IRE(A)**

Applicants for an IRE certificate for aeroplanes shall hold an IRI(A) or an FI(A) certificate with the privilege to instruct for the IR(A) and shall have completed:

- (1) 2000 hours of flight time as pilots of aeroplanes; and
- (2) 450 hours of flight time under IFR, of which 250 hours shall be as an instructor.

(b) IRE(H)

Applicants for an IRE certificate for helicopters shall hold an IRI(H) or an FI(H) certificate with the privilege to instruct for the IR(H) and shall have completed:

- (1) 2000 hours of flight time as pilots of helicopters; and
- (2) 300 hours of instrument flight time in helicopters, of which 200 hours shall be as an instructor.

(c) IRE(As)

Applicants for an IRE certificate for airships shall hold an IRI(As) or an FI(As) certificate with the privilege to instruct for the IR(As) and shall have completed:

- (1) 500 hours of flight time as pilots on airships; and
- (2) 100 hours of instrument flight time on airships, of which 50 hours shall be as an instructor.

SECTION 6***Specific requirements for Synthetic Flight Examiner — SFE*****FCL.1005.SFE SFE — Privileges and conditions****(a) SFE for aeroplanes (SFE(A)) and SFE for powered-lift aircraft (SFE(PL))**

The privileges of SFEs for aeroplanes or powered-lift aircraft are to conduct in an FFS, or for the assessments in point (5) on the applicable FSTD:

- (1) skill tests and proficiency checks for the issue, revalidation or renewal of type ratings for aeroplanes or powered-lift aircraft, as applicable;
- (2) proficiency checks for the revalidation or renewal of IRs if combined with the revalidation or renewal of a type rating, provided that they have passed a proficiency check for the aircraft type including the instrument rating within the last year;
- (3) skill tests for ATPL(A) issue;
- (4) skill tests for MPL issue, provided that they have complied with the requirements laid down in point FCL.925; and
- (5) assessments of competence for the issue, revalidation or renewal of an SFI certificate in the relevant aircraft category, provided that they have completed at least 3 years as an SFE(A) and have undergone specific training for the assessment of competence in accordance with point FCL.1015 (b).

(b) SFE for helicopters (SFE(H))

The privileges of an SFEs(H) are to conduct in an FFS or for the assessments in point (4) on the applicable FSTD:

- (1) skill tests and proficiency checks for the issue, revalidation and renewal of type ratings;
- (2) proficiency checks for the revalidation and renewal of IRs if those checks are combined with the revalidation or renewal of a type rating, provided that the SFEs have passed a proficiency check for the aircraft type including the instrument rating within the last year preceding the proficiency check;
- (3) skill tests for ATPL(H) issue; and
- (4) assessments of competence for the issue, revalidation or renewal of an SFI(H) certificate, provided that they have completed at least 3 years as an SFE(H) and have undergone specific training for the assessment of competence in accordance with point FCL.1015 (b).

FCL.1010.SFE SFE — Prerequisites**(a) SFE(A)**

Applicants for an SFE(A) certificate shall comply with all of the following conditions:

- (1) in the case of multi-pilot aeroplanes:
 - (i) hold or have held an ATPL(A) and a type rating;
 - (ii) hold an SFI(A) certificate for the applicable type of aeroplane; and

- (iii) have at least 1500 hours of flight time as pilots of multi-pilot aeroplanes;
 - (2) in the case of single-pilot high-performance complex aeroplanes:
 - (i) hold or have held a CPL(A) or an ATPL(A) and a type rating;
 - (ii) hold an SFI(A) certificate for the applicable class or type of aeroplane; and
 - (iii) have at least 500 hours of flight time as pilots of single-pilot aeroplanes.
 - (3) for the initial issue of an SFE certificate, have completed at least 50 hours of synthetic flight instruction as a TRI(A) or an SFI(A) on the applicable type.
- (b) SFE(H)

Applicants for an SFE(H) certificate shall comply with all of the following conditions:

- (1) hold or have held an ATPL(H), and a type rating for the applicable type of helicopter;
- (2) hold an SFI(H) certificate for the applicable type of helicopter;
- (3) in the case of multi-pilot helicopters, have at least 1000 hours of flight time as pilots of multi-pilot helicopters;
- (4) in the case of single-pilot helicopters in multi-pilot operations, have completed at least 350 hours in multi-pilot operations in any aircraft category;
- (5) for the initial issue of an SFE certificate, have completed at least 50 hours of synthetic flight instruction as a TRI(H) or an SFI(H) on the applicable type.

SECTION 7***Specific requirements for the flight instructor examiner — FIE*****FCL.1005.FIE FIE — Privileges and conditions**

- (a) FIE(A). The privileges of an FIE on aeroplanes are to conduct assessments of competence for the issue, revalidation or renewal of certificates for FI(A), CRI(A), IRI(A) and TRI(A) on single-pilot aeroplanes, provided that the relevant instructor certificate is held.
- (b) FIE(H). The privileges of an FIE on helicopters are to conduct assessments of competence for the issue, revalidation or renewal of certificates for FI(H), IRI(H) and TRI(H) on single-pilot helicopters, provided that the relevant instructor certificate is held.
- (c) FIE(As) and FIE(G). The privileges of an FIE on airships and gyroplane are to conduct assessments of competence for the issue, revalidation, or renewal of instructor certificates in the applicable aircraft category, provided that the relevant instructor certificate is held.

FCL.1010.FIE FIE — Prerequisites

- (a) FIE(A). Applicants for an FIE certificate for aeroplanes shall:
 - in case of applicants wishing to conduct assessments of competence:
 - (1) hold the relevant instructor certificate, as applicable;
 - (2) have completed 2 000 hours of flight time as a pilot on aeroplanes or TMGs; and
 - (3) have at least 100 hours of flight time instructing applicants for an instructor certificate.
- (b) FIE(H). Applicants for an FIE certificate for helicopters shall:
 - (1) hold the relevant instructor certificate, as applicable;
 - (2) have completed 2 000 hours of flight time as pilot on helicopters;
 - (3) have at least 100 hours of flight time instructing applicants for an instructor certificate.
- (c) FIE(As). Applicants for an FIE certificate for airships shall:
 - (1) have completed 500 hours of flight time as a pilot on airships;
 - (2) have at least 20 hours of flight time instructing applicants for an FI(As) certificate;
 - (3) hold the relevant instructor certificate.
- (d) FIE(G). Applicants for an FIE certificate for gyroplanes shall:
 - (1) hold an FI(G) instructor certificate;
 - (2) have completed 1 000 hours of flight time as a pilot on gyroplanes; and
 - (3) have completed at least 100 hours of flight time instructing applicants for an FI(G) certificate. In the case of applicants holding a FIE(A) or FIE(H) certificate, this requirement is reduced to 50 hours.

*Appendix 1**Crediting of theoretical knowledge***A. CREDITING OF THEORETICAL KNOWLEDGE FOR THE ISSUE OF A PILOT LICENCE —
BRIDGE INSTRUCTION AND EXAMINATION REQUIREMENTS****1. LAPL, PPL and GPL**

- 1.1. For the issue of an LAPL, the holder of an LAPL in another category of aircraft shall be fully credited towards requirements of theoretical knowledge on the common subjects established in point FCL.120(a).
- 1.2. For the issue of an LAPL or a PPL, holders of a PPL, CPL or ATPL in another category of aircraft shall be credited towards requirements of theoretical knowledge on the common subjects established in point FCL.215(a). This credit shall also apply to applicants for an LAPL or a PPL who hold a BPL or an SPL, except that the subject 'navigation' shall not be credited.
- 1.3. For the issue of a PPL, the holder of an LAPL in the same category of aircraft shall be fully credited towards the requirements of theoretical knowledge instruction and examination. That credit shall also apply to applicants for a PPL who have already successfully completed the theoretical knowledge examination for the LAPL in the same aircraft category, as long as it is within the validity period specified in point FCL.025(c).
- 1.4. By way of derogation from point 1.2, for the issue of an LAPL(A), the holder of an SPL with privileges to fly TMGs shall demonstrate an adequate level of theoretical knowledge for the SEP aeroplane-land class in accordance with point FCL.135.A(a)(2).
- 1.5. For the issue of a GPL, the holder of a pilot licence for aeroplanes or helicopters in accordance with this Regulation shall be credited in full towards the theoretical knowledge instruction and examination requirements in the following subjects:
 - (a) Air law and ATC procedures,
 - (b) Human performance,
 - (c) Meteorology,
 - (d) Communications,
 - (e) Navigation.

2. CPL

- 2.1. An applicant for a CPL holding a CPL in another category of aircraft shall have received theoretical knowledge bridge instruction on an ATO according to the differences identified between the CPL syllabi for different aircraft categories.
- 2.2. The applicant shall pass theoretical knowledge examinations as set out in this Regulation for the following subjects in the appropriate aircraft category:
 - 021 — Aircraft general knowledge: airframe and systems, electrics, power plant, emergency equipment;
 - 022 — Aircraft general knowledge: instrumentation;

032/034 — Performance aeroplanes or helicopters, as applicable;

070 — Operational procedures;

081/082 — Principles of flight for aeroplanes or helicopters, as applicable.

2.3. An applicant for a CPL having passed the relevant theoretical examinations for an IR in the same category of aircraft is credited towards the theoretical knowledge requirements in the following subjects:

- Human Performance,
- Meteorology.

2.4. Applicants for a CPL that have passed the relevant theoretical knowledge examinations for an IR in the same category of aircraft are credited towards the theoretical knowledge requirements in the communications subject.

3. ATPL

3.1. An applicant for an ATPL holding an ATPL in another category of aircraft shall have received theoretical knowledge bridge instruction at an ATO according to the differences identified between the ATPL syllabi for different aircraft categories.

3.2. Applicants shall pass theoretical knowledge examinations as defined in this Regulation for the following subjects in the appropriate aircraft category:

021 — Aircraft general knowledge: airframe and systems, electrics, power plant, emergency equipment;

022 — Aircraft general knowledge: instrumentation;

032/034 — Performance aeroplanes or helicopters, as applicable;

070 — Operational procedures;

081/082 — Principles of flight for aeroplanes or helicopters, as applicable.

3.3. An applicant for an ATPL(A) having passed the relevant theoretical examination for a CPL(A) is credited towards the theoretical knowledge requirements in subject VFR Communications.

3.4. An applicant for an ATPL(H), having passed the relevant theoretical examinations for a CPL(H) is credited towards the theoretical knowledge requirements in the following subjects:

- Air Law,
- Principles of Flight (Helicopter),
- VFR Communications.

3.5. An applicant for an ATPL(A) having passed the relevant theoretical examination for an IR(A) is credited towards the theoretical knowledge requirements in subject IFR Communications.

3.6. An applicant for an ATPL(H) with an IR(H), having passed the relevant theoretical examinations for a CPL(H) is credited towards the theoretical knowledge requirements in the following subjects:

- Principles of Flight (Helicopter),

- VFR Communications.

4. IR

4.1. Applicants for an IR, or for a BIR, who have passed the relevant theoretical examinations for a CPL in the same aircraft category, shall be credited towards the theoretical knowledge requirements in the following subjects:

- Human Performance,
- Meteorology
- Communication.

4.2. An applicant for an IR(H) having passed the relevant theoretical examinations for an ATPL(H) VFR is required to pass the following examination subjects:

- Air Law,
- Flight Planning and Flight Monitoring,
- Radio Navigation,
- IFR Communications

Appendix 2

Language Proficiency Rating Scale — Expert, extended and operational level

Level	Pronunciation	Structure	Vocabulary	Fluency	Comprehension	Interactions
Expert (Level 6)	Pronunciation, stress, rhythm, and intonation, though possibly influenced by the first language or regional variation, almost never interfere with ease of understanding.	Both basic and complex grammatical structures and sentence patterns are consistently well controlled.	Vocabulary range and accuracy are sufficient to communicate effectively on a wide variety of familiar and unfamiliar topics. Vocabulary is idiomatic, nuanced and sensitive to register.	Able to speak at length with a natural, effortless flow. Varies speech flow for stylistic effect, e.g. to emphasise a point. Uses appropriate discourse markers and connectors spontaneously.	Comprehension is consistently accurate in nearly all contexts and includes comprehension of linguistic and cultural subtleties.	Interacts with ease in nearly all situations. Is sensitive to verbal and non-verbal cues, and responds to them appropriately.
Extended (Level 5)	Pronunciation, stress, rhythm, and intonation, though influenced by the first language or regional variation, rarely interfere with ease of understanding.	Basic grammatical structures and sentence patterns are consistently well controlled. Complex structures are attempted but with errors which sometimes interfere with meaning.	Vocabulary range and accuracy are sufficient to communicate effectively on common, concrete, and work-related topics. Paraphrases consistently and successfully. Vocabulary is sometimes idiomatic.	Able to speak at length with relative ease on familiar topics, but may not vary speech flow as a stylistic device. Can make use of appropriate discourse markers or connectors.	Comprehension is accurate on common, concrete, and work-related topics and mostly accurate when the speaker is confronted with a linguistic or situational complication or an unexpected turn of events. Is able to comprehend a range of speech varieties (dialect and/or accent) or registers.	Responses are immediate, appropriate, and informative. Manages the speaker/listener relationship effectively.

Level	Pronunciation	Structure	Vocabulary	Fluency	Comprehension	Interactions
Operational (Level 4)	Pronunciation, stress, rhythm, and intonation are influenced by the first language or regional variation but only sometimes interfere with ease of understanding.	Basic grammatical structures and sentence patterns are used creatively and are usually well controlled. Errors may occur, particularly in unusual or unexpected circumstances, but rarely interfere with meaning.	Vocabulary range and accuracy are usually sufficient to communicate effectively on common, concrete, and work-related topics. Can often paraphrase successfully when lacking vocabulary particularly in unusual or unexpected circumstances.	Produces stretches of language at an appropriate tempo. There may be occasional loss of fluency on transition from rehearsed or formulaic speech to spontaneous interaction, but this does not prevent effective communication. Can make limited use of discourse markers and connectors. Fillers are not distracting.	Comprehension is mostly accurate on common, concrete, and work-related topics when the accent or variety used is sufficiently intelligible for an international community of users. When the speaker is confronted with a linguistic or situational complication or an unexpected turn of events, comprehension may be slower or require clarification strategies.	Responses are usually immediate, appropriate, and informative. Initiates and maintains exchanges even when dealing with an unexpected turn of events. Deals adequately with apparent misunderstandings by checking, confirming, or clarifying.

*Appendix 3****Training courses for the issue of a CPL and an ATPL***

1. This Appendix describes the requirements for the different types of training courses for the issue of a CPL and an ATPL, with and without an IR.
2. An applicant wishing to transfer to another ATO during a training course shall apply to the CAA for a formal assessment of the further hours of training required.

A. ATP integrated course — Aeroplanes**GENERAL**

1. The aim of the ATP(A) integrated course is to train pilots to the level of proficiency necessary to enable them to operate as co-pilot on multi-pilot multi-engine aeroplanes in commercial air transport and to obtain the CPL(A)/IR.
2. An applicant wishing to undertake an ATP(A) integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(A) or PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of a PPL(A) or PPL(H) entrant, 50 % of the hours flown prior to the course shall be credited, up to a maximum of 40 hours flying experience, or 45 hours if an aeroplane night rating has been obtained, of which up to 20 hours may count towards the requirement for dual instruction flight time.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to the ATPL(A) knowledge level;
 - (b) visual and instrument flying training;
 - (c) training in MCC for the operation of multi-pilot aeroplanes; and
 - (d) UPRT in accordance with FCL.745.A unless applicants have already completed this training course before starting the ATP integrated course.
5. Applicants failing or being unable to complete the entire ATP(A) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges and an IR if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. An ATP(A) theoretical knowledge course shall comprise at least 750 hours of instruction.
- 7.1. The MCC course shall comprise at least 25 hours of theoretical knowledge instruction and exercises.
- 7.2. The theoretical knowledge instruction in UPRT shall be conducted in accordance with FCL.745.A.

THEORETICAL KNOWLEDGE EXAMINATION

8. An applicant shall demonstrate the level of knowledge appropriate to the privileges granted to the holder of an ATPL(A).

FLYING TRAINING

9. The flying training, not including type rating training, shall comprise a total of at least 195 hours, including all progress tests, of which up to 55 hours for the entire course may be instrument ground time. Within the total of 195 hours, applicants shall complete at least:
- (a) 95 hours of dual instruction, of which up to 55 hours may be instrument ground time;
 - (b) 70 hours as PIC, of which up to 55 hours may be SPIC. The instrument flight time as SPIC shall only be counted as PIC flight time up to a maximum of 20 hours;
 - (c) 50 hours of cross-country flight as PIC, including one VFR cross-country flight of at least 540 km (300 NM), in the course of which full-stop landings at two aerodromes different from the aerodrome of departure shall be made; and
 - (d) 5 hours of flight time at night, comprising 3 hours of dual instruction, which shall include at least:
 - (1) 1 hour of cross-country navigation;
 - (2) five solo take-offs; and
 - (3) five solo full-stop landings;
 - (e) UPRT flight instruction in accordance with FCL.745.A;
 - (f) 115 hours of instrument time comprising, at least:
 - (1) 20 hours as SPIC;
 - (2) 15 hours of MCC, for which an FFS or an FNPT II may be used;
 - (3) 50 hours of instrument flight instruction, of which up to:
 - (i) 25 hours may be instrument ground time in an FNPT I; or
 - (ii) 40 hours may be instrument ground time in an FNPT II, an FTD 2 or an FFS, of which up to 10 hours may be conducted in an FNPT I.
- Applicants holding a BIR or a course completion certificate for the Basic Instrument Flight Module shall be credited with up to 10 hours towards the required instrument instruction time. Hours done in a BITD shall not be credited.
- (g) 5 hours in an aeroplane which:
 - (1) is certificated for the carriage of at least 4 persons; and
 - (2) has a variable pitch propeller and retractable landing gear.

SKILL TEST

10. Upon completion of the related flying training, the applicant shall take the CPL(A) skill test on either a single-engine or a multi-engine aeroplane and the IR skill test on a multi-engine aeroplane.

B. ATP modular course — Aeroplanes

1. Applicants for an ATPL(A) who complete their theoretical knowledge instruction at a modular course shall:
 - (a) hold at least a PPL(A) issued in accordance with Annex 1 to the Chicago Convention; and complete at least the following hours of theoretical knowledge instruction:
 - (1) for applicants holding a PPL(A): 650 hours;
 - (2) for applicants holding a CPL(A): 400 hours;
 - (3) for applicants holding an IR(A): 500 hours;
 - (4) for applicants holding a CPL(A) and an IR(A): 250 hours.

The theoretical knowledge instruction shall be completed before the skill test for the ATPL(A) is taken.

C. CPL/IR integrated course — Aeroplanes**GENERAL**

1. The aim of the CPL(A) and IR(A) integrated course is to train pilots to the level of proficiency necessary to operate single-pilot single-engine or multi-engine aeroplanes in commercial air transport and to obtain the CPL(A)/IR.
2. An applicant wishing to undertake a CPL(A)/IR integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(A) or PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of a PPL(A) or PPL(H) entrant, 50 % of the hours flown prior to the course shall be credited, up to a maximum of 40 hours flying experience, or 45 hours if an aeroplane night rating has been obtained, of which up to 20 hours may count towards the requirement for dual instruction flight time.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(A) and IR knowledge level; and
 - (b) visual and instrument flying training.
5. An applicant failing or unable to complete the entire CPL/IR(A) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges and an IR if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. A CPL(A)/IR theoretical knowledge course shall comprise at least 500 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(A) and an IR.

FLYING TRAINING

8. The flying training, not including type rating training, shall comprise a total of at least 180 hours, to include all progress tests, of which up to 40 hours for the entire course may be instrument ground time. Within the total of 180 hours, applicants shall complete at least:
- (a) 80 hours of dual instruction, of which up to 40 hours may be instrument ground time;
 - (b) 70 hours as PIC, of which up to 55 hours may be SPIC. The instrument flight time as SPIC shall only be counted as PIC flight time up to a maximum of 20 hours;
 - (c) 50 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 540 km (300 NM), in the course of which full stop landings at two aerodromes different from the aerodrome of departure shall be made;
 - (d) 5 hours flight time shall be completed at night, comprising 3 hours of dual instruction, which shall include at least 1 hour of cross-country navigation and 5 solo take-offs and 5 solo full stop landings; and
 - (e) 100 hours of instrument time comprising, at least:
 - (1) 20 hours as SPIC; and
 - (2) 50 hours of instrument flight instruction, of which up to:
 - (i) 25 hours may be instrument ground time in an FNPT I; or
 - (ii) 40 hours may be instrument ground time in an FNPT II, FTD 2 or FFS, of which up to 10 hours may be conducted in an FNPT I.

Applicants holding a BIR or a course completion certificate for the Basic Instrument Flight Module shall be credited with up to 10 hours towards the required instrument instruction time. Hours done in a BITD shall not be credited; and

- (f) 5 hours to be carried out in an aeroplane certificated for the carriage of at least 4 persons that has a variable pitch propeller and retractable landing gear.

SKILL TESTS

9. Upon completion of the related flying training the applicant shall take the CPL(A) skill test and the IR skill test on either a multi-engine aeroplane or a single-engine aeroplane.

D. CPL integrated course — Aeroplanes**GENERAL**

1. The aim of the CPL(A) integrated course is to train pilots to the level of proficiency necessary for the issue of a CPL(A).
2. An applicant wishing to undertake a CPL(A) integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(A) or PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of a PPL(A) or PPL(H) entrant, 50 % of the hours flown prior to the course shall be credited, up to a maximum

of 40 hours flying experience, or 45 hours if an aeroplane night rating has been obtained, of which up to 20 hours may count towards the requirement for dual instruction flight time.

4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(A) knowledge level; and
 - (b) visual and instrument flying training.
5. An applicant failing or unable to complete the entire CPL(A) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. A CPL(A) theoretical knowledge course shall comprise at least 350 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(A).

FLYING TRAINING

8. The flying training, not including type rating training, shall comprise a total of at least 150 hours, to include all progress tests, of which up to 5 hours for the entire course may be instrument ground time. Within the total of 150 hours, applicants shall complete at least:
 - (a) 80 hours of dual instruction, of which up to 5 hours may be instrument ground time;
 - (b) 70 hours as PIC, of which up to 55 hours may be as SPIC;
 - (c) 20 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 540 km (300 NM), in the course of which full stop landings at two aerodromes different from the aerodrome of departure shall be made;
 - (d) 5 hours flight time shall be completed at night, comprising 3 hours of dual instruction, which shall include at least 1 hour of cross-country navigation and 5 solo take-offs and 5 solo full stop landings;
 - (e) 10 hours of instrument flight instruction, of which up to 5 hours may be instrument ground time in an FNPT I, FTD 2, FNPT II or FFS. Applicants holding a BIR or a course completion certificate for the Basic Instrument Flight Module shall be credited with up to 10 hours towards the required instrument instruction time. Hours done in a BITD shall not be credited;
 - (f) 5 hours to be carried out in an aeroplane certificated for the carriage of at least four persons that has a variable pitch propeller and retractable landing gear.

SKILL TEST

9. Upon completion of the flying training the applicant shall take the CPL(A) skill test on a single-engine or a multi-engine aeroplane.

E. CPL modular course — Aeroplanes**GENERAL**

1. The aim of the CPL(A) modular course is to train PPL(A) holders to the level of proficiency necessary for the issue of a CPL(A).
2. Before commencing a CPL(A) modular course an applicant shall be the holder of a PPL(A) issued in accordance with Annex 1 to the Chicago Convention.
3. Before commencing the flight training the applicant shall:
 - (a) have completed 150 hours flight time; including 50 hours as PIC on aeroplanes of which 10 hours shall be cross-country.

Except for the requirement of 50 hours as PIC in aeroplanes, hours as PIC in other categories of aircraft may account for the 150 hours of aeroplane flight time in any of the following cases:

- (1) 20 hours in helicopters, if applicants hold a PPL(H);
 - (2) 50 hours in helicopters, if applicants hold a CPL(H);
 - (3) 10 hours in TMGs or sailplanes;
 - (4) 20 hours in airships, if applicants hold a PPL(As);
 - (5) 50 hours in airships, if applicants hold a CPL(As).
 - (b) have complied with the prerequisites for the issue of a class or type rating for multi-engine aeroplanes in accordance with Subpart H, if a multi-engine aeroplane is to be used on the skill test.
4. An applicant wishing to undertake a modular CPL(A) course shall complete all the flight instructional stages in one continuous course of training as arranged by an ATO. The theoretical knowledge instruction may be given at an ATO conducting theoretical knowledge instruction only.
5. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(A) knowledge level; and
 - (b) visual and instrument flying training.

THEORETICAL KNOWLEDGE

6. An approved CPL(A) theoretical knowledge course shall comprise at least 250 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(A).

FLYING TRAINING

8. Applicants without an IR shall be given at least 25 hours dual flight instruction, including 10 hours of instrument instruction of which up to 5 hours may be instrument ground time in a BITD, an FNPT I or II, an FTD 2 or an FFS.
9. Applicants holding a valid IR(A) shall be credited towards the dual instrument instruction time. Applicants holding a valid IR(H) shall be credited up to 5 hours of the dual instrument instruction time, in which case at least 5 hours dual instrument instruction time shall be given in an aeroplane. Applicants holding a BIR or a Course Completion Certificate for the Basic Instrument Flight Module shall be credited with up to 10 hours towards the required instrument instruction time.
10. (a) Applicants with a valid IR shall be given at least 15 hours dual visual flight instruction.
(b) Applicants without a night rating aeroplane shall be given additionally at least 5 hours night flight instruction, comprising 3 hours of dual instruction, which shall include at least 1 hour of cross-country navigation and 5 solo take-offs and 5 solo full stop landings.
11. At least 5 hours of the flight instruction shall be carried out in an aeroplane certificated for the carriage of at least 4 persons and have a variable pitch propeller and retractable landing gear.

EXPERIENCE

12. The applicant for a CPL(A) shall have completed at least 200 hours flight time, including at least:
 - (a) 100 hours as PIC, of which 20 hours of cross-country flight as PIC, which shall include a VFR cross-country flight of at least 540 km (300 NM), in the course of which full stop landings at two aerodromes different from the aerodrome of departure shall be made;
 - (b) 5 hours of flight time shall be completed at night, comprising 3 hours of dual instruction, which shall include at least 1 hour of cross-country navigation and 5 solo take-offs and 5 solo full stop landings; and
 - (c) 10 hours of instrument flight instruction, of which up to 5 hours may be instrument ground time in an FNPT I, or FNPT II or FFS. Applicants holding a BIR or a course completion certificate for the Basic Instrument Flight Module shall be credited with up to 10 hours towards the required instrument instruction time. Hours done in a BITD shall not be credited;
 - (d) 6 hours of flight time shall be completed in a multi-engine aeroplane, if a multi-engine aeroplane is used for the skill test.
 - (e) Hours as PIC of other categories of aircraft may count towards the 200 hours flight time, in the following cases:
 - (i) 30 hours in helicopter, if the applicant holds a PPL(H); or
 - (ii) 100 hours in helicopters, if the applicant holds a CPL(H); or
 - (iii) 30 hours in TMGs or sailplanes; or
 - (iv) 30 hours in airships, if the applicant holds a PPL(As); or
 - (v) 60 hours in airships, if the applicant holds a CPL(As).

SKILL TEST

13. Upon completion of the flying training and relevant experience requirements the applicant shall take the CPL(A) skill test on either a single-engine or a multi-engine aeroplane.

F. ATP/IR integrated course — Helicopters**GENERAL**

1. The aim of the ATP(H)/IR integrated course is to train pilots to the level of proficiency necessary to enable them to operate as co-pilot on multi-pilot multi-engine helicopters in commercial air transport and to obtain the CPL(H)/IR.
2. An applicant wishing to undertake an ATP(H)/IR integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of a PPL(H) entrant, 50 % of the relevant experience shall be credited, up to a maximum of:
 - (a) 40 hours, of which up to 20 hours may be dual instruction; or
 - (b) 50 hours, of which up to 25 hours may be dual instruction, if a helicopter night rating has been obtained.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to the ATPL(H) and IR knowledge level;
 - (b) visual and instrument flying training; and
 - (c) training in MCC for the operation of multi-pilot helicopters.
5. An applicant failing or unable to complete the entire ATP(H)/IR course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges and an IR, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. An ATP(H)/IR theoretical knowledge course shall comprise at least 750 hours of instruction.
7. The MCC course shall comprise at least 25 hours of theoretical knowledge instruction exercises.

THEORETICAL KNOWLEDGE EXAMINATION

8. An applicant shall demonstrate the level of knowledge appropriate to the privileges granted to the holder of an ATPL(H) and an IR.

FLYING TRAINING

9. The flying training shall comprise a total of at least 195 hours, to include all progress tests. Within the total of 195 hours, applicants shall complete at least:
 - (a) 140 hours of dual instruction, of which:
 - (1) 75 hours visual instruction may include:

- (i) 30 hours in a helicopter FFS, level C/D; or
 - (ii) 25 hours in a FTD 2,3; or
 - (iii) 20 hours in a helicopter FNPT II/III; or
 - (iv) 20 hours in an aeroplane or TMG;
- (2) 50 hours instrument instruction may include:
- (i) up to 20 hours in a helicopter FFS or FTD 2,3 or FNPT II/III; or
 - (ii) 10 hours in at least a helicopter FNPT 1 or an aeroplane;
- (3) 15 hours MCC, for which a helicopter FFS or helicopter FTD 2,3(MCC) or FNPT II/III(MCC) may be used.

If the helicopter used for the flying training is of a different type from the helicopter FFS used for the visual training, the maximum credit shall be limited to that allocated for the helicopter FNPT II/III;

- (b) 55 hours as PIC, of which 40 hours may be as SPIC. At least 14 hours solo day and 1 hour solo night shall be made;
- (c) 50 hours of cross-country flight, including at least 10 hours of cross-country flight as SPIC including a VFR cross-country flight of at least 185 km (100 NM) in the course of which landings at two different aerodromes from the aerodrome of departure shall be made;
- (d) 5 hours flight time in helicopters shall be completed at night comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing;
- (e) 50 hours of dual instrument time comprising:
 - (i) 10 hours basic instrument instruction time; and
 - (ii) 40 hours IR Training, which shall include at least 10 hours in a multi-engine IFR-certificated helicopter.

SKILL TESTS

10. Upon completion of the related flying training, the applicant shall take the CPL(H) skill test on a multi-engine helicopter and the IR skill test on an IFR certificated multi-engine helicopter and shall comply with the requirements for MCC training.

G. ATP integrated course — Helicopters

GENERAL

1. The aim of the ATP(H) integrated course is to train pilots to the level of proficiency necessary to enable them to operate as co-pilot on multi-pilot multi-engine helicopters limited to VFR privileges in commercial air transport and to obtain the CPL(H).
2. An applicant wishing to undertake an ATP(H) integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.

3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of a PPL(H) entrant, 50 % of the relevant experience shall be credited, up to a maximum of:
 - (a) 40 hours, of which up to 20 hours may be dual instruction; or
 - (b) 50 hours, of which up to 25 hours may be dual instruction, if a helicopter night rating has been obtained.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to the ATPL(H) knowledge level;
 - (b) visual and basic instrument flying training; and
 - (c) training in MCC for the operation of multi-pilot helicopters.
5. An applicant failing or unable to complete the entire ATP(H) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. An ATP(H) theoretical knowledge course shall comprise at least 650 hours of instruction.
7. The MCC course shall comprise at least 20 hours of theoretical knowledge instruction exercises.

THEORETICAL KNOWLEDGE EXAMINATION

8. An applicant shall demonstrate the level of knowledge appropriate to the privileges granted to the holder of an ATPL (H).

FLYING TRAINING

9. The flying training shall comprise a total of at least 150 hours, to include all progress tests. Within the total of 150 hours, applicants shall complete at least:
 - (a) 95 hours of dual instruction, of which:
 - (i) 75 hours visual instruction may include:
 - (1) 30 hours in a helicopter FFS level C/D; or
 - (2) 25 hours in a helicopter FTD 2,3; or
 - (3) 20 hours in a helicopter FNPT II/III; or
 - (4) 20 hours in an aeroplane or TMG;
 - (ii) 10 hours basic instrument instruction may include 5 hours in at least a helicopter FNPT I or an aeroplane;
 - (iii) 10 hours MCC, for which a helicopter: helicopter FFS or FTD 2,3(MCC) or FNPT II/III(MCC) may be used.

If the helicopter used for the flying training is of a different type from the helicopter FFS used for the visual training, the maximum credit shall be limited to that allocated for the helicopter FNPT II/III;

- (b) 55 hours as PIC, of which 40 hours may be as SPIC. At least 14 hours solo day and 1 hour solo night shall be made;
- (c) 50 hours of cross-country flight, including at least 10 hours of cross-country flight as SPIC, including a VFR cross-country flight of at least 185 km (100 NM) in the course of which landings at two different aerodromes from the aerodrome of departure shall be made;
- (d) 5 hours flight time in helicopters shall be completed at night comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing.

SKILL TESTS

10. Upon completion of the related flying training the applicant shall take the CPL(H) skill test on a multi-engine helicopter and comply with MCC requirements.

H. ATP modular course — Helicopters

1. Applicants for an ATPL(H) who complete their theoretical knowledge instruction at a modular course shall hold at least a PPL(H) and complete at least the following hours of instruction within a period of 18 months:
 - (a) for applicants holding a PPL(H) issued in accordance with Annex 1 to the Chicago Convention: 550 hours;
 - (b) for applicants holding a CPL(H): 300 hours.
2. Applicants for an ATPL(H)/IR who complete their theoretical knowledge instruction at a modular course shall hold at least a PPL(H) and complete at least the following hours of instruction:
 - (a) for applicants holding a PPL(H): 650 hours;
 - (b) for applicants holding a CPL(H): 400 hours;
 - (c) for applicants holding an IR(H): 500 hours;
 - (d) for applicants holding a CPL(H) and an IR(H): 250 hours.

I. CPL/IR integrated course — Helicopters

GENERAL

1. The aim of the CPL(H)/IR integrated course is to train pilots to the level of proficiency necessary to operate single-pilot multi-engine helicopters and to obtain the CPL(H)/IR multi-engine helicopter.
2. An applicant wishing to undertake a CPL(H)/IR integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of an entrant holding a PPL(H), 50 % of the relevant experience shall be credited, up to a maximum of:
 - (a) 40 hours, of which up to 20 hours may be dual instruction; or

- (b) 50 hours, of which up to 25 hours may be dual instruction, if a helicopter night rating has been obtained.
- 4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(H) and IR knowledge level, and the initial multi-engine helicopter type rating; and
 - (b) visual and instrument flying training.
- 5. An applicant failing or unable to complete the entire CPL(H)/IR course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges and an IR, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

- 6. A CPL(H)/IR theoretical knowledge course shall comprise at least 500 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

- 7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(H) and an IR.

FLYING TRAINING

- 8. The flying training shall comprise a total of at least 180 hours including all progress tests. Within the 180 hours, applicants shall complete at least:
 - (a) 125 hours of dual instruction, of which:
 - (i) 75 hours visual instruction, which may include:
 - (1) 30 hours in a helicopter FFS level C/D; or
 - (2) 25 hours in a helicopter FTD 2,3; or
 - (3) 20 hours in a helicopter FNPT II/III; or
 - (4) 20 hours in an aeroplane or TMG;
 - (ii) 50 hours instrument instruction which may include:
 - (1) up to 20 hours in a helicopter FFS or FTD 2,3, or FNPT II, III; or
 - (2) 10 hours in at least a helicopter FNPT I or an aeroplane.

If the helicopter used for the flying training is of a different type from the FFS used for the visual training, the maximum credit shall be limited to that allocated for the FNPT II/III;
 - (b) 55 hours as PIC, of which 40 hours may be as SPIC. At least 14 hours solo day and 1 hour solo night shall be made;
 - (c) 10 hours dual cross-country flying;
 - (d) 10 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 185 km (100 NM) in the course of which full stop landings at two different aerodromes from the aerodrome of departure shall be made;

- (e) 5 hours of flight time in helicopters shall be completed at night comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing;
- (f) 50 hours of dual instrument time comprising:
 - (i) 10 hours basic instrument instruction time; and
 - (ii) 40 hours IR Training, which shall include at least 10 hours in a multi-engine IFR-certificated helicopter.

SKILL TEST

9. Upon completion of the related flying training, the applicant shall take the CPL(H) skill test on either a multi-engine or a single-engine helicopter and the IR skill test on an IFR-certificated helicopter.

J. CPL integrated course — Helicopters**GENERAL**

1. The aim of the CPL(H) integrated course is to train pilots to the level of proficiency necessary for the issue of a CPL(H).
2. An applicant wishing to undertake a CPL(H) integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of an entrant holding a PPL(H), 50 % of the relevant experience shall be credited, up to a maximum of:
 - (a) 40 hours, of which up to 20 hours may be dual instruction; or
 - (b) 50 hours, of which up to 25 hours may be dual instruction if a helicopter night rating has been obtained.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(H) knowledge level; and
 - (b) visual and instrument flying training.
5. An applicant failing or unable to complete the entire CPL(H) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. An approved CPL(H) theoretical knowledge course shall comprise at least 350 hours of instruction or 200 hours if the applicant is the holder of a PPL.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(H).

FLYING TRAINING

8. The flying training shall comprise a total of at least 135 hours, to include all progress tests, of which up to 5 hours may be instrument ground time. Within the 135 hours total, applicants shall complete at least:

(a) 85 hours of dual instruction, of which:

(i) up to 75 hours may be visual instruction, and may include:

- (1) 30 hours in a helicopter FFS level C/D; or
- (2) 25 hours in a helicopter FTD 2,3; or
- (3) 20 hours in a helicopter FNPT II/III; or
- (4) 20 hours in an aeroplane or TMG;

(ii) up to 10 hours may be instrument instruction, and may include 5 hours in at least a helicopter FNPT I or an aeroplane.

If the helicopter used for the flying training is of a different type from the FFS used for the visual training, the maximum credit shall be limited to that allocated for the FNPT II/III;

- (b) 50 hours as PIC, of which 35 hours may be as SPIC. At least 14 hours solo day and 1 hour solo night shall be made;
- (c) 10 hours dual cross-country flying;
- (d) 10 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 185 km (100 NM) in the course of which full stop landings at two different aerodromes from the aerodrome of departure shall be made;
- (e) 5 hours flight time in helicopters shall be completed at night comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing;
- (f) 10 hours of instrument dual instruction time, including at least 5 hours in a helicopter.

SKILL TEST

9. Upon completion of the related flying training, the applicant shall take the CPL(H) skill test.

K. CPL modular course — Helicopters**GENERAL**

1. The aim of the CPL(H) modular course is to train PPL(H) holders to the level of proficiency necessary for the issue of a CPL(H).
2. Before commencing a CPL(H) modular course an applicant shall be the holder of a PPL(H) issued in accordance with Annex 1 to the Chicago Convention.
3. Before commencing the flight training the applicant shall:
 - (a) have completed 155 hours flight time, including 50 hours as PIC in helicopters of which 10

hours shall be cross-country.

Except for the requirement of 50 hours as PIC in helicopters, hours as PIC in other categories of aircraft may account for the 155 hours of helicopter flight time in any of the following cases:

- (1) 20 hours in aeroplanes if applicants hold a PPL(A);
 - (2) 50 hours in aeroplanes if applicants hold a CPL(A);
 - (3) 10 hours in TMGs or sailplanes;
 - (4) 20 hours in airships if applicants hold a PPL(As);
 - (5) 50 hours in airships if applicants hold a CPL(As);
- (b) have complied with FCL.725 and FCL.720.H if a multi-engine helicopter is to be used on the skill test.
4. An applicant wishing to undertake a modular CPL(H) course shall complete all the flight instructional stages in one continuous course of training as arranged by an ATO. The theoretical knowledge instruction may be given at an ATO that conducts theoretical knowledge instruction only.
5. The course shall comprise:
- (a) theoretical knowledge instruction to CPL(H) knowledge level; and
 - (b) visual and instrument flying training.

THEORETICAL KNOWLEDGE

6. An approved CPL(H) theoretical knowledge course shall comprise at least 250 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(H).

FLYING TRAINING

8. Applicants without an IR shall be given at least 30 hours dual flight instruction, of which:
- (a) 20 hours visual instruction, which may include 5 hours in a helicopter FFS or FTD 2,3 or FNPT II, III; and
 - (b) 10 hours instrument instruction, which may include 5 hours in at least a helicopter FTD 1 or FNPT I or aeroplane.
9. Applicants holding a valid IR(H) shall be fully credited towards the dual instrument instruction time. Applicants holding a valid IR(A) shall complete at least 5 hours of the dual instrument instruction time in a helicopter.
10. Applicants without a night rating helicopter shall be given additionally at least 5 hours night flight instruction comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing.

EXPERIENCE

11. The applicant for a CPL(H) shall have completed at least 185 hours flight time, including 50 hours as PIC, of which 10 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 185 km (100 NM), in the course of which full stop landings at two aerodromes different from the aerodrome of departure shall be made.

Hours as pilot-in-command of other categories of aircraft may count towards the 185 hours flight time, in the following cases:

- (a) 20 hours in aeroplanes, if the applicant holds a PPL(A); or
- (b) 50 hours in aeroplanes, if the applicant holds a CPL(A); or
- (c) 10 hours in TMGs or sailplanes; or
- (d) 20 hours in airships, if the applicant holds a PPL(As); or
- (e) 50 hours in airships, if the applicant holds a CPL(As).

SKILL TEST

12. Upon completion of the related flying training and relevant experience, the applicant shall take the CPL(H) skill test.

L. CPL/IR integrated course — Airships**GENERAL**

1. The aim of the CPL(As)/IR integrated course is to train pilots to the level of proficiency necessary to operate airships and to obtain the CPL(As)/IR.
2. An applicant wishing to undertake a CPL(As)/IR integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(As), PPL(A) or PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of an entrant holding a PPL(As), PPL(A) or PPL(H) shall be credited up to a maximum of:
 - (a) 10 hours, of which up to 5 hours may be dual instruction; or
 - (b) 15 hours, of which up to 7 hours may be dual instruction, if an airship night rating has been obtained.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(As) and IR knowledge level, and the initial airship type rating; and
 - (b) visual and instrument flying training.
5. An applicant failing or unable to complete the entire CPL/IR(As) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges and an IR, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. A CPL(As)/IR theoretical knowledge course shall comprise at least 500 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(As) and an IR.

FLYING TRAINING

8. The flying training shall comprise a total of at least 80 hours including all progress tests. Within the 80 hours, applicants shall complete at least:

- (a) 60 hours of dual instruction, of which:

- (i) 30 hours visual instruction, which may include:

- (1) 12 hours in an airship FFS; or
- (2) 10 hours in an airship FTD; or
- (3) 8 hours in an airship FNPT II/III; or
- (4) 8 hours in an aeroplane, helicopter or TMG;

- (ii) 30 hours instrument instruction which may include:

- (1) up to 12 hours in an airship FFS or FTD or FNPT II, III; or
- (2) 6 hours in at least an airship FTD 1 or FNPT I or aeroplane.

If the airship used for the flying training is of a different type from the FFS used for the visual training, the maximum credit shall be limited to 8 hours;

- (b) 20 hours as PIC, of which 5 hours may be as SPIC. At least 14 hours solo day and 1 hour solo night shall be made;
- (c) 5 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 90 km (50 NM) in the course of which two full stop landings at the destination aerodrome shall be made;
- (d) 5 hours flight time in airships shall be completed at night comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include take-off and landing;
- (e) 30 hours of dual instrument time comprising:
 - (i) 10 hours basic instrument instruction time; and
 - (ii) 20 hours IR Training, which shall include at least 10 hours in a multi-engine IFR-certificated airship.

SKILL TEST

9. Upon completion of the related flying training, the applicant shall take the CPL(As) skill test on either a multi-engine or a single-engine airship and the IR skill test on an IFR-certificated multi-engine airship.

M. CPL integrated course — Airships**GENERAL**

1. The aim of the CPL(As) integrated course is to train pilots to the level of proficiency necessary for the issue of a CPL(AS).
2. An applicant wishing to undertake a CPL(As) integrated course shall complete all the instructional stages in one continuous course of training as arranged by an ATO.
3. An applicant may be admitted to training either as an ab-initio entrant, or as a holder of a PPL(As), PPL(A) or PPL(H) issued in accordance with Annex 1 to the Chicago Convention. In the case of an entrant holding a PPL(As), PPL(A) or PPL(H) shall be credited up to a maximum of:
 - (a) 10 hours, of which up to 5 hours may be dual instruction; or
 - (b) 15 hours, of which up to 7 hours may be dual instruction if an airship night rating has been obtained.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(As) knowledge level; and
 - (b) visual and instrument flying training.
5. An applicant failing or unable to complete the entire CPL(As) course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

6. An approved CPL(As) theoretical knowledge course shall comprise at least 350 hours of instruction or 200 hours if the applicant is a PPL holder.

THEORETICAL KNOWLEDGE EXAMINATION

7. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(As).

FLYING TRAINING

8. The flying training shall comprise a total of at least 50 hours, to include all progress tests, of which up to 5 hours may be instrument ground time. Within the 50 hours total, applicants shall complete at least:
 - (a) 30 hours of dual instruction, of which up to 5 hours may be instrument ground time;
 - (b) 20 hours as PIC;
 - (c) 5 hours dual cross-country flying;
 - (d) 5 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 90 km (50 NM) in the course of which two full stop landings at the destination aerodrome shall be made;
 - (e) 5 hours flight time in airships shall be completed at night comprising 3 hours of dual

instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include take-off and landing;

- (f) 10 hours of instrument dual instruction time, including at least 5 hours in an airship.

SKILL TEST

9. Upon completion of the related flying training, the applicant shall take the CPL(As) skill test.

N. CPL modular course — Airships

GENERAL

1. The aim of the CPL(As) modular course is to train PPL(As) holders to the level of proficiency necessary for the issue of a CPL(As).
2. Before commencing a CPL(As) modular course an applicant shall:
 - (a) hold a PPL(As) issued in accordance with Annex 1 to the Chicago Convention;
 - (b) have completed 200 hours flight time as a pilot on airships, including 100 hours as PIC, of which 50 hours shall be cross-country.
3. An applicant wishing to undertake a modular CPL(As) course shall complete all the flight instructional stages in one continuous course of training as arranged by an ATO. The theoretical knowledge instruction may be given at an ATO that conducts theoretical knowledge instruction only.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to CPL(As) knowledge level; and
 - (b) visual and instrument flying training.

THEORETICAL KNOWLEDGE

5. An approved CPL(As) theoretical knowledge course shall comprise at least 250 hours of instruction.

THEORETICAL KNOWLEDGE EXAMINATION

6. An applicant shall demonstrate a level of knowledge appropriate to the privileges granted to the holder of a CPL(As).

FLYING TRAINING

7. Applicants without an IR shall be given at least 20 hours dual flight instruction, of which:
- 10 hours visual instruction, which may include 5 hours in an airship FFS or FTD 2,3 or FNPT II, III; and
- 10 hours instrument instruction, which may include 5 hours in at least an airship FTD 1 or FNPT I or aeroplane.
8. Applicants holding a valid IR(As) shall be fully credited towards the dual instrument instruction time. Applicants holding a valid IR in another category of aircraft shall complete at least 5 hours

of the dual instrument instruction time in an airship.

9. Applicants without a night rating airship shall be given additionally at least 5 hours night flight instruction comprising 3 hours of dual instruction including at least 1 hour of cross-country navigation and 5 solo night circuits. Each circuit shall include a take-off and a landing.

EXPERIENCE

10. The applicant for a CPL(As) shall have completed at least 250 hours flight time in airships, including 125 hours as PIC, of which 50 hours of cross-country flight as PIC, including a VFR cross-country flight of at least 90 km (50 NM), in the course of which a full stop landing at destination aerodrome.

Hours as PIC of other categories of aircraft may count towards the 185 hours flight time, in the following cases:

- (a) 30 hours in aeroplanes or helicopters, if the applicant holds a PPL(A) or PPL(H) respectively;
or
- (b) 60 hours in aeroplanes or helicopters, if the applicant holds a CPL(A) or CPL(H) respectively;
or
- (c) 10 hours in TMGs or sailplanes; or
- (d) 10 hours in balloons.

SKILL TEST

11. Upon completion of the related flying training and relevant experience, the applicant shall take the CPL(As) skill test.

*Appendix 4****Skill test for the issue of a CPL*****A. General**

1. An applicant for a skill test for the CPL shall have received instruction on the same class or type of aircraft to be used in the test.
2. An applicant shall pass all the relevant sections of the skill test. If any item in a section is failed, that section is failed. Failure in more than one section will require the applicant to take the entire test again. An applicant failing only in one section shall only repeat the failed section. Failure in any section of the retest, including those sections that have been passed on a previous attempt, will require the applicant to take the entire test again. All relevant sections of the skill test shall be completed within 6 months. Failure to achieve a pass in all relevant sections of the test in two attempts will require further training.
3. Further training may be required following any failed skill test. There is no limit to the number of skill tests that may be attempted.

CONDUCT OF THE TEST

4. Should the applicant choose to terminate a skill test for reasons considered inadequate by the Flight Examiner (FE), the applicant shall retake the entire skill test. If the test is terminated for reasons considered adequate by the FE, only those sections not completed shall be tested in a further flight.
5. At the discretion of the FE, any manoeuvre or procedure of the test may be repeated once by the applicant. The FE may stop the test at any stage if it is considered that the applicant's demonstration of flying skills requires a complete re-test.
6. An applicant shall be required to fly the aircraft from a position where the PIC functions can be performed and to carry out the test as if no other crew member is present. Responsibility for the flight shall be allocated in accordance with CAA regulations.
7. An applicant shall indicate to the FE the checks and duties carried out, including the identification of radio facilities. Checks shall be completed in accordance with the checklist for the aircraft on which the test is being taken. During pre-flight preparation for the test, the applicant is required to determine power settings and speeds. Performance data for take-off, approach and landing shall be calculated by the applicant in compliance with the operations manual or flight manual for the aircraft used.
8. The FE shall take no part in the operation of the aircraft except where intervention is necessary in the interests of safety or to avoid unacceptable delay to other traffic.

B. Content of the skill test for the issue of a CPL — Aeroplanes

1. The aeroplane used for the skill test shall meet the requirements for training aeroplanes, and shall be certificated for the carriage of at least four persons, have a variable pitch propeller and retractable landing gear.

2. The route to be flown shall be chosen by the FE and the destination shall be a controlled aerodrome. The applicant shall be responsible for the flight planning and shall ensure that all equipment and documentation for the execution of the flight are on board. The duration of the flight shall be at least 90 minutes.
3. The applicant shall demonstrate the ability to:
 - (a) operate the aeroplane within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge; and
 - (e) maintain control of the aeroplane at all times in such a manner that the successful outcome of a procedure or manoeuvre is never seriously in doubt.

FLIGHT TEST TOLERANCES

4. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the aeroplane used.

Height

normal flight	± 100 feet
with simulated engine failure	± 150 feet

Tracking on radio aids	$\pm 5^\circ$
------------------------	---------------

Heading

normal flight	$\pm 10^\circ$
with simulated engine failure	$\pm 15^\circ$

Speed

take-off and approach	± 5 knots
all other flight regimes	± 10 knots

CONTENT OF THE TEST

5. Items in Section 2(c) and (e)(iv), Section 3(g), and the whole of Sections 5 and 6 may be performed in an FNPT II or an FFS. The examiner may decide not to perform items in Section 6(d).

Use of the aeroplane checklists, airmanship, control of the aeroplane by external visual reference, anti-icing/de-icing procedures and principles of threat and error management apply in all sections.

SECTION 1 — PRE-FLIGHT OPERATIONS AND DEPARTURE

a	Pre-flight, including: Flight planning, Documentation, Mass and balance determination, Weather brief, NOTAMS
b	Aeroplane inspection and servicing
c	Taxiing and take-off
d	Performance considerations and trim
e	Aerodrome and traffic pattern operations
f	Departure procedure, altimeter setting, collision avoidance (lookout)
g	ATC liaison — compliance, R/T procedures

SECTION 2 — GENERAL AIRWORK

a	Control of the aeroplane by external visual reference, including straight and level, climb, descent, lookout
b	Flight at critically low airspeeds including recognition of and recovery from incipient and full stalls
c	Turns, including turns in landing configuration. Steep turns 45°
d	Flight at critically high airspeeds, including recognition of and recovery from spiral dives
e	Flight by reference solely to instruments, including: (i) level flight, cruise configuration, control of heading, altitude and airspeed (ii) climbing and descending turns with 10°-30° bank (iii) recoveries from unusual attitudes (iv) limited panel instruments
f	ATC liaison — compliance, R/T procedures

SECTION 3 — EN-ROUTE PROCEDURES

a	Control of aeroplane by external visual reference, including cruise configuration Range/Endurance considerations
b	Orientation, map reading
c	Altitude, speed, heading control, lookout
d	Altimeter setting. ATC liaison — compliance, R/T procedures

e	Monitoring of flight progress, flight log, fuel usage, assessment of track error and re-establishment of correct tracking
f	Observation of weather conditions, assessment of trends, diversion planning
g	Tracking, positioning (NDB or VOR, or track between waypoints), identification of facilities (instrument flight)
h	Implementation of diversion plan to alternate aerodrome (visual flight)

SECTION 4 — APPROACH AND LANDING PROCEDURES

a	Arrival procedures, altimeter setting, checks, lookout
b	ATC liaison — compliance, R/T procedures
c	Go-around action from low height
d	Normal landing, crosswind landing (if suitable conditions)
e	Short field landing
f	Approach and landing with idle power (single-engine only)
g	Landing without use of flaps
h	Post-flight actions

SECTION 5 — ABNORMAL AND EMERGENCY PROCEDURES

This section may be combined with sections 1 through 4

a	Simulated engine failure after take-off (at a safe altitude), fire drill
b	Equipment malfunctions including alternative landing gear extension, electrical and brake failure
c	Forced landing (simulated)
d	ATC liaison — compliance, R/T procedures
e	Oral questions

SECTION 6 — SIMULATED ASYMMETRIC FLIGHT AND RELEVANT CLASS OR TYPE ITEMS

This section may be combined with sections 1 through 5

a	Simulated engine failure during take-off (at a safe altitude unless carried out in an
---	---

	FFS)
b	Asymmetric approach and go-around
c	Asymmetric approach and full stop landing
d	Engine shut-down and restart (if selected by the examiner)
e	ATC liaison — compliance, R/T procedures, Airmanship
f	As determined by the FE — any relevant items of the class or type rating skill-test to include, if applicable: (i) aeroplane systems including handling of autopilot (ii) operation of pressurisation system (iii) use of de-icing and anti-icing system
g	Oral questions

C. Content of the skill test for the issue of the CPL — Helicopters

1. The helicopter used for the skill test shall meet the requirements for training helicopters.
2. The area and route to be flown shall be chosen by the FE and all low level and hover work shall be at an approved aerodrome/site. Routes used for section 3 may end at the aerodrome of departure or at another aerodrome and one destination shall be a controlled aerodrome. The skill test may be conducted in 2 flights. The total duration of the flight(s) shall be at least 90 minutes.
3. The applicant shall demonstrate the ability to:
 - (a) operate the helicopter within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge; and
 - (e) maintain control of the helicopter at all times in such a manner that the successful outcome of a procedure or manoeuvre is never seriously in doubt.

FLIGHT TEST TOLERANCES

4. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the helicopter used.

Height

normal flight	± 100 feet
simulated major	± 150 feet

emergency

Tracking on radio aids $\pm 10^\circ$

Heading

normal flight $\pm 10^\circ$

simulated major $\pm 15^\circ$

emergency

Speed

take-off and approach ± 5 knots

multi-engine

all other flight regimes ± 10 knots

Ground drift

T.O. hover I.G.E. ± 3 feet

landing no sideways or backwards movement

CONTENT OF THE TEST

5. Items in section 4 and 5 may be performed in a helicopter FNPT or a helicopter FFS. Use of helicopter checklists, airmanship, control of helicopter by external visual reference, anti-icing procedures, and principles of threat and error management apply in all sections.

SECTION 1 — PRE-FLIGHT/POST-FLIGHT CHECKS AND PROCEDURES

a	Helicopter knowledge (e.g. technical log, fuel, mass and balance, performance), flight planning, documentation, NOTAMS, weather
b	Pre-flight inspection/action, location of parts and purpose
c	Cockpit inspection, starting procedure
d	Communication and navigation equipment checks, selecting and setting frequencies
e	Pre-take-off procedure, R/T procedure, ATC liaison-compliance
f	Parking, shutdown and post-flight procedure

SECTION 2 — HOVER MANOEUVRES, ADVANCED HANDLING AND CONFINED AREAS

a	Take-off and landing (lift-off and touchdown)
b	Taxi, hover taxi
c	Stationary hover with head/cross/tail wind
d	Stationary hover turns, 360° left and right (spot turns)
e	Forward, sideways and backwards hover manoeuvring
f	Simulated engine failure from the hover
g	Quick stops into and downwind
h	Sloping ground/unprepared sites landings and take-offs
i	Take-offs (various profiles)
j	Crosswind, downwind take-off (if practicable)
k	Take-off at maximum take-off mass (actual or simulated)
l	Approaches (various profiles)
m	Limited power take-off and landing
n	Autorotation (FE to select two items from — Basic, range, lowspeed, and 360° turns)
o	Autorotative landing
p	Practice forced landing with power recovery
q	Power checks, reconnaissance technique, approach and departure technique

SECTION 3 — NAVIGATION — EN-ROUTE PROCEDURES

a	Navigation and orientation at various altitudes/heights, map reading
b	Altitude/height, speed, heading control, observation of airspace, altimeter setting
c	Monitoring of flight progress, flight log, fuel usage, endurance, ETA, assessment of track error and re-establishment of correct track, instrument monitoring
d	Observation of weather conditions, diversion planning

e	Tracking, positioning (NDB and/or VOR), identification offacilities
f	ATC liaison and observance of regulations, etc.

SECTION 4 — FLIGHT PROCEDURES AND MANOEUVRES BY SOLE REFERENCE TO INSTRUMENTS

a	Level flight, control of heading, altitude/height and speed
b	Rate 1 level turns onto specified headings, 180° to 360° left and right
c	Climbing and descending, including turns at rate 1 onto specified headings
d	Recovery from unusual attitudes
e	Turns with 30° bank, turning up to 90° left and right

SECTION 5 — ABNORMAL AND EMERGENCY PROCEDURES (SIMULATED WHERE APPROPRIATE)

Note 1: Where the test is conducted on a multi-engine helicopter a simulated engine failure drill, including a single-engine approach and landing, shall be included in the test.

Note 2: The FE shall select four items from the following:

a	Engine malfunctions, including governor failure, carburettor/engine icing, oil system, as appropriate
b	Fuel system malfunction
c	Electrical system malfunction
d	Hydraulic system malfunction, including approach and landing without hydraulics, as applicable
e	Main rotor and/or anti-torque system malfunction (FFS or discussion only)
f	Fire drills, including smoke control and removal, as applicable
g	Other abnormal and emergency procedures as outlined in appropriate flight manual, including for multi-engine helicopters: Simulated engine failure at take-off: rejected take-off at or before TDP or safe forced landing at or before DPATO, shortly after TDP or DPATO. Landing with simulated engine failure: landing or go-around following engine failure before LDP or DPBL, following engine failure after LDP or safe forced landing after DPBL.

D. Content of the skill test for the issue of a CPL — Airships

1. The airship used for the skill test shall meet the requirements for training airships.
2. The area and route to be flown shall be chosen by the FE. Routes used for section 3 may end at the aerodrome of departure or at another aerodrome and one destination shall be a controlled aerodrome. The skill test may be conducted in 2 flights. The total duration of the flight(s) shall be at least 60 minutes.
3. The applicant shall demonstrate the ability to:
 - (a) operate the airship within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge; and
 - (e) maintain control of the airship at all times in such a manner that the successful outcome of a procedure or manoeuvre is never seriously in doubt.

FLIGHT TEST TOLERANCES

4. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the airship used.

Height

normal flight	± 100 feet
simulated major emergency	± 150 feet

Tracking on radio aids	± 10°
------------------------	-------

Heading

normal flight	± 10°
simulated major emergency	± 15°

CONTENT OF THE TEST

5. Items in sections 5 and 6 may be performed in an Airship FNPT or an airship FFS. Use of airship checklists, airmanship, control of airship by external visual reference, anti-icing procedures, and principles of threat and error management apply in all sections.

SECTION 1 — PRE-FLIGHT OPERATIONS AND DEPARTURE

a	Pre-flight, including: Flight planning, Documentation, Mass and Balance determination, Weather brief,
---	--

	NOTAMS
b	Airship inspection and servicing
c	Off-mast procedure, ground manoeuvring and take-off
d	Performance considerations and trim
e	Aerodrome and traffic pattern operations
f	Departure procedure, altimeter setting, collision avoidance (lookout)
g	ATC liaison — compliance, R/T procedures
SECTION 2 — GENERAL AIRWORK	
a	Control of the airship by external visual reference, including straight and level, climb, descent, lookout
b	Flight at pressure height
c	Turns
d	Steep descents and climbs
e	Flight by reference solely to instruments, including: (i) level flight, control of heading, altitude and airspeed (ii) climbing and descending turns (iii) recoveries from unusual attitudes (iv) limited panel instruments
f	ATC liaison — compliance, R/T procedures
SECTION 3 — EN-ROUTE PROCEDURES	
a	Control of airship by external visual reference, Range/Endurance considerations
b	Orientation, map reading
c	Altitude, speed, heading control, lookout
d	Altimeter setting, ATC liaison — compliance, R/T procedures
e	Monitoring of flight progress, flight log, fuel usage, assessment of track error and re-establishment of correct tracking
f	Observation of weather conditions, assessment of trends, diversion planning

g	Tracking, positioning (NDB or VOR), identification of facilities (instrument flight). Implementation of diversion plan to alternate aerodrome (visual flight)
---	--

SECTION 4 — APPROACH AND LANDING PROCEDURES

a	Arrival procedures, altimeter setting, checks, lookout
b	ATC liaison — compliance, R/T procedures
c	Go-around action from low height
d	Normal landing
e	Short field landing
f	Approach and landing with idle power (single-engine only)
g	Landing without use of flaps
h	Post-flight actions

SECTION 5 — ABNORMAL AND EMERGENCY PROCEDURES

This section may be combined with sections 1 through 4

a	Simulated engine failure after take-off (at a safe altitude), fire drill
b	Equipment malfunctions
c	Forced landing (simulated)
d	ATC liaison — compliance, R/T procedures
e	Oral questions

SECTION 6 — RELEVANT CLASS OR TYPE ITEMS

This section may be combined with sections 1 through 5

a	Simulated engine failure during take-off (at a safe altitude unless carried out in an FFS)
b	Approach and go-around with failed engine(s)
c	Approach and full stop landing with failed engine(s)
d	Malfunctions in the envelope pressure system

e	ATC liaison — compliance, R/T procedures, Airmanship
f	As determined by the FE — any relevant items of the class or type rating skill test to include, if applicable: (i) airship systems (ii) operation of envelope pressure system
g	Oral questions

*Appendix 5****Integrated MPL training course*****GENERAL**

1. The aim of the MPL integrated course is to train pilots to the level of proficiency necessary to enable them to operate as co-pilot of a multi-engine multi-pilot turbine-powered air transport aeroplane under VFR and IFR and to obtain an MPL.
2. Approval for an MPL training course shall only be given to an ATO that is part of a commercial air transport operator certificated in accordance with CAR-OPS1 or having a specific arrangement with such an operator.
3. An applicant wishing to undertake an MPL integrated course shall complete all the instructional stages in one continuous course of training at an ATO. The training shall be competency based and conducted in a multi-crew operational environment.
4. Only ab-initio applicants shall be admitted to the course.
5. The course shall comprise:
 - (a) theoretical knowledge instruction to the ATPL(A) knowledge level;
 - (b) visual and instrument flying training;
 - (c) training in MCC for the operation of multi-pilot aeroplanes; and
 - (d) type rating training.
6. An applicant failing or unable to complete the entire MPL course may apply to the CAA for the theoretical knowledge examination and skill test for a licence with lower privileges and an IR, if the applicable requirements are met.

THEORETICAL KNOWLEDGE

7. An approved MPL theoretical knowledge course shall comprise at least 750 hours of instruction for the ATPL(A) knowledge level, as well as the hours required for:
 - (a) theoretical knowledge instruction for the relevant type rating, in accordance with Subpart-H; and
 - (b) UPRT theoretical knowledge instruction in accordance with FCL.745.A.

FLYING TRAINING

8. The flying training shall comprise a total of at least 240 hours, composed of hours as PF and PM, in actual and simulated flight, and covering the following four phases of training:
 - (a) Phase 1 — Core flying skills
Specific basic single-pilot training in an aeroplane
 - (b) Phase 2 — Basic
Introduction of multi-crew operations and instrument flight

(c) Phase 3 — Intermediate

Application of multi-crew operations to a multi-engine turbine aeroplane certified as a high-performance aeroplane.

(d) Phase 4 — Advanced

Type rating training within an airline-oriented environment.

MCC requirements shall be incorporated into the relevant phases above.

Training in asymmetric flight shall be given either in an aeroplane or an FFS.

8a. Flight experience in actual flight shall include:

- (a) all the experience requirements of Subpart H;
- (b) UPRT flight instruction in accordance with FCL.745.A;
- (c) aeroplane UPRT exercises related to the specificities of the relevant type in accordance with FCL.725.A(c);
- (d) night flying;
- (e) flight solely by reference to instruments; and
- (f) the experience required to achieve the relevant airmanship.

9. Each phase of training in the flight instruction syllabus shall be composed of both instructions in the underpinning knowledge and in practical training segments.

10. The training course shall include a continuous evaluation process of the training syllabus and a continuous assessment of the students following the syllabus. Evaluation shall ensure that:

- (a) the competencies and related assessment are relevant to the task of a co-pilot of a multi-pilot aeroplane; and
- (b) the students acquire the necessary competencies in a progressive and satisfactory manner.

11. The training course shall include at least 12 take-offs and landings to ensure competency. Those take-offs and landings may be reduced to at least six, provided that prior to delivering the training, the ATO and the operator ensure that:

- (a) a procedure is in place to assess the required level of competency of the student pilot; and
- (b) a process is in place to ensure that corrective action is taken if in-training evaluation indicates the need to do so.

Those take-offs and landings shall be performed under the supervision of an instructor in an aeroplane for which the type rating shall be issued.

ASSESSMENT LEVEL

12. The applicant for the MPL shall have demonstrated performance in all 9 competency units specified in paragraph 13 below, at the advanced level of competency required to operate and interact as a co-pilot in a turbine-powered multi-pilot aeroplane, under visual and instrument conditions. Assessment shall confirm that control of the aeroplane or situation is maintained at all times, to ensure the successful outcome of a procedure or manoeuvre. The applicant shall

consistently demonstrate the knowledge, skills and attitudes required for the safe operation of the applicable aeroplane type, in accordance with the MPL performance criteria.

COMPETENCY UNITS

13. The applicant shall demonstrate competency in the following 9 competency units:
- (1) apply human performance principles, including principles of threat and error management;
 - (2) perform aeroplane ground operations;
 - (3) perform take-off;
 - (4) perform climb;
 - (5) perform cruise;
 - (6) perform descent;
 - (7) perform approach;
 - (8) perform landing; and
 - (9) perform after landing and aeroplane post-flight operations.

SIMULATED FLIGHT

14. Minimum requirements for FSTDs:

(a) Phase 1 — Core flying skills

E-Training and part tasking devices approved by the CAA that have the following characteristics:

- involve accessories beyond those normally associated with desktop computers, such as functional replicas of a throttle quadrant, a side-stick controller, or an FMS keypad, and
- involve psychomotor activity with appropriate application of force and timing of responses.

(b) Phase 2 — Basic

An FNPT II MCC that represents a generic multi-engine turbine-powered aeroplane.

(c) Phase 3 — Intermediate

An FSTD that represents a multi-engine turbine-powered aeroplane required to be operated with a co-pilot and qualified to an equivalent standard to level B, additionally including:

- a daylight/twilight/night visual system continuous cross-cockpit minimum collimated visual field of view providing each pilot with 180° horizontal and 40° vertical field of view, and
- ATC environment simulation.

(d) Phase 4 — Advanced

An FFS which is fully equivalent to level D or level C with an enhanced daylight visual system, including ATC environment simulation.

*Appendix 6****Modular training courses for the IR*****A. IR(A) — Modular flying training course****GENERAL**

1. The aim of the IR(A) modular flying training course is to train pilots to the level of proficiency necessary to operate aeroplanes under IFR and in IMC. The course consists of two modules, which may be taken separately or combined:

- (a) Basic Instrument Flight Module

This comprises 10 hours of instrument time under instruction, of which up to 5 hours can be instrument ground time in a BITD, FNPT I or II, or an FFS. Upon completion of the Basic Instrument Flight Module, the candidate shall be issued a Course Completion Certificate.

- (b) Procedural Instrument Flight Module

This comprises the remainder of the training syllabus for the IR(A), 40 hours single-engine or 45 hours multi-engine instrument time under instruction, and the theoretical knowledge course for the IR(A).

2. Applicants for a modular IR(A) course shall be the holder of a PPL(A) or a CPL(A). Applicants for the Procedural Instrument Flight Module, who do not hold a CPL(A), shall be a holder of a BIR or of a Course Completion Certificate for the Basic Instrument Flight Module.

The ATO shall ensure that the applicant for a multi-engine IR(A) course who has not held a multi-engine aeroplane class or type rating has received the multi-engine training specified in Subpart-H prior to commencing the flight training for the IR(A) course.

3. An applicant wishing to undertake the Procedural Instrument Flight Module of a modular IR(A) course shall be required to complete all the instructional stages in one continuous approved course of training. Prior to commencing the Procedural Instrument Flight Module, the ATO shall ensure the competence of the applicant in basic instrument flying skills. Refresher training shall be given as required.
4. The course of theoretical instruction shall be completed within 18 months. The Procedural Instrument Flight Module and the skill test shall be completed within the period of validity of the pass in theoretical examinations.
5. The course shall comprise:
 - (a) theoretical knowledge instruction to the IR knowledge level;
 - (b) instrument flight instruction.

THEORETICAL KNOWLEDGE

6. An approved modular IR(A) course shall comprise at least 150 hours of theoretical knowledge instruction.

FLYING TRAINING

7. A single-engine IR(A) course shall comprise at least 50 hours instrument time under instruction of which up to 20 hours may be instrument ground time in an FNPT I, or up to 35 hours in an FFS or FNPT II. A maximum of 10 hours of FNPT II or an FFS instrument ground time may be conducted in an FNPT I.
8. A multi-engine IR(A) course shall comprise at least 55 hours instrument time under instruction, of which up to 25 hours may be instrument ground time in an FNPT I, or up to 40 hours in an FFS or FNPT II. A maximum of 10 hours of FNPT II or an FFS instrument ground time may be conducted in an FNPT I. The remaining instrument flight instruction shall include at least 15 hours in multi-engine aeroplanes.
9. The holder of a single-engine IR(A) who also holds a multi-engine class or type rating wishing to obtain a multi-engine IR(A) for the first time shall complete a course at an ATO comprising at least 5 hours instruction in instrument flying in multi-engine aeroplanes, of which 3 hours may be in an FFS or FNPT II.
- 10.1. Holders of a CPL(A), of a BIR, or of a Course Completion Certificate for the Basic Instrument Flight Module shall be credited with up to 10 hours in regard of the total amount of training required in paragraphs 7 or 8 above.
- 10.2. The holder of an IR(H) may have the total amount of training required in paragraphs 7 or 8 above reduced to 10 hours.
- 10.3. The total instrument flight instruction in aeroplane shall comply with paragraph 7 or 8, as appropriate.
11. The flying exercises up to the IR(A) skill test shall comprise:
 - (a) Basic Instrument Flight Module: Procedure and manoeuvre for basic instrument flight covering at least:
 - basic instrument flight without external visual cues:
 - horizontal flight,
 - climbing,
 - descent,
 - turns in level flight, climbing, descent;
 - instrument pattern;
 - steep turn;
 - radio navigation;
 - recovery from unusual attitudes;
 - limited panel;
 - recognition and recovery from incipient and full stalls;

(b) Procedural Instrument Flight Module:

- (i) pre-flight procedures for IFR flights, including the use of the flight manual and appropriate air traffic services documents in the preparation of an IFR flight plan;
- (ii) procedure and manoeuvres for IFR operation under normal, abnormal and emergency conditions covering at least:
 - transition from visual to instrument flight on take-off,
 - standard instrument departures and arrivals,
 - en-route IFR procedures,
 - holding procedures,
 - instrument approaches to specified minima,
 - missed approach procedures,
 - landings from instrument approaches, including circling;
- (iii) in-flight manoeuvres and particular flight characteristics;
- (iv) if required, operation of a multi-engine aeroplane in the above exercises, including operation of the aeroplane solely by reference to instruments with one engine simulated inoperative and engine shutdown and restart (the latter exercise to be carried out at a safe altitude unless carried out in an FFS or FNPT II).

Aa. IR(A) — Competency-based modular flying training course**GENERAL**

1. The aim of the competency-based modular flying training course is to train PPL or CPL holders for the instrument rating, taking into account prior instrument flight instruction and experience. It is designed to provide the level of proficiency needed to operate aeroplanes under IFR and in IMC. The course shall be taken within an ATO or consist of a combination of instrument flight instruction provided by an IRI(A) or an FI(A) holding the privilege to provide training for the IR and flight instruction within an ATO.
2. An applicant for such a competency-based modular IR(A) shall be the holder of a PPL(A) or CPL(A).
3. The course of theoretical instruction shall be completed within 18 months. The instrument flight instruction and the skill test shall be completed within the period of validity of the pass of the theoretical knowledge examinations.
4. The course shall comprise:
 - (a) theoretical knowledge instruction to the IR(A) knowledge level;
 - (b) instrument flight instruction.

THEORETICAL KNOWLEDGE

5. An approved competency-based modular IR(A) course shall comprise at least 80 hours of theoretical knowledge instruction. The theoretical knowledge course may contain computer-based training and e-learning elements. A minimum amount of classroom teaching as required by ORA.ATO.305 has to be provided.

FLYING TRAINING

6. The method of attaining an IR(A) following this modular course is competency-based. However, the minimum requirements below shall be completed by the applicant. Additional training may be required to reach required competencies.
 - (a) A single-engine competency-based modular IR(A) course shall include at least 40 hours of instrument time under instruction, of which up to 10 hours may be instrument ground time in an FNPT I, or up to 25 hours in an FFS or FNPT II. A maximum of 5 hours of FNPT II or FFS instrument ground time may be conducted in an FNPT I.
 - (i) When the applicant has:
 - (A) completed instrument flight instruction provided by an IRI(A) or an FI(A) holding the privilege to provide training for the IR; or
 - (B) prior experience of instrument flight time as PIC on aeroplanes, under a rating providing the privileges to fly under IFR and in IMC,these hours may be credited towards the 40 hours above up to maximum of 30 hours,
 - (ii) When the applicant has prior instrument flight time under instruction other than specified in point (a)(i), these hours may be credited towards the required 40 hours up to a maximum of 15 hours.
 - (iii) In any case, the flying training shall include at least 10 hours of instrument flight time under instruction in an aeroplane at an ATO.
 - (iv) The total amount of dual instrument instruction shall not be less than 25 hours.
 - (b) A multi-engine competency-based modular IR(A) course shall include at least 45 hours instrument time under instruction, of which up to 10 hours may be instrument ground time in an FNPT I, or up to 30 hours in an FFS or FNPT II. A maximum of 5 hours of FNPT II or FFS instrument ground time may be conducted in an FNPT I.
 - (i) When the applicant has:
 - (A) completed instrument flight instruction provided by an IRI(A) or an FI(A) holding the privilege to provide training for the IR; or
 - (B) prior experience of instrument flight time as PIC on aeroplanes, under a rating giving the privileges to fly under IFR and in IMC,these hours may be credited towards the 45 hours above up to a maximum of 35 hours.
 - (ii) When the applicant has prior instrument flight time under instruction other than specified in point (b)(i), these hours may be credited towards the required 45 hours up to a maximum of 15 hours.

- (iii) In any case, the flying training shall include at least 10 hours of instrument flight time under instruction in a multi-engine aeroplane at an ATO.
 - (iv) The total amount of dual instrument instruction shall not be less than 25 hours, of which at least 15 hours shall be completed in a multi-engine aeroplane.
 - (c) To determine the amount of hours credited and to establish the training needs, the applicant shall complete a pre-entry assessment at an ATO.
 - (d) The completion of the instrument flight instruction provided by an IRI(A) or FI(A) in accordance with point (a)(i) or (b)(i) shall be documented in a specific training record and signed by the instructor.
7. The flight instruction for the competency-based modular IR(A) shall comprise:
- (a) procedures and manoeuvres for basic instrument flight covering at least:
 - basic instrument flight without external visual cues:
 - horizontal flight;
 - climbing;
 - descent;
 - turns in level flight, climbing and descent;
 - instrument pattern;
 - steep turn;
 - radio navigation;
 - recovery from unusual attitudes;
 - limited panel; and
 - recognition and recovery from incipient and full stall;
 - (b) pre-flight procedures for IFR flights, including the use of the flight manual and appropriate air traffic services documents for the preparation of an IFR flight plan;
 - (c) procedure and manoeuvres for IFR operation under normal, abnormal, and emergency conditions covering at least:
 - (i) transition from visual to instrument flight on take-off;
 - (ii) standard instrument departures and arrivals;
 - (iii) en-route IFR procedures;
 - (iv) holding procedures;
 - (v) instrument approaches to specified minima;
 - (vi) missed approach procedures; and
 - (vii) landings from instrument approaches, including circling;

- (d) in-flight manoeuvres and particular flight characteristics;
 - (e) if required, operation of a multi-engine aeroplane in the above exercises, including:
 - (i) operation of the aeroplane solely by reference to instruments with one engine simulated inoperative;
 - (ii) engine shutdown and restart (to be carried out at a safe altitude unless carried out in an FFS or FNPT II).
8. Applicants for the competency-based modular IR(A) holding a CAR-FCL PPL or CPL and a valid IR(A) issued in compliance with the requirements of Annex 1 to the Chicago Convention by a member state may be credited in full towards the training course mentioned in paragraph 4. In order to be issued the IR(A), the applicant shall:
- (a) successfully complete the skill test for the IR(A) in accordance with Appendix 7;
 - (b) demonstrate to the examiner during the skill test that he/she has acquired an adequate level of theoretical knowledge of air law, meteorology and flight planning and performance (IR); and
 - (c) have a minimum experience of at least 50 hours of flight time under IFR as PIC on aeroplanes.
9. Applicants for the competency-based modular IR(A) who hold a BIR in accordance with point FCL.835 and who have received at least 10 hours of instrument flight time under instruction at an ATO may be credited towards the training course referred to in paragraph 4, provided that all competency-based instrument rating topics have been included in that BIR training, and assessed by the ATO that provides the competency-based modular flying training course.
10. Applicants for the competency-based modular IR(A) who hold a BIR and have experience of at least 50 hours of flight time under IFR as PIC on aeroplanes, shall:
- (a) at an ATO:
 - (i) be assessed as having an acceptable standard of competency-based instrument rating theoretical knowledge;
 - (ii) receive appropriate flight training to extend IFR privileges in accordance with FCL.605.IR(a);
 - (b) after completion of (a);
 - (i) successfully complete the skill test for the IR(A) in accordance with Appendix 7;
 - (ii) demonstrate orally to the examiner during the skill test that they have acquired an adequate level of theoretical knowledge of air law, meteorology, and flight planning and performance.

PRE-ENTRY ASSESSMENT

11. The content and duration of the pre-entry assessment shall be determined by the ATO based on the prior instrument experience of the applicant.

MULTI-ENGINE

12. The holder of a single-engine IR(A) who also holds a multi-engine class or type rating wishing to obtain a multi-engine IR(A) for the first time shall complete a course at an ATO comprising at least 5 hours instrument time under instruction in multi-engine aeroplanes, of which 3 hours may be in an FFS or FNPT II and shall pass a skill test.

B. IR(H) — Modular flying training course

1. The aim of the IR(H) modular flying training course is to train pilots to the level of proficiency necessary to operate helicopters under IFR and in IMC.
2. An applicant for a modular IR(H) course shall be the holder of a PPL(H), or a CPL(H) or an ATPL(H). Prior to commencing the aircraft instruction phase of the IR(H) course, the applicant shall be the holder of the helicopter type rating used for the IR(H) skill test, or have completed approved type rating training on that type. The applicant shall hold a certificate of satisfactory completion of MCC if the skill test is to be conducted in Multi-Pilot conditions.
3. An applicant wishing to undertake a modular IR(H) course shall be required to complete all the instructional stages in one continuous approved course of training.
4. The course of theoretical instruction shall be completed within 18 months. The flight instruction and the skill test shall be completed within the period of validity of the pass in the theoretical examinations.
5. The course shall comprise:
 - (a) theoretical knowledge instruction to the IR knowledge level;
 - (b) instrument flight instruction.

THEORETICAL KNOWLEDGE

6. An approved modular IR(H) course shall comprise at least 150 hours of instruction.

FLYING TRAINING

7. An IR(H) course shall comprise at least 55 hours instrument time under instruction, of which:
 - (a) up to 20 hours may be instrument ground time in an FNPT I (H) or (A). These 20 hours instruction time in FNPT I (H) or (A) may be substituted by 20 hours instruction time for IR(H) in an aeroplane, approved for this course; or
 - (b) up to 40 hours may be instrument ground time in a helicopter FTD 2/3, FNPT II/III or FFS.The instrument flight instruction shall include at least 10 hours in an IFR-certificated helicopter.
- 8.1. Holders of an ATPL(H) shall have the theoretical knowledge instruction hours reduced by 50 hours.
- 8.2. The holder of an IR(A) may have the amount of training required reduced to 10 hours.
- 8.3. The holder of a PPL(H) with a helicopter night rating or a CPL(H) may have the total amount of instrument time under instruction required reduced by 5 hours.
9. The flying exercises up to the IR(H) skill test shall comprise:

- (a) pre-flight procedures for IFR flights, including the use of the flight manual and appropriate air traffic services documents in the preparation of an IFR flight plan;
- (b) procedure and manoeuvres for IFR operation under normal, abnormal and emergency conditions covering at least:
 - transition from visual to instrument flight on take-off,
 - standard instrument departures and arrivals,
 - en-route IFR procedures,
 - holding procedures,
 - instrument approaches to specified minima,
 - missed approach procedures,
 - landings from instrument approaches, including circling.
- (c) in-flight manoeuvres and particular flight characteristics;
- (d) if required, operation of a multi-engine helicopter in the above exercises, including operation of the helicopter solely by reference to instruments with one engine simulated inoperative and engine shutdown and restart (the latter exercise to be carried out in an FFS or FNPT II or FTD 2/3).

C. IR(As) — Modular flying training course

GENERAL

1. The aim of the IR(As) modular flying training course is to train pilots to the level of proficiency necessary to operate airships under IFR and in IMC. The course consists of two modules, which may be taken separately or combined:
 - (a) **Basic Instrument Flight Module**

This comprises 10 hours of instrument time under instruction, of which up to 5 hours can be instrument ground time in a BITD, FNPT I or II, or an FFS. Upon completion of the Basic Instrument Flight Module, the candidate shall be issued a Course Completion Certificate.
 - (b) **Procedural Instrument Flight Module**

This comprises the remainder of the training syllabus for the IR(As), 25 hours instrument time under instruction, and the theoretical knowledge course for the IR(As).
2. An applicant for a modular IR(As) course shall be the holder of a PPL(As) including the privileges to fly at night or a CPL(As). An applicant for the Procedural Instrument Flight Module, who does not hold a CPL(As), shall be holder of a Course Completion Certificate for the Basic Instrument Flight Module.
3. An applicant wishing to undertake the Procedural Instrument Flight Module of a modular IR(As) course shall be required to complete all the instructional stages in one continuous approved course of training. Prior to commencing the Procedural Instrument Flight Module, the ATO shall ensure the competence of the applicant in basic instrument flying skills. Refresher training shall

be given as required.

4. The course of theoretical instruction shall be completed within 18 months. The Procedural Instrument Flight Module and the skill test shall be completed within the period of validity of the pass in theoretical examinations.
5. The course shall comprise:
 - (a) theoretical knowledge instruction to the IR knowledge level;
 - (b) instrument flight instruction.

THEORETICAL KNOWLEDGE

6. An approved modular IR(As) course shall comprise at least 150 hours of theoretical knowledge instruction.

FLYING TRAINING

7. An IR(As) course shall comprise at least 35 hours instrument time under instruction of which up to 15 hours may be instrument ground time in an FNPT I, or up to 20 hours in an FFS or FNPT II. A maximum of 5 hours of FNPT II or FFS instrument ground time may be conducted in an FNPT I.
8. The holder of a CPL(As) or of a Course Completion Certificate for the Basic Instrument Flight Module may have the total amount of training required in paragraph 7 reduced by 10 hours. The total instrument flight instruction in airship shall comply with paragraph 7.
9. If the applicant is the holder of an IR in another category of aircraft the total amount of flight instruction required may be reduced to 10 hours on airships.
10. The flying exercises up to the IR(As) skill test shall comprise:

- (a) Basic Instrument Flight Module:

Procedure and manoeuvre for basic instrument flight covering at least:

- basic instrument flight without external visual cues:
 - horizontal flight,
 - climbing,
 - descent,
 - turns in level flight, climbing, descent;
- instrument pattern;
- radio navigation;
- recovery from unusual attitudes;
- limited panel;

- (b) Procedural Instrument Flight Module:

- (i) pre-flight procedures for IFR flights, including the use of the flight manual and appropriate air traffic services documents in the preparation of an IFR flight plan;

- (ii) procedure and manoeuvres for IFR operation under normal, abnormal and emergency conditions covering at least:
 - transition from visual to instrument flight on take-off,
 - standard instrument departures and arrivals,
 - en-route IFR procedures,
 - holding procedures,
 - instrument approaches to specified minima,
 - missed approach procedures,
 - landings from instrument approaches, including circling;
- (iii) inflight manoeuvres and particular flight characteristics;
- (iv) operation of airship in the above exercises, including operation of the airship solely by reference to instruments with one engine simulated inoperative and engine shut-down and restart (the latter exercise to be carried out at a safe altitude unless carried out in an FFS or FNPT II).

*Appendix 7****BIR and IR skill test***

1. Applicants shall have received instruction on the same class or type of aircraft to be used in the test which shall be appropriately equipped for the training and testing purposes.
2. An applicant shall pass all the relevant sections of the skill test. If any item in a section is failed, that section is failed. Failure in more than one section will require the applicant to take the entire test again. An applicant failing only one section shall only repeat the failed section. Failure in any section of the retest, including those sections that have been passed on a previous attempt, will require the applicant to take the entire test again. All relevant sections of the skill test shall be completed within 6 months. Failure to achieve a pass in all relevant sections of the test in two attempts will require further training.
3. Further training may be required following a failed skill test. There is no limit to the number of skill tests that may be attempted.

CONDUCT OF THE TEST

4. The test is intended to simulate a practical flight. The route to be flown shall be chosen by the examiner. An essential element is the ability of the applicant to plan and conduct the flight from routine briefing material. The applicant shall undertake the flight planning and shall ensure that all equipment and documentation for the execution of the flight are on board. The duration of the flight shall be at least 1 hour.
5. Should the applicant choose to terminate a skill test for reasons considered inadequate by the examiner, the applicant shall retake the entire skill test. If the test is terminated for reasons considered adequate by the examiner, only those sections not completed shall be tested in a further flight.
6. At the discretion of the examiner, any manoeuvre or procedure of the test may be repeated once by the applicant. The examiner may stop the test at any stage if it is considered that the applicant's demonstration of flying skill requires a complete retest.
7. An applicant shall fly the aircraft from a position where the PIC functions can be performed and to carry out the test as if there is no other crew member. The examiner shall take no part in the operation of the aircraft, except when intervention is necessary in the interests of safety or to avoid unacceptable delay to other traffic. Responsibility for the flight shall be allocated in accordance with CAA regulations.
8. Decision heights/altitude, minimum descent heights/altitudes and missed approach point shall be determined by the applicant and agreed by the examiner.
9. Applicants shall indicate to the examiner the checks and duties carried out, including the identification of radio facilities. Checks shall be completed in accordance with the authorised checklist for the aircraft on which the test is being taken. During pre-flight preparation for the test applicants shall determine power settings and speeds. The applicants shall calculate performance data for take-off, approach and landing in compliance with the operations manual or flight manual for the aircraft used.

FLIGHT TEST TOLERANCES

10. The applicant shall demonstrate the ability to:
- operate the aircraft within its limitations;
 - complete all manoeuvres with smoothness and accuracy;
 - exercise good judgment and airmanship;
 - apply aeronautical knowledge; and
 - maintain control of the aircraft at all times in such a manner that the successful outcome of a procedure or manoeuvre is never seriously in doubt.
11. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the aircraft used:

Height

Generally	± 100 feet
Starting a go-around at decision height/altitude	+ 50 feet/– 0 feet
Minimum descent height/MAP/altitude	+ 50 feet/– 0 feet

Tracking

On radio aids	± 5°
For angular deviations	Half scale deflection, azimuth and glide path (e.g. LPV, ILS, MLS, GLS)
2D (LNAV) and 3D (LNAV/VNAV) 'linear' lateral deviations	cross-track error/deviation shall normally be limited to $\pm \frac{1}{2}$ of the RNP value associated with the procedure. Brief deviations from this standard up to a maximum of 1 time the RNP value are allowable.
3D linear vertical deviations (e.g. RNP APCH (LNAV/VNAV) using BaroVNAV)	not more than – 75 feet below the vertical profile at any time, and not more than + 75 feet above the vertical profile at or below 1000 feet above aerodrome level.

Heading

all engines operating $\pm 5^\circ$

with simulated engine failure $\pm 10^\circ$

Speed

all engines operating ± 5 knots

with simulated engine failure $+ 10$ knots/ $- 5$ knots,

CONTENT OF THE TEST

Aeroplanes

SECTION 1 — PRE-FLIGHT OPERATIONS AND DEPARTURE	
Use of checklist, airmanship, anti-icing/de-icing procedures, etc., apply in all sections	
a	Use of flight manual (or equivalent) especially a/c performance calculation, mass and balance
b	Use of Air Traffic Services document, weather document
c	Preparation of ATC flight plan, IFR flight plan/log
d	Identification of the required nav aids for departure, arrival and approach procedures
e	Pre-flight inspection
f	Weather Minima
g	Taxiing
h	PBN departure (if applicable): — Check that the correct procedure has been loaded in the navigation system; and — Cross-check between the navigation system display and the departure chart
i	Pre-take-off briefing, Take-off
j (°)	Transition to instrument flight
k (°)	Instrument departure procedures, including PBN departures, and altimeter setting
l (°)	ATC liaison — compliance, R/T procedures

SECTION 2 — GENERAL HANDLING (°)

a	Control of the aeroplane by reference solely to instruments, including level flight at various speeds, trim
b	Climbing and descending turns with sustained Rate 1 turn
c	Recoveries from unusual attitudes, including sustained 45° bank turns and steep descending turns
d (*)	Recovery from approach to stall in level flight, climbing/ descending turns and in landing configuration
e	Limited panel: stabilised climb or descent, level turns at Rate 1 onto given headings, recovery from unusual attitudes

SECTION 3 — EN-ROUTE IFR PROCEDURES (°)

a	Tracking, including interception, e.g. NDB, VOR, or track between waypoints
b	Use of navigation system and radio aids
c	Level flight, control of heading, altitude and airspeed, power setting, trim technique
d	Altimeter settings
e	Timing and revision of ETAs (en-route hold, if required)
f	Monitoring of flight progress, flight log, fuel usage, systems' management
g	Ice protection procedures, simulated if necessary
h	ATC liaison - compliance, R/T procedures

SECTION 3a — ARRIVAL PROCEDURES

a	Setting and checking of navigational aids, and identification of facilities, if applicable
b	Arrival procedures, altimeter checks
c	Altitude and speed constraints, if applicable
d	PBN arrival (if applicable): — Check that the correct procedure has been loaded in the navigation system; and — Cross-check between the navigation system display and the arrival chart.

SECTION 4 (°)— 3D Operations (+)

a	Setting and checking of navigational aids Check Vertical Path angle for RNP APCH: — Check that the correct procedure has been loaded in the navigation system; and
---	---

	— Cross-check between the navigation system display and the approach chart.
b	Approach and landing briefing, including descent/approach/ landing checks, including identification of facilities
c (+)	Holding procedure
d	Compliance with published approach procedure
e	Approach timing
f	Altitude, speed heading control (stabilised approach)
g (+)	Go-around action
h (+)	Missed approach procedure/landing
i	ATC liaison – compliance, R/T procedures

SECTION 5 (°) – 2D OPERATIONS (++)

a	Setting and checking of navigational aids For RNP APCH: — Check that the correct procedure has been loaded in the navigation system; and — Cross-check between the navigation system display and the approach chart.
b	Approach and landing briefing, including descent/approach/ landing checks, including identification of facilities
c (+)	Holding procedure
d	Compliance with published approach procedure
e	Approach timing
f	Altitude/Distance to MAPT, speed, heading control (stabilised approach), Step Down Fixes (SDF(s)), if applicable
g (+)	Go-around action
h (+)	Missed approach procedure/landing
i	ATC liaison – compliance, R/T procedures

SECTION 6 — FLIGHT WITH ONE ENGINE INOPERATIVE (multi-engine aeroplanes only) (°)

a	Simulated engine failure after take-off or on go-around
b	Approach, go-around and procedural missed approach with one engine inoperative

c	Approach and landing with one engine inoperative
d	ATC liaison – compliance, R/T procedures

(°) Must be performed by sole reference to instruments.

(*) May be performed in an FFS, FTD 2/3 or FNPT II.

(+) May be performed in either Section 4 or Section 5.

(++) To establish PBN privileges, one approach in either Section 4 or Section 5 shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.

Helicopters

SECTION 1 — DEPARTURE

Use of checklist, airmanship, anti-icing/de-icing procedures, etc., apply in all sections

a	Use of flight manual (or equivalent) especially aircraft performance calculation; mass and balance
b	Use of Air Traffic Services document, weather document
c	Preparation of ATC flight plan, IFR flight plan/log
d	Identification of the required nav aids for departure, arrival and approach procedures
e	Pre-flight inspection
f	Weather minima
g	Taxiing/Air taxi in compliance with ATC or instructions of instructor
h	PBN departure (if applicable): — Check that the correct procedure has been loaded in the navigation system; and — Cross-check between the navigation system display and the departure chart.
i	Pre-take-off briefing, procedures and checks
j	Transition to instrument flight
k	Instrument departure procedures, including PBN procedures

SECTION 2 — GENERAL HANDLING

a	Control of the helicopter by reference solely to instruments, including:
b	— Climbing and descending turns with sustained Rate 1 turn
c	— Recoveries from unusual attitudes, including sustained 30° bank turns and steep descending turns

SECTION 3 — EN-ROUTE IFR PROCEDURES

a	Tracking, including interception, e.g. NDB, VOR, or track between waypoints
b	Use of radio aids
c	Level flight, control of heading, altitude and airspeed, power setting
d	Altimeter settings
e	Timing and revision of ETAs
f	Monitoring of flight progress, flight log, fuel usage, systems management
g	Ice protection procedures, simulated if necessary and if applicable
h	ATC liaison - compliance, R/T procedures

SECTION 3a — ARRIVAL PROCEDURES

a	Setting and checking of navigational aids, if applicable
b	Arrival procedures, altimeter checks
c	Altitude and speed constraints, if applicable
d	PBN arrival (if applicable): — Check that the correct procedure has been loaded in the navigation system; and — Cross-check between the navigation system display and the arrival chart.

SECTION 4 — 3D Operations (+)

a	Setting and checking of navigational aids Check Vertical Path angle for RNP APCH: (a) Check that the correct procedure has been loaded in the navigation system; and (b) Cross-check between the navigation system display and the approach chart.
b	Approach and landing briefing, including descent/approach/ landing checks
c (*)	Holding procedure
d	Compliance with published approach procedure

e	Approach timing
f	Altitude, speed, heading control (stabilised approach)
g (*)	Go-around action
h (*)	Missed approach procedure/landing
i	ATC liaison – compliance, R/T procedures

SECTION 5 – 2D OPERATIONS (+)

a	Setting and checking of navigational aids for RNP APCH: — Check that the correct procedure has been loaded in the navigation system; and — Cross-check between the navigation system display and the approach chart.
b	Approach and landing briefing, including descent/approach/landing checks and identification of facilities
c (*)	Holding procedure
d	Compliance with published approach procedure
e	Approach timing
f	Altitude, speed, heading control (stabilised approach)
g (*)	Go-around action
h (*)	Missed approach procedure (*)/landing
i	ATC liaison – compliance, R/T procedures

SECTION 6 — ABNORMAL AND EMERGENCY PROCEDURES

This section may be combined with sections 1 through 5. The test shall have regard to control of the helicopter, identification of the failed engine, immediate actions (touch drills), follow-up actions and checks and flying accuracy, in the following situations:

a	Simulated engine failure after take-off and on/during approach (**) (at a safe altitude unless carried out in an FFS or FNPT II/III, FTD 2,3)
b	Failure of stability augmentation devices/hydraulic system (if applicable)
c	Limited panel
d	Autorotation and recovery to a pre-set altitude
e	3D operations manually without flight director (***)

	3D operations manually with flight director (***)
--	---

- (+) To establish PBN privileges, one approach in either Section 4 or Section 5 shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.
- (*) To be performed in Section 4 or Section 5.
- (**) Multi-engine helicopter only.
- (***) Only one item to be tested.
-

Appendix 8

*Cross-crediting of the IR part of a class or type rating proficiency check or EBT practical assessment***A. Aeroplanes**

Credits shall be granted only if holders are revalidating or renewing IR privileges for single-pilot single-engine and single-pilot multi-engine aeroplanes, as appropriate.

If a skill test, proficiency check or EBT practical assessment including IR is performed, and holders have a valid:	Credit is valid towards the IR part in proficiency check for:
MPA type rating; Single-pilot high-performance complex aeroplane type rating	SE class rating (*), and SE type rating (*), and SP ME class or type rating except for high-performance complex type ratings, only credits for Section 3B of the proficiency check in point B.5 of Appendix 9 (*)
SP ME aeroplane class or type rating except for high-performance complex aeroplane type ratings, operated as single-pilot	SE class rating, and SE type rating, and SP ME class or type rating except for high-performance complex aeroplane type ratings
SP ME aeroplane class or type rating except for high-performance complex aeroplane type ratings, restricted to MP operations	SE class rating (*), and SE type rating (*), and SP ME class or type rating except for high-performance complex aeroplane type ratings (*).
SP SE aeroplane class or type rating	SE class rating, and SE type rating

(*) Provided that within the preceding 12 months the applicants have flown at least three IFR departures and approaches exercising PBN privileges, including at least one RNP APCH approach on an SP class or type of aeroplane in SP operations, or, for multi-engine, other than HP complex aeroplanes, the applicants have passed Section 6 of the skill test for SP, other than HP complex aeroplanes flown solely by reference to instruments in SP operations.

B. Helicopters

Credits shall be granted only if holders are revalidating or renewing IR privileges for single-pilot helicopters, as appropriate.

If a skill test or a proficiency check, including IR, is performed and the holders have a valid:	Credit is valid towards the IR part in a proficiency check for:
Multi-pilot helicopter (MPH) type rating	Single-pilot helicopter (SPH) of the same type, including privileges for single-pilot operations (*)
Single-pilot helicopter (SPH) type rating, in multi-pilot operations	Privileges for single-pilot operations in the same type(*) (*)

(*) Provided that within the preceding 12 months at least three IFR departures and approaches exercising PBN privileges, including one RNP APCH approach (which may be a Point in Space (PinS) approach), have been performed on a SP type of helicopter in SP operations.

*Appendix 9****Training, skill test and proficiency check for the MPL, and the ATPL, and for type and class ratings, and proficiency checks for the BIR and the IR*****A. General**

1. Applicants for a skill test shall have received instruction in the same class or type of aircraft to be used in the test.
- 1a. Training in FFS in accordance with points 1b and 1c of this Section shall be complemented with take-off and landing training in a single-pilot aircraft operated in single-pilot or multi-pilot operations, or in a multi-pilot aircraft, as applicable, in accordance with point 17 of this Section, unless the training is completed in accordance with point FCL.730.A or constitutes training for cruise relief co-pilots in accordance with Section B, point 6(i), of this Appendix.
- 1b. The training for MPA and PL type ratings shall be conducted in an FFS or in a combination of FSTD(s) and FFS. The skill test or proficiency check for MPA and PL type ratings and the issue of an ATPL and an MPL, shall be conducted in an FFS, if available.
- 1c. The training, skill test or proficiency check for class or type ratings for SPA and helicopters shall be conducted in either of the following:
 - (a) an available and accessible FFS, or in a combination of such FFS and FSTD(s);
 - (b) a combination of FSTD(s) and the aircraft if an FFS is not available or accessible;
 - (c) the aircraft if no FSTD is available or accessible.
- 1d. By way of derogation from point 1c, the training, skill test or proficiency check for class or type ratings for non-complex SPA and for non-complex helicopters may be conducted in a combination of FSTD(s) and the aircraft even if an FFS is available and accessible.
- 1e. By way of derogation from point 1c, the training, skill test or proficiency check for any of the following may be conducted in accordance with points 1c(a), (b) or (c), irrespective of the availability and accessibility of FFS or FSTD:
 - (a) non-complex non-high-performance single-pilot aeroplanes;
 - (b) TMGs;
 - (c) non-complex helicopters for which the maximum certified seat configuration does not exceed five seats.
- 1f. If FSTDs are used during training, testing or checking, the suitability of the FSTDs used shall be verified against the applicable 'Table of functions and subjective tests' and the applicable 'Table of FSTD validation tests' contained in the primary reference document applicable for the device used. All restrictions and limitations indicated on the device's qualification certificate shall be considered.
2. Failure to achieve a pass in all sections of the test in two attempts will require further training.
3. There is no limit to the number of skill tests that may be attempted.

CONTENT OF THE TRAINING/SKILL TEST/PROFICIENCY CHECK

4. Unless otherwise determined in the operational suitability data (OSD), the syllabus of flight instruction, the skill test and the proficiency check shall comply with this Appendix. The syllabus, skill test and proficiency check may be reduced to give credit for previous experience on similar aircraft types, as determined in the OSD.
5. Except in the case of skill tests for the issue of an ATPL, when so defined in the OSD for the specific aircraft, credit may be given for skill test items common to other types or variants where the pilots are qualified.

CONDUCT OF THE TEST/CHECK

6. The examiner may choose between different skill test or proficiency check scenarios containing simulated relevant operations. Full-flight simulators and other training devices shall be used, as established in this Regulation.
7. During the proficiency check, the examiner shall verify that holders of the class or type rating maintain an adequate level of theoretical knowledge.
8. Should applicants choose to terminate a skill test for reasons considered inadequate by the examiner, they shall retake the entire skill test. If the test is terminated for reasons considered adequate by the examiner, only those sections not completed shall be tested in a further flight.
9. At the discretion of the examiner, any manoeuvre or procedure of the test may be repeated once by the applicants. The examiner may stop the test at any stage if it is considered that the applicants' demonstration of flying skill requires a complete retest.
10. Applicants shall be required to fly the aircraft from a position where the PIC or co-pilot functions, as relevant, can be performed. Under single-pilot conditions, the test shall be performed as if there was no other crew member present.
11. During pre-flight preparation for the test, applicants are required to determine power settings and speeds. Applicants shall indicate to the examiner the checks and duties carried out, including the identification of radio facilities. Checks shall be completed in accordance with the checklist for the aircraft on which the test is being taken and, if applicable, with the MCC concept. Performance data for take-off, approach and landing shall be calculated by applicants in compliance with the operations manual or flight manual for the aircraft used. Decision heights/altitudes, minimum descent heights/altitudes and missed approach point shall be agreed upon with the examiner.
12. The examiner shall take no part in the operation of the aircraft except where intervention is necessary in the interests of safety or to avoid unacceptable delay to other traffic.

SPECIFIC REQUIREMENTS FOR THE TRAINING, SKILL TEST AND PROFICIENCY CHECK FOR TYPE RATINGS FOR MULTI-PILOT AIRCRAFT, FOR SINGLE-PILOT AIRCRAFT WHEN OPERATED IN MULTI-PILOT OPERATIONS, FOR THE MPL AND FOR THE ATPL

13. The skill test for a multi-pilot aircraft or a single-pilot aircraft when operated in multi-pilot operations shall be performed in a multi-pilot environment. Another applicant or another type rated qualified pilot may function as the second pilot. If an aircraft is used, the second pilot shall be the examiner or an instructor.
14. Applicants shall operate as PF during all sections of the skill test, except for abnormal and emergency procedures, which may be conducted as PF or PM in accordance with MCC. Applicants for the initial issue of a multi-pilot aircraft type rating or ATPL shall also demonstrate the ability to act as PM. Applicants may choose either the left-hand or the right-hand seat for the skill test if all items can be executed from the selected seat.
15. The following matters shall be specifically checked by the examiner for applicants for the ATPL or a type rating for multi-pilot aircraft or for multi-pilot operations in a single-pilot aircraft extending to the duties of a PIC, irrespective of whether the applicants act as PF or PM:
 - (a) managing crew cooperation;
 - (b) maintaining a general survey of the aircraft operation by appropriate supervision; and
 - (c) setting priorities and making decisions in accordance with safety aspects and relevant rules and regulations appropriate to the operational situation, including emergencies.
16. The test or check should be accomplished under IFR, if the IR rating is included, and as far as possible be accomplished in a simulated commercial air transport environment. An essential element to be checked is the ability to plan and conduct the flight from routine briefing material.
17. When their type rating course has included less than 2 hours of flight training in the aircraft, applicants shall, before or after the skill test, complete flight training in the aircraft.

Such approved flight training shall include take-off and landing manoeuvres and shall be performed by a qualified instructor under the responsibility of:

 - (a) an ATO; or
 - (b) an organisation holding an AOC and specifically approved for such training; or
 - (c) the instructor, in cases where no aircraft flight training for SP aircraft at an ATO or AOC holder is approved, and the aircraft flight training was approved by the CAA.

A certificate of completion of the type rating course including the flight training in the aircraft shall be forwarded to the CAA before the new type rating is entered in the applicants' licence.
18. For the upset recovery training, 'stall event' means either an approach-to- stall or a stall. An FFS can be used by the ATO to either train recovery from a stall or demonstrate the type-specific characteristics of a stall, or both, provided that:
 - (a) the FFS has been qualified in accordance with the special evaluation requirements in CS-FSTD(A); and
 - (b) the ATO has successfully demonstrated to the CAA that any negative transfer of training is mitigated.

B. Specific requirements for the aeroplane category**PASS MARKS**

1. In the case of single-pilot aeroplanes, with the exception of single-pilot high-performance complex aeroplanes, applicants shall pass all sections of the skill test or proficiency check. Failure in any item of a section will cause applicants to fail the entire section. If they fail only one section, they shall repeat only that section. Failure in more than one section will require applicants to repeat the entire test or check. Failure in any section in the case of a retest or recheck, including those sections that have been passed on a previous attempt, will require applicants to repeat the entire test or check again. For single-pilot multi-engine aeroplanes, Section 6 of the relevant test or check, addressing asymmetric flight, shall be passed.
2. In the case of multi-pilot and single-pilot high-performance complex aeroplanes, applicants shall pass all sections of the skill test or proficiency check. Failure in more than five items will require applicants to take the entire test or check again. Applicants failing 5 or fewer items shall take the failed items again. Failure in any item on the retest or recheck, including those items that have been passed on a previous attempt, will require applicants to repeat the entire check or test again.

FLIGHT TEST TOLERANCE

3. Applicants shall demonstrate the ability to:
 - (a) operate the aeroplane within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge;
 - (e) maintain control of the aeroplane at all times in such a manner that the successful outcome of a procedure or manoeuvre is never in doubt;
 - (f) understand and apply crew coordination and incapacitation procedures, if applicable; and
 - (g) communicate effectively with the other crew members, if applicable.
4. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the aeroplane used:

Height

Generally	± 100 feet
Starting a go-around at decision height/altitude	+ 50 feet/– 0 feet
Minimum descent height/MAPt/altitude	+ 50 feet/– 0 feet

Tracking

On radio aids	$\pm 5^\circ$
For 'angular' deviations	Half scale deflection, azimuth and glide path (e.g. LPV, ILS, MLS, GLS)
2D (LNAV) and 3D (LNAV/VNAV) 'linear' lateral deviations	cross-track error/deviation shall normally be limited to $\pm \frac{1}{2}$ of the RNP value associated with the procedure. Brief deviations from this standard up to a maximum of one time the RNP value are allowable.
3D linear vertical deviations (e.g. RNP APCH (LNAV/VNAV) using BaroVNAV)	not more than – 75 feet below the vertical profile at any time, and not more than + 75 feet above the vertical profile at or below 1000 feet above aerodrome level.

Heading

all engines operating	$\pm 5^\circ$
with simulated engine failure	$\pm 10^\circ$

Speed

all engines operating	± 5 knots
with simulated engine failure	+ 10 knots/– 5 knots,

CONTENT OF THE TRAINING/SKILL TEST/PROFICIENCY CHECK

5. Single-pilot aeroplanes, except for high-performance complex aeroplanes

(a) The following symbols mean:

P = Trained as PIC or co-pilot and as PF and PM

OTD = Other training devices may be used for this exercise

X = An FFS shall be used for this exercise; otherwise, an aeroplane shall be used if appropriate for the manoeuvre or procedure

P# = The training shall be complemented by supervised aeroplane inspection

(b) The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted on any higher level of equipment shown by the arrow (—>).

The following abbreviations are used to indicate the training equipment used:

A = aeroplane

FFS = full-flight simulator

FSTD = flight simulation training device

- (c) The starred (*) items of Section 3B and, for multi-engine, Section 6, shall be flown solely by reference to instruments if revalidation/renewal of an IR is included in the skill test or proficiency check. If the starred (*) items are not flown solely by reference to instruments during the skill test or proficiency check, and when there is no crediting of IR privileges, the class or type rating will be restricted to VFR only.
- (d) Section 3A shall be completed to revalidate a type or multi-engine class rating, VFR only, where the required experience of 10 route sectors within the previous 12 months has not been completed. Section 3A is not required if Section 3B is completed.
- (e) Where the letter 'M' appears in the skill test or proficiency check column, this will indicate a mandatory exercise or a choice where more than one exercise appears.
- (f) An FSTD shall be used for practical training for type or ME class ratings if they form part of an approved class or type rating course. The following considerations will apply to the approval of the course:
 - (i) the qualification of the FSTD as set out in the relevant requirements of CAR-ORA;
 - (ii) the qualifications of the instructors;
 - (iii) the amount of FSTD training provided on the course; and
 - (iv) the qualifications and previous experience on similar types of the pilots under training.
- (g) To exercise the privileges of a class or type rating in multi-pilot operations in accordance with point FCL.725(d) or (da), pilots that are already entitled to operate the relevant class or type of aeroplane in single-pilot operations shall meet the following conditions:
 - (1) complete a bridge course containing manoeuvres and procedures including MCC as well as the exercises of Section 7 using threat and error management (TEM), CRM and human factors at an organisation that is specified in point FCL.725(d)(1)(i);
 - (2) pass a proficiency check in multi-pilot operations.
- (h) To exercise the privileges of a type rating in single-pilot operations in accordance with point FCL.725(d), pilots that are already entitled to operate the relevant type of aeroplane in multi-pilot operations shall be trained at an organisation that is specified in point FCL.725(d) (1)(i) and checked for the following additional manoeuvres and procedures in single-pilot operations:
 - (1) for SE aeroplanes, 1.6, 4.5, 4.6, 5.2 and, if applicable, one approach from Section 3.B;
 - (2) for ME aeroplanes, 1.6, Section 6 and, if applicable, one approach from Section 3.B.
- (i) Pilots that are entitled to exercise the privileges of a class or type rating in both single-pilot and multi-pilot operations in accordance with points (g) and (h) may maintain privileges for both forms of operation by completing either of the following:
 - (1) two proficiency checks, one in single-pilot operations and one in multi-pilot operations;

- (2) a proficiency check in multi-pilot operations in addition to the exercises referred to in points (h)(1) or (h)(2), as applicable, in single-pilot operations.

Proficiency checks for the revalidation or renewal of class ratings shall always include the exercises referred to in points (h)(1) or (h)(2), as applicable, in single-pilot operations.

- (j) To remove a restriction to multi-pilot operations from a single-pilot aeroplane type rating in accordance with point FCL.725(d)(2), pilots shall comply with point (h).
- (k) The training, testing and checking shall follow the table mentioned below.
 - (1) Training at an ATO, testing and checking requirements for single-pilot privileges
 - (2) Training at an ATO, testing and checking requirements for multi-pilot privileges
 - (3) Training at an ATO, testing and checking requirements for pilots holding single-pilot privileges seeking multi-pilot privileges for the first time (bridge course)
 - (4) Training at an ATO, testing and checking requirements for pilots holding multi-pilot privileges seeking single-pilot privileges for the first time (bridge course)
 - (5) Training at an ATO and checking requirements for combined revalidation and renewal of single and multi-pilot privileges

- (I) To establish or maintain PBN privileges, one approach shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.

By way of derogation from the first paragraph, in cases where a proficiency check for revalidation of PBN privileges is performed in an aircraft or an FSTD representing that aircraft, which are not equipped for RNP APCH manoeuvres, the proficiency check may not include RNP APCH exercises. equipped for RNP APCH manoeuvres, the proficiency check may not include RNP APCH exercises. In such cases, the PBN privileges of the pilot shall not include RNP APCH. The restriction shall be lifted if the pilot has completed a proficiency check including an RNP APCH exercise for the relevant class or type.

TMGs AND SINGLE-PILOT AEROPLANES, EXCEPT FOR HIGH-PERFORMANCE COMPLEX AEROPLANES		PRACTICAL TRAINING			CLASS OR TYPE RATING SKILL TEST OR PROFICIENCY CHECK

6. Multi-pilot aeroplanes and single-pilot high-performance complex aeroplanes

(a) The following symbols mean:

P = Trained as PIC or co-pilot and as PF and PM for the issue of a type rating as applicable.

OTD = Other training devices may be used for this exercise

X = An FFS shall be used for this exercise; otherwise, an aeroplane shall be used if appropriate for the manoeuvre or procedure

P# = The training shall be complemented by supervised aeroplane inspection

(b) The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted up to any higher equipment level shown by the arrow (—>).

The following abbreviations are used to indicate the training equipment used:

A = aeroplane

FFS = full-flight simulator

FSTD = flight simulation training device

(c) The starred items (*) shall be flown solely by reference to instruments.

(d) Where the letter 'M' appears in the skill test or proficiency check column, this will indicate a mandatory exercise or a choice where more than one exercise appears.

(e) An FFS shall be used for practical training and testing if the FFS forms part of an approved type rating course. The following considerations will apply to the approval of the course:

- (i) the qualifications of the instructors;
- (ii) the qualification and the amount of training provided on the course in an FSTD; and
- (iii) the qualifications and previous experience on similar types of the pilots under training.

(f) Manoeuvres and procedures shall include MCC for multi-pilot aeroplane and for single-pilot high-performance complex aeroplanes in multi-pilot operations.

(g) Manoeuvres and procedures shall be conducted in single-pilot role for single-pilot high-performance complex aeroplanes in single-pilot operations.

- (h) To remove a restriction to multi-pilot operations in accordance with point FCL.725(d)(2) from a single-pilot high-performance complex aeroplane type rating, pilots shall complete the manoeuvres/procedures in 2.5, 3.8.3.4, 4.4, 5.5 and at least one manoeuvre/procedure from Section 3.4 in single-pilot operation.
- (i) Applicants for and holders of a restricted type rating issued in accordance with [FCL.720.A\(c\)](#), shall complete training, skill tests and proficiency checks in accordance with this Appendix. However, unless they undergo a skill test in accordance with point FCL.720.A(c)(3), they shall, during a skill test or a proficiency check, perform at least the landing manoeuvres in the role of the pilot monitoring but shall not be required to perform the following:
- (1) take-off manoeuvres;
 - (2) landing manoeuvres in the role of the pilot flying.
- (j) To establish or maintain PBN privileges, one approach shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.

By way of derogation from the first paragraph, in cases where a proficiency check for revalidation of PBN privileges is performed in an aircraft or an FSTD representing that aircraft, which are not equipped for RNP APCH manoeuvres, the proficiency check may not include an RNP APCH exercise. In such cases, the PBN privileges of the pilot shall not include RNP APCH. The restriction shall be lifted if the pilot has completed a proficiency check including an RNP APCH exercise for the relevant class or type.

MULTI-PILOT AEROPLANES AND SINGLE-PILOT HIGH-PERFORMANCE COMPLEX AEROPLANES		PRACTICAL TRAINING			ATPL/MPL/TYPE RATING SKILL TEST OR PROF. CHECK

3.4.14. Auxiliary power unit (APU)	OTD P—→	—→			
Intentionally left blank					

3.6. Abnormal and emergency procedures:				M	A mandatory minimum of 3 items shall be selected from 3.6.1 to 3.6.9 inclusive
3.6.1. Fire drills, e.g. engine, APU, cabin, cargo compartment, flight deck, wing and electrical fires including evacuation	P—>	—>			
3.6.2. Smoke control and removal	P—>	—>			
3.6.3. Engine failures, shutdown and restart at a safe height	P—>	—>			
3.6.4. Fuel dumping (simulated)	P—>	—>			
3.6.5. Wind shear at take-off/landing	P	X		FFS only	
3.6.6. Simulated cabin pressure failure/emergency descent	P—>	—>			
3.6.7. Incapacitation of flight crew member	P—>	—>			
3.6.8. Other emergency procedures as outlined in the appropriate aeroplane flight manual (AFM)	P—>	—>			
MULTI-PILOT AEROPLANES AND SINGLE-PILOT HIGH-PERFORMANCE COMPLEX AEROPLANES	PRACTICAL TRAINING			ATPL/MPL/TYPE RATING SKILL TEST OR PROF. CHECK	
Manoeuvres/procedures	FSTD	A	Instructor initials when training completed	Tested or checked in FSTD or A	Examiner initials when test or check completed
3.6.9. TCAS event	OTD P—>	An aeroplane shall not be used		FFS only	
3.7. Upset recovery training 3.7.1. Recovery from stall events in: — take-off configuration; — clean configuration at low altitude; — clean configuration near maximum operating altitude; and — landing configuration.	P FFS qualified for the training task only	X An aeroplane shall not be used for this exercise			

3.7.2. The following upset exercises: — recovery from nose-high at various bank angles; and — recovery from nose-low at various bank angles	P FFS qualified for the training task only	X An aeroplane shall not be used for this exercise		FFS only	
3.8. Instrument flight procedures					
3.8.1* Adherence to departure and arrival routes and ATC instructions	P—>	—>		M	
3.8.2* Holding procedures	P—>	—>			
3.8.3* 3D operations to DH/A of 200 ft (60 m) or to higher minima if required by the approach procedure					

Note: According to the AFM, RNP APCH procedures may require the use of autopilot or flight director. The procedure to be flown manually shall be chosen taking into account such limitations (for example, choose an ILS for 3.8.3.1 in the case of such AFM limitation).

3.8.3.1* Manually, without flight director	P—>	—>		M (skill only) test	
MULTI-PILOT AEROPLANES AND SINGLE-PILOT HIGH-PERFORMANCE COMPLEX AEROPLANES	PRACTICAL TRAINING			ATPL/MPL/TYPE RATING SKILL TEST OR PROF. CHECK	
Manoeuvres/procedures	FSTD	A	Instructor initials when training completed	Tested or checked in FSTD or A	Examiner initials when test or check completed
3.8.3.2* Manually, with flight director	P—>	—>			
3.8.3.3* With autopilot	P—>	—>			

3.8.3.4*	Manually, with one engine simulated inoperative during final approach, either until touchdown or through the complete missed approach procedure (as applicable), starting: (i) before passing 1000 ft above aerodrome level; and (ii) after passing 1000 ft above aerodrome level. In aeroplanes which are not certificated as transport category aeroplanes (i.e., JAR/ FAR 25) or as commuter category aeroplanes (i.e., SFAR 23), the approach with simulated engine failure and the ensuing go-around shall be initiated in conjunction with the 2D approach in accordance with 3.8.4. The go-around shall be initiated when reaching the published obstacle clearance height/ altitude (OCH/A); however, not later than reaching an MDH/A of 500 ft above the runway threshold elevation. In aeroplanes having the same performance as a transport category aeroplane regarding take-off mass and density altitude, the instructor may simulate the engine failure in accordance with exercise 3.8.3.4.	P—>	—>		M	
3.8.4*	2D operations down to the MDH/A	P*—>	—>		M	
3.8.5.	Circling approach under the following conditions:	P*—>	—>			
MULTI-PILOT AEROPLANES AND SINGLE-PILOT HIGH-PERFORMANCE COMPLEX AEROPLANES		PRACTICAL TRAINING			ATPL/MPL/TYPE RATING SKILL TEST OR PROF. CHECK	
Manoeuvres/procedures		FSTD	A	Instructor initials when training completed	Tested or checked in FSTD or A	Examiner initials when test or check completed
(a) * approach to the authorised minimum circling approach altitude at the aerodrome in question in accordance with the local instrument approach facilities in simulated instrument flight conditions; followed by: (b) circling approach to another runway at least 90° off centreline from the final approach used in item (a), at the authorised minimum circling approach altitude. <i>Remark:</i> If (a) and (b) are not possible due to ATC reasons, a simulated low visibility pattern may be performed.						
3.8.6.	Visual approaches	P—>	—>			

SECTION 4

4	Missed approach procedures					
4.1.	Go-around with all engines operating* during a 3D operation on reaching decision height	P*—>	—>			
4.2.	Go-around with all engines operating* from various stages during an instrument approach	P*—>	—>			
4.3.	Other missed approach procedures	P*—>	—>			
4.4*	Manual go-around with the critical engine simulated inoperative after an instrument approach on reaching DH, MDH or MAPt	P*—>	—>		M	
4.5.	Rejected landing with all engines operating: — from various heights below DH/MDH; — after touchdown (balked landing)	P—>	—>			
MULTI-PILOT AEROPLANES AND SINGLE-PILOT HIGH-PERFORMANCE COMPLEX AEROPLANES		PRACTICAL TRAINING			ATPL/MPL/TYPE RATING SKILL TEST OR PROF. CHECK	
Manoeuvres/procedures		FSTD	A	Instructor initials when training completed	Tested or checked in FSTD or A	Examiner initials when test or check completed
In aeroplanes which are not certificated as transport category aeroplanes (i.e., JAR/ FAR 25) or as commuter category aeroplanes (i.e., SFAR 23), the rejected landing with all engines operating shall be initiated below MDH/A or after touchdown.						

SECTION 5

5	Landings	P				
5.1.	Normal landings* with visual reference established when reaching DA/H following an instrument approach operation					

5.2.	Landing with simulated jammed horizontal stabiliser in any out-of-trim position	P—>	An aeroplane shall not be used for this exercise		FFS only	
5.3.	Crosswind landings (aircraft, if practicable)	P—>	—>			
5.4.	Traffic pattern and landing without extended or with partly extended flaps and slats	P—>	—>			
5.5.	Landing with critical engine simulated inoperative	P—>	—>		M	
5.6.	Landing with two engines inoperative: — aeroplanes with three engines: the centre engine and one outboard engine as far as practicable according to data of the AFM; and — aeroplanes with four engines: two engines at one side	P	X		M FFS only (skill test only)	

7. Class ratings — sea

Section 6 shall be completed to revalidate a multi-engine class rating sea, VFR only, where the required experience of 10 route sectors within the previous 12 months has not been completed.

CLASS RATING SEA	PRACTICAL TRAINING	CLASS RATING SKILL TEST OR PROFICIENCY CHECK
Manoeuvres/procedures	Instructor's initials when training completed	Examiner's initials when test completed
SECTION 1		
1 Departure		
1.1. Preflight including: — documentation; — mass and balance; — weather briefing; and — NOTAM.		
1.2 Pre-start checks External/internal		

1.3. Engine start-up and shutdown Normal malfunctions		
1.4. Taxiing		
1.5. Step taxiing		
1.6. Mooring: Beach Jetty pier Buoy		
1.7. Engine-off sailing		
CLASS RATING SEA	PRACTICAL TRAINING	CLASS RATING SKILL TEST OR PROFICIENCY CHECK
Manoeuvres/procedures	Instructor's initials when training completed	Examiner's initials when test completed
1.8. Pre-departure checks: Engine run-up (if applicable)		
1.9. Take-off procedure: — normal with flight manual flap settings; and — crosswind (if conditions are available).		
1.10. Climbing: — turns onto headings — level off		
1.11 ATC liaison — compliance, R/T procedures		
SECTION 2		
2 Air work (VFR)		
2.1 Straight and level flight at various airspeeds including flight at critically low airspeed with and without flaps (including approach to VMCA when applicable)		
2.2. Steep turns (360° left and right at 45° bank)		

2.3 Stalls and recovery: (i) clean stall; (ii) approach to stall in descending turn with bank with approach configuration and power; (iii) approach to stall in landing configuration and power; and (iv) approach to stall, climbing turn with take-off flap and climb power (single-engine aeroplanes only).		
2.4. ATC liaison — compliance, R/T procedures		
SECTION 3		
3 En-route procedures VFR		
3.1 Flight plan, dead reckoning and map reading		
3.2. Maintenance of altitude, heading and speed		
CLASS RATING SEA	PRACTICAL TRAINING	CLASS RATING SKILL TEST OR PROFICIENCY CHECK
Manoeuvres/procedures	Instructor's initials when training completed	Examiner's initials when test completed
3.3. Orientation, timing and revision of ETAs		
3.4. Use of radio navigation aids (if applicable)		
3.5. Flight management (flight log, routine checks including fuel, systems and icing)		
3.6. ATC liaison — compliance, R/T procedures		
SECTION 4		
4 Arrivals and landings		
4.1 Aerodrome arrival procedure (amphibians only)		
4.2 Normal landing		
4.3. Flapless landing		
4.4. Crosswind landing (if suitable conditions)		

4.5. Approach and landing with idle power from up to 2000' above the water (single-engine aeroplanes only)		
4.6. Go-around from minimum height		
4.7. Glassy water landing Rough water landing		
4.8. ATC liaison — compliance, R/T procedures		

SECTION 5

5 Abnormal and emergency procedures

(This section may be combined with Sections 1 through 4.)

5.1. Rejected take-off at a reasonable speed		
5.2. Simulated engine failure after take-off (single-engine aeroplanes only)		
5.3. Simulated forced landing without power (single-engine aeroplanes only)		
CLASS RATING SEA	PRACTICAL TRAINING	CLASS RATING SKILL TEST OR PROFICIENCY CHECK
Manoeuvres/procedures	Instructor's initials when training completed	Examiner's initials when test completed
5.4. Simulated emergencies: (i) fire or smoke in-flight; and (ii) systems' malfunctions as appropriate.		
5.5. ATC liaison — compliance, R/T procedures		

SECTION 6

6 Simulated asymmetric flight

(This section may be combined with Sections 1 through 5.)

6.1. Simulated engine failure during take-off (at a safe altitude unless carried out in an FFS and an FNPT II)		
6.2. Engine shutdown and restart (ME skill test only)		
6.3. Asymmetric approach and go-around		
6.4. Asymmetric approach and full-stop landing		

6.5. ATC liaison — compliance, R/T procedures		
---	--	--

C. Specific requirements for the helicopter category

1. In the case of skill test or proficiency check for type ratings and the ATPL, applicants shall pass Sections 1 to 4 and 6 (as applicable) of the skill test or proficiency check. Failure in more than five items will require applicants to repeat the entire test or check. Applicants failing not more than five items shall repeat the failed items. Failure in any item in the case of a retest or a recheck or failure in any other items already passed will require the applicants to repeat the entire test or check again. All sections of the skill test or proficiency check shall be completed within 6 months.
2. In the case of proficiency check for an IR, applicants shall pass Section 5 of the proficiency check. Failure in more than 3 items will require applicants to repeat the entire Section 5. Applicants failing not more than 3 items shall repeat the failed items. Failure in any item in the case of a recheck or failure in any other items of Section 5 already passed will require applicants to repeat the entire check.

FLIGHT TEST TOLERANCE

3. Applicants shall demonstrate the ability to:
 - (a) operate the helicopter within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge;
 - (e) maintain control of the helicopter at all times in such a manner that the successful outcome of a procedure or manoeuvre is never in doubt;
 - (f) understand and apply crew coordination and incapacitation procedures, if applicable; and
 - (g) communicate effectively with the other crew members, if applicable.
4. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the helicopter used.

(a) IFR flight limits

Height

Generally	± 100 feet
Starting a go-around at decision height/altitude	+ 50 feet/– 0 feet
Minimum descent height/MAPt/altitude	+ 50 feet/– 0 feet

Tracking

On radio aids	± 5°
---------------	------

For 'angular' deviations	Half scale deflection, azimuth and glide path (e.g. LPV, ILS, MLS, GLS)
2D (LNAV) and 3D (LNAV/VNAV) 'linear' lateral deviations	cross-track error/deviation shall normally be limited to $\pm \frac{1}{2}$ of the RNP value associated with the procedure. Brief deviations from this standard up to a maximum of one time the RNP value are allowable.
3D linear vertical deviations (e.g. RNP APCH (LNAV/VNAV) using BaroVNAV)	not more than – 75 feet below the vertical profile at any time, and not more than + 75 feet above the vertical profile at or below 1000 feet above aerodrome level.
Heading	
all engines operating	$\pm 5^\circ$
with simulated engine failure	$\pm 10^\circ$
Speed	
all engines operating	± 5 knots
with simulated engine failure	+ 10 knots/– 5 knots
(b) VFR flight limits	
Height	
Generally	± 100 feet
Heading	
Normal Operations	$\pm 5^\circ$
Abnormal operations/emergencies	$\pm 10^\circ$
Speed	
Generally	± 10 knots
with simulated engine failure	+ 10 knots/– 5 knots
Ground drift	
T.O. hover I.G.E.	± 3 ft
Landing	± 2 ft (with 0 ft rearward or lateral flight)

CONTENT OF THE TRAINING/SKILL TEST/PROFICIENCY CHECK**GENERAL**

5. The following symbol means:

P = Trained as PIC for the issue of a type rating for single-pilot helicopters (SPH) or trained as PIC or co-pilot and as PF and PM for the issue of a type rating for multi pilot helicopters (MPH).

6. The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted up to any higher equipment level shown by the arrow (—→).

The following abbreviations are used to indicate the training equipment used:

FFS = full-flight simulator

FTD = flight training device

H = helicopter

7. The starred items (*) shall be flown in actual or simulated IMC, only by applicants wishing to renew or revalidate an IR(H) or extend the privileges of that rating to another type.
8. Instrument flight procedures (Section 5) shall be performed only by applicants wishing to renew or revalidate an IR(H) or extend the privileges of that rating to another type. An FFS or an FTD 2/3 may be used for this purpose.
- 8a. To establish or maintain PBN privileges, one approach shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.

By way of derogation from subparagraph above, in cases where a proficiency check for revalidation of PBN privileges does not include an RNP APCH exercise, the PBN privileges of the pilot shall not include RNP APCH. The restriction shall be lifted if the pilot has completed a proficiency check including an RNP APCH exercise.

9. Where the letter 'M' appears in the skill test or proficiency check column, this will indicate a mandatory exercise.
10. An FSTD shall be used for practical training and testing if the FSTD forms part of a type rating course. The following considerations will apply to the course:
- (a) the qualification of the FSTD as set out in the relevant requirements of CAR-ORA;
 - (b) the qualifications of the instructor and examiner;
 - (c) the amount of FSTD training provided on the course;
 - (d) the qualifications and previous experience in similar types of the pilots under training; and
 - (e) the amount of supervised flying experience provided after the issue of the new type rating.

MULTI-PILOT HELICOPTERS

11. Applicants for the skill test for the issue of the multi-pilot helicopter type rating and ATPL(H) shall pass only Sections 1 to 4 and, if applicable, Section 6.

12. Applicants for the revalidation or renewal of the multi-pilot helicopter type rating proficiency check shall pass only Sections 1 to 4 and, if applicable, Section 6.

SINGLE/MULTI-PILOT HELICOPTERS		PRACTICAL TRAINING			SKILL TEST OR PROFICIENCY CHECK	
Manoeuvres/procedures		FSTD	H	Instructor initials when training completed	Checked in FSTD or H	Examiner initials when test completed
SECTION 1 — Pre-flight preparations and checks						
1.1	Helicopter exterior visual inspection; location of each item and purpose of inspection		P		M (if performed in the helicopter)	
1.2	Cockpit inspection	P	— —>		M	
1.3	Starting procedures, radio and navigation equipment check, selection and setting of navigation and communication frequencies	P	— —>		M	
1.4	Taxiing/air taxiing in compliance with ATC instructions or with instructions of an instructor	P	— —>		M	
1.5	Pre-take-off procedures and checks	P	— —>		M	
SINGLE/MULTI-PILOT HELICOPTERS		PRACTICAL TRAINING			SKILL TEST OR PROFICIENCY CHECK

6	Use of optional equipment	P	— —>		

SINGLE-PILOT HELICOPTERS

13. To exercise the privileges of the type rating in accordance with point FCL.725(d), applicants for the issue, revalidation or renewal of a single-pilot helicopter type rating shall:

- for single-pilot operations, complete the skill test or proficiency check in single-pilot operations;
- in multi-pilot operations, complete the skill test or proficiency check in multi-pilot operations;
- for both single-pilot and multi-pilot operations, complete the skill test or proficiency check in multi-pilot operations and, additionally, the following manoeuvres and procedures in single-pilot operations:

- (1) for single-engine helicopters: 2.1 take-off and 2.6 and 2.6.1 autorotative descent and autorotative landing;
 - (2) for multi-engine helicopters: 2.1 take-off and 2.4 and 2.4.1 engine failures shortly before and shortly after reaching TDP;
 - (3) for IR privileges, in addition to point (1) or (2), as applicable, one approach of Section 5, unless the criteria of Appendix 8 are met;
- (d) in order to remove a restriction to multi-pilot operations from a single-pilot helicopter type rating, in accordance with point FCL.725(d)(2), complete a proficiency check that includes the manoeuvres and procedures referred to in points (c)(1) or (c)(2), as applicable.

D. Specific requirements for the powered-lift aircraft category

1. In the case of skill tests or proficiency checks for powered-lift aircraft type ratings, applicants shall pass Sections 1 to 5 and 6 (as applicable) of the skill test or proficiency check. Failure in more than five items will require applicants to repeat the entire test or check. Applicants failing not more than five items shall repeat the failed items. Failure in any item in the case of a retest or a recheck or failure in any other items already passed will require applicants to repeat the entire test or check. All sections of the skill test or proficiency check shall be completed within 6 months.

FLIGHT TEST TOLERANCE

2. Applicants shall demonstrate the ability to:
- (a) operate the powered-lift aircraft within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge;
 - (e) maintain control of the powered-lift aircraft at all times in such a manner that the successful outcome of a procedure or manoeuvre is never in doubt;
 - (f) understand and apply crew coordination and incapacitation procedures; and
 - (g) communicate effectively with the other crew members.
3. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the powered-lift aircraft used.
- (a) IFR flight limits

Height

Generally	± 100 feet
Starting a go-around at decision height/altitude	+ 50 feet/– 0 feet
Minimum descent height/altitude	+ 50 feet/– 0 feet

Tracking

On radio aids	$\pm 5^\circ$
Precision approach	half-scale deflection, azimuth and glide path

Heading

Normal operations	$\pm 5^\circ$
Abnormal operations/emergencies	$\pm 10^\circ$

Speed

Generally	± 10 knots
with simulated engine failure	+ 10 knots/– 5 knots

(b) VFR flight limits:

Height

Generally	± 100 feet
-----------	----------------

Heading

Normal Operations	$\pm 5^\circ$
Abnormal operations/emergencies	$\pm 10^\circ$

Speed

Generally	± 10 knots
with simulated engine failure	+ 10 knots/– 5 knots

Ground drift

T.O. hover I.G.E.	± 3 ft
Landing	± 2 ft (with 0 ft rearward or lateral flight)

CONTENT OF THE TRAINING/SKILL TEST/PROFICIENCY CHECK

4. The following symbol means:

P = Trained as PIC or co-pilot and as PF and PM for the issue of a type rating as applicable

5. The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted up to any higher equipment level shown by the arrow (—>).

6. The following abbreviations are used to indicate the training equipment used:

FFS = full-flight simulator

FTD = flight training device

OTD = other training device

PL = powered-lift aircraft

6a. The starred items (*) shall be flown solely by reference to instruments. If this condition is not met during the skill test or proficiency check, the type rating will be restricted to VFR only.

7. Where the letter 'M' appears in the skill test or proficiency check column, this will indicate a mandatory exercise.
8. FSTDs shall be used for practical training and testing if they form part of an approved type rating course. The following considerations will apply to the approval of the course:
 - (a) the qualification of the FSTDs as set out in the relevant requirements of CAR-ORA; and
 - (b) the qualifications of the instructor.

POWERED-LIFT AIRCRAFT CATEGORY		PRACTICAL TRAINING					SKILL TEST OR PROFICIENCY CHECK	
Manoeuvres/procedures						Instructor's initials when training completed	Checked in FFS PL	Examiner's initials when test completed
		OTD	FTD	FFS	PL			
SECTION 1 — Pre-flight preparations and checks

E. Specific requirements for the airship category

1. In the case of skill tests or proficiency checks for airship type ratings, applicants shall pass Sections 1 to 5 and 6 (as applicable) of the skill test or proficiency check. Failure in more than five items will require applicants to repeat the entire test or check. Applicants failing not more than five items shall take the failed items again. Failure in any item in the case of a retest or a recheck, or failure in any other items already passed will require applicants to repeat the entire test or check

again. All sections of the skill test or proficiency check shall be completed within 6 months.

FLIGHT TEST TOLERANCE

2. Applicants shall demonstrate the ability to:
 - (a) operate the airship within its limitations;
 - (b) complete all manoeuvres with smoothness and accuracy;
 - (c) exercise good judgement and airmanship;
 - (d) apply aeronautical knowledge;
 - (e) maintain control of the airship at all times in such a manner that the successful outcome of a procedure or manoeuvre is never in doubt;
 - (f) understand and apply crew coordination and incapacitation procedures; and
 - (g) communicate effectively with the other crew members.
3. The following limits shall apply, corrected to make allowance for turbulent conditions and the handling qualities and performance of the airship used.

(a) IFR flight limits:

Height

Generally	± 100 feet
Starting a go-around at decision height/altitude	+ 50 feet/– 0 feet
Minimum descent height/altitude	+ 50 feet/– 0 feet

Tracking

On radio aids	± 5°
Precision approach	half-scale deflection, azimuth and glide path

Heading

Normal operations	± 5°
Abnormal operations/emergencies	± 10°

(b) VFR flight limits:

Height

Generally	± 100 feet
-----------	------------

Heading

Normal Operations	± 5°
Abnormal operations/emergencies	± 10°

CONTENT OF THE TRAINING/SKILL TEST/PROFICIENCY CHECK

4. The following symbol means:

P = Trained as PIC or co-pilot and as PF and PM for the issue of a type rating as applicable.

5. The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted up to any higher equipment level shown by the arrow (—>).

6. The following abbreviations are used to indicate the training equipment used:

FFS = full-flight simulator

FTD = flight training device

OTD = other training device

As = airship

6a. The starred items (*) shall be flown solely by reference to instruments. If this condition is not met during the skill test or proficiency check, the type rating will be restricted to VFR only.

7. Where the letter 'M' appears in the skill test or proficiency check column, this will indicate a mandatory exercise.

8. FSTDs shall be used for practical training and testing if they form part of a type rating course. The following considerations will apply to the course:

(a) the qualification of the FSTDs as set out in the relevant requirements of CAR-ORA; and

(b) the qualifications of the instructor.

AIRSHIP CATEGORY		PRACTICAL TRAINING					SKILL TEST OR PROFICIENCY CHECK

*Appendix 10****Revalidation and renewal of type ratings, and revalidation and renewal of IRs when combined with the revalidation or renewal of type ratings – EBT practical assessment*****A – General**

1. The revalidation and renewal of type ratings as well as the revalidation and renewal of IRs when combined with the revalidation or renewal of type ratings in accordance with this Appendix shall be completed only at EBT operators which comply with all of the following:
 - (a) they have established an EBT programme relevant for the applicable type rating or the IR in accordance with CAR-OPS;
 - (b) they have an experience of at least 3 years in conducting a mixed EBT programme;
 - (c) for each type rating within the EBT programme, the organisation has appointed an EBT manager. EBT managers shall comply with all of the following:
 - (i) they shall hold examiner privileges for the relevant type rating;
 - (ii) they shall have extensive experience in training as an instructor for the relevant type rating;
 - (iii) they shall either be the person nominated as Crew Training Nominated Post-Holder in accordance with CAR-OPS 1.175(j)(3) or a deputy of that person.
2. The EBT manager responsible for the relevant type rating shall ensure that the applicant complies with all qualification, training and experience requirements of this Regulation for the revalidation or the renewal of the relevant rating.
3. Applicants who wish to revalidate or renew a rating in accordance with this Appendix shall comply with all of the following:
 - (a) they shall be enrolled in the operator's EBT programme;
 - (b) in the case of revalidation of a rating, they shall complete the operator's EBT programme within the period of validity of the relevant rating;
 - (c) in the case of renewal of a rating, they shall comply with procedures developed by the EBT operator in accordance with CAR-OPS.
4. The revalidation or renewal of a rating in accordance with this Appendix shall comprise all of the following:
 - (a) continuous EBT practical assessment within an EBT programme;
 - (b) demonstration of an acceptable level of performance in all competencies;
 - (c) the administrative action of licence revalidation or renewal for which the EBT manager responsible for the relevant type rating shall do all of the following:
 - (1) ensure that the requirements of point FCL.1030 are complied with;

- (2) when acting in accordance with point FCL.1030(b)(2), endorse the applicant's licence with the new expiry date of the rating. That endorsement may be completed by another person on behalf of the EBT manager, if that person received a delegation from the EBT manager to do so in accordance with the procedures established in the EBT programme.

B – Conduct of the EBT practical assessment

The EBT practical assessment shall be conducted in accordance with the operator's EBT programme.

Appendix 11

CONDITIONS FOR THE CONVERSION OF EXISTING NATIONAL LICENCES AND RATINGS FOR AEROPLANES AND HELICOPTERS**A. AEROPLANES****1. Pilot licences**

A pilot licence issued by Oman CAA in accordance with the CAR-FCL 1 shall be converted into a CAR-FCL licence provided that the applicant complies with the following requirements:

- (a) for ATPL(A) and CPL(A), complete as a proficiency check the revalidation requirements of CAR-FCL for type/class and instrument rating, relevant to the privileges of the licence held;
- (b) demonstrate knowledge of the relevant parts of the operational requirements and CAR-FCL;
- (c) Have valid English language proficiency assessment;
- (d) comply with the requirements set out in the following table:

	Oman CAA licence held	Existing privilege	Any further requirements	Replacement CAR- FCL licence and conditions (where applicable)	Removal of conditions
	(1)	(2)	(3)	(4)	(5)
(a)	ATPL(A)	Pilot In Command	None	ATPL(A) with relevant type rating	Not applicable
(b)	ATPL(A)	Co-Pilot	None	ATPL(A), with type rating restricted to co- pilot	Demonstrate ability to act as PIC as required by Appendix 9 to CAR-FCL
(c)	CPL/IR(A) and passed an ICAO ATPL theory test	Co-pilot	None	CPL/IR(A) with ATPL theory credit with relevant type/class rating	Not applicable
(d)	CPL/IR(A) (*)	Co-Pilot	None	CPL/IR(A) with relevant type/class rating	Not applicable
(e)	CPL(A)	Co-Pilot	None	CPL(A) with relevant type/class rating	Not applicable

(*) CPL holders already holding a type rating for a multi-pilot aeroplane are not required to have passed an examination for ATPL(A) theoretical knowledge whilst they continue to operate that same aeroplane type, but will not be given ATPL(A) theory credit for a CAR-FCL licence. If they require another type rating for a different multi-pilot aeroplane, they must comply with pass an examination for ATPL(A) knowledge.

2. Instructor certificates

An instructor certificate issued by Oman CAA in accordance with the CAR FCL 1 shall be converted into a CAR-FCL certificate provided that the applicant complies with the following requirements:

Oman CAA certificate or privileges held	Experience	Any further requirements	Replacement CAR-FCL certificate
(1)	(2)	(3)	(4)
TRI(A)	as required under CAR- FCL for the relevant certificate	N/A	TRI(A) restricted to FCL.910.TRI

3. SFI certificate

An SFI certificate issued by Oman CAA in accordance with CAR FCL 1 shall be converted into a CAR-FCL certificate provided that the holder complies with the following requirements:

Oman CAA certificate held	Experience	Any further requirements	Replacement CAR-FCL certificate
(1)	(2)	(3)	(4)
SFI(A)	> 1 500 hours as pilot of MPA	(i) hold or have held a CPL, or ATPL for aeroplanes issued by Oman CAA (ii) have completed the flight simulator content of the applicable type rating course including MCC.	SFI(A) restricted to FCL.910.SFI
SFI(A)	3 years' recent experience as an SFI	have completed the flight simulator content of the applicable type rating course including MCC	SFI(A) restricted to FCL.910.SFI

The conversion shall be valid for a maximum period of 3 years. Revalidation shall be subject to the completion of the relevant requirements set out in CAR- FCL.

B. HELICOPTERS**1. Pilot licences**

A pilot licence issued by Oman CAA in accordance with the CAR-FCL 2 shall be converted into a CAR-FCL licence provided that the applicant complies with the following requirements:

- (a) complete as a proficiency check the revalidation requirements of CAR-FCL for type and instrument rating, relevant to the privileges of the licence held;
- (b) demonstrate knowledge of the relevant parts of the operational requirements and CAR-FCL;
- (c) Have valid English language proficiency assessment;
- (d) comply with the requirements set out in the following table:

	Oman CAA licence held	Total flying hours experience	Any further requirements	Replacement CAR-FCL licence and conditions (where applicable)	Removal of conditions
	(1)	(2)	(3)	(4)	(5)
(a)	ATPL(H) valid IR(H)	Pilot In Command	none	ATPL(H) and IR	Not applicable
(b)	ATPL(H) no IR(H) privileges	Pilot In Command	none	ATPL(H)	
(c)	ATPL(H) valid IR(H)	Co-pilot	None	ATPL(H), and IR with type rating restricted to co-pilot	demonstrate ability to act as PIC as required by Appendix 9 to CAR-FCL
(d)	ATPL(H) no IR(H) privileges	Co-pilot	None	ATPL(H) type rating restricted to co-pilot	demonstrate ability to act as PIC as required by Appendix 9 to CAR-FCL
(e)	CPL/IR(H) and passed an ICAO ATPL(H) theory test (*)	Co-pilot	None	CPL/IR(H) with ATPL(H) theory credit.	Not applicable
(f)	CPL/IR(H) (*)	Co-pilot	None	CPL/IR(H)	Not applicable
(g)	CPL/IR(H) (*)	Pilot In Command (Single pilot helicopter)	None	CPL/IR(H) with type ratings restricted to single-pilot helicopters	obtain multi-pilot type rating as required by CAR- FCL
(h)	CPL(H) (*)	Pilot In Command (Single pilot helicopter)	Night rating	CPL(H), with type ratings restricted to single-pilot helicopters and daylight	Obtain multi-pilot type rating as required by CAR- FCL and a night rating

(*) CPL holders already holding a type rating for a multi-pilot helicopter are not required to have passed an examination for ATPL(H) theoretical knowledge whilst they continue to operate that same helicopter type, but will not be given ATPL(H) theory credit for a CAR-FCL licence. If they require another type rating for a different multi-pilot helicopter, they must comply with pass an examination for ATPL(A) knowledge.

2. Instructor certificates

An instructor certificate issued by Oman CAA in accordance with the CAR FCL 2 shall be converted into a CAR-FCL certificate provided that the applicant complies with the following requirements:

Oman CAA certificate or privileges held	Experience	Any further requirements	Replacement certificate
(1)	(2)	(3)	(4)
TRI(H)/CRI(H)	as required under CAR-FCL for the relevant certificate	None	TRI(H) restricted to FCL.910.TRI

Revalidation of the certificate shall be subject to the completion of the relevant requirements set out in CAR-FCL.

3. SFI certificate

An SFI certificate issued by Oman CAA in accordance with the CAR FCL 2 shall be converted into a CAR-FCL certificate provided that the holder complies with the following requirements:

Oman CAA certificate held	Experience	Any further requirements	Replacement certificate
(1)	(2)	(3)	(4)
SFI(H)	> 1 000 hours as pilot of MPH	(i) hold or have held a CPL or ATPL issued by Oman CAA; (ii) have completed the flight simulator content of the applicable type rating course including MCC	SFI(H) restricted to FCL.910.SFI
SFI(H)	3 years' recent experience as an SFI	have completed the simulator content of the applicable type rating course including MCC	SFI(H) restricted to FCL.910.SFI

Revalidation of the certificate shall be subject to the completion of the relevant requirements set out in CAR-FCL.

*Appendix 12***CONDITIONS FOR THE ACCEPTANCE OF LICENCES ISSUED BY FOREIGN COUNTRIES
(ICAO MEMBER STATES)****A. VALIDATION OF LICENCES****Conditions for validation of pilot licenses for specific tasks of limited duration.**

1. CAA may accept to validate a license issued by another Contracting State in accordance with ICAO Annex 1 for a maximum of 12 months for specific tasks of limited duration, such as instruction flights for initial entry into service, demonstration, ferry or test flights, provided that the applicant complies with the following requirements:
 - (a) Employed by an aircraft manufacturer, approved training organization or an operator.
 - (b) Hold a current and valid pilot license issued by ICAO Contracting State in accordance with ICAO Annex 1 to include:
 - (1) Valid type/class/instrument/instructor/examiner ratings/certificate (as applicable).
 - (2) Valid English language proficiency as specified in Annex 1 issued in accordance with the State of license procedures.
 - (3) Valid medical certificate issued in accordance with the State of license procedures.
 - (c) Application for foreign license validation shall be submitted by Omani operator.
 - (d) The CAA will validate only those ratings or authorizations endorsed on the foreign license required for the operations on Omani register aircraft based on the validation defined specific task(s).
2. The privileges of the holder will be limited by the CAA to performing flight instruction and testing for initial issue of class/type ratings, the supervision of initial line flying by the operators' pilots, delivery or ferry flights, initial line flying, flight demonstrations or test flights, as appropriate to the tasks foreseen under this paragraph.

Note : Validation of licence has the same meanings as rendering valid a foreign licence.

B. CONVERSION OF LICENCES**Conditions for conversion of licences**

1. A PPL, CPL, MPL or an ATPL licence issued in compliance with the requirements of Annex 1 to the Chicago Convention by an ICAO contracting State may be converted into a CAR-FCL license with a class or type rating by the CAA for use on aircraft registered in the Oman provided that the applicant complies with the minimum requirements for the relevant aircraft category.
 - (a) Hold a current and valid pilot license issued by ICAO Contracting State in accordance with ICAO Annex 1 to include:
 - (1) Valid type/class/instrument rating(s) (as applicable).
 - (2) Valid English language proficiency as specified in Annex 1 issued in accordance with the State of license procedures.

- (3) Valid medical certificate issued in accordance with the State of license procedures. The foreign medical certificate shows an appropriate class corresponding to the licence held and is valid for the privileges of the licence.
 - (b) Fulfil the requirements for the issue of the relevant licenses and ratings, in accordance with CAR-FCL.
 - (c) Pass a written examination in Air Law.
 - (d) Obtain a medical certificate, as required and issued in accordance with CAR-FCL3.
 - (e) Demonstrate language proficiency in accordance with FCL.055.
 - (f) Pass the applicable skill test in accordance with CAR-FCL. The skill test may also be based on a new class or type that shall be in accordance with Subpart H of this Regulation.
2. CAA will convert only those ratings or authorizations endorsed on the foreign licence that it considers appropriate.

C. ACCEPTANCE OF CLASS AND TYPE RATINGS

Conditions for acceptance of class and type ratings

A class or type rating contained in a licence issued by an ICAO contracting State may be inserted in a licence issued in accordance with CAR-FCL, provided that the applicant:

- (a) Fulfil the requirements for the issue of the relevant type or class rating in accordance with CAR-FCL;
- (b) Passes the relevant skill test for the issue of the applicable type or class rating in accordance with CAR-FCL;
- (c) In case of expired class rating at the date of application, a refresher training for relevant class rating shall be undertaken at an CAA Oman approved ATO.
- (d) In case of expired type rating at the date of application, a refresher training shall be undertaken at an CAA Oman approved ATO.

D. ACCEPTANCE OF INSTRUCTOR PRIVILEGE

Conditions for acceptance of instructor rating / certificate / authorisation

- 1. A valid instructor rating/certificate/authorisation contained in a valid licence issued by a foreign country may be endorsed on a licence issued in accordance with CAR-FCL, provided that:
 - (a) Applicant is employed by Approved Training Organization (ATO) or CAT Operator with a valid AOC issued in the Sultanate of Oman to provide flight instruction in aircraft and/or flight synthetic training device (FSTD) ;
 - (b) Pass the relevant assessment of competence in accordance with CAR-FCL.935, except for STI and MCCI;
 - (c) For STI certificate, applicants shall, within the period of 12 months immediately preceding the application, have conducted at least 3 hours of flight instruction in an FSTD, as part of a

complete CPL, IR, PPL or class or type rating course;

- (d) For MCCI certificate, applicants shall, within the period of 12 months immediately preceding the application have, conducted at least 3 hours of flight instruction on the relevant FNPT II/III MCC, FTD 2/3 or FFS;
2. The CAA will endorse only those instructor rating/certificate/authorization issued by foreign country that it considers appropriate to the ATO's or the CAR Operator's approved training program.
